The book is organized into three parts to follow the topical arrangement of a typical introductory microeconomic textbook. These vignettes apply what students learn in their introductory microeconomics textbook. They focus on the student's ability to apply formal analysis with myriad of examples that come out of their daily activities. After studying this applications/issues book, students will be able to read a newspaper or magazine and understand their own daily activities in a new, economic way---and as a result understand the economics at work around them.
