She can tell that he is something out of the ordinary the first time they meet. He is a bit shy, and his dark eyes are secretive and mysterious. He is incredibly sexy. Even though she thinks that there is something different about him, she is fascinated by the sexual tension between them. It doesn't take long before she finds herself out of her comfort zone - and something doesn't feel quite right... Skin is an erotic thriller that tells the tale of thrilling sex, forbidden fantasies and questionable motives. B. J. Hermansson skillfully creates short stories that encompass both quick-witted prose and poetic descriptions. Income And Wealth From Self-Directed Investing - Ian Duncan MacDonald 2019-09-17

In 2001, after an investment adviser lost \$300,000 of Ian MacDonald's money, he took what was left and self-managed it. His investment objective was to build a stock scoring program that would give him an annual dividend income worth 6% of his portfolio, while increasing the value of that portfolio every year by about 9% (his background was in building commercial risk scoring computer programs for the banks and other businesses). He succeeded in his objective. While he had developed that stock scoring program for his own use, in 2019 he used it to help an elderly lady who had suffered a catastrophic financial loss, due to an

investment adviser's greed. After much of her loss had been recovered and her monthly income had doubled, she told Ian MacDonald that he needed to write a book to help people like her who knew little about investing and could easily be taken advantage of. He wrote that book. It is called, "Income and Wealth from Self-Directed Investing". He includes that PC stock scoring program with his 300 page book. To further help investors, in the last 100 pages of the book, are charts listing all the companies traded on the TSX that pay a dividend of 3.5% or more. Four sorts of the data in these charts is provided: by score, stock price, dividend percent and by company name. The data sorts make it easy and fast to identify and weigh which stocks are the best ones to add to your portfolio. Like the elderly widow, there are many who fear that they will outlive their life savings? They feel forced to use investment advisers because no one has shown them how to invest safely. Ian MacDonald's book takes away the fear of investing by explaining, the following in easy to understand language: (1) The danger of entrusting your money to an investment adviser whose fees and hidden agenda could drain your savings. (2) Why investing in dividend paying common stock is the safest way for you to invest, as compared to bonds, mutual funds, etc. (3) How to open an online self-directed stock trading account without having to involve bank employees. (4) How to easily find for your portfolio the best twenty stocks for capital gain and the highest dividends. (5) How to find and sort potential stock purchases from best to worse, so you can pick the twenty best and safest. (6) How to verify that stocks have no harmful information attached to them that could potentially be a problem if purchased. (7) How to purchase a stock you have carefully chosen, in less than five minutes. (8) How to quickly and easily monitor your purchased stocks on a daily, monthly and quarterly basis. The stock market is not a casino and what Ian MacDonald teaches is not a get rich quick scheme. It is a logical, easy to understand method of investing. Since implementing his scoring system, his portfolio has grown by 300% while generating a steady ever growing retirement income. He thinks every investor should now know exactly what they are invested in and understand why they are invested in it. Through booming times and recessions there is no reason your self-directed portfolio can not generate a reliable monthly income and grow year-after-year.

Volkswagen Chronicle - Markus Lupa 2003

In Tibet and Chinese Turkestan - Henry Hugh Peter Deasy 1901

Slave Stealers - Timothy Ballard 2018-09-04

Follow two abolitionists who fought one of the most shockingly persistent evils of the world: human trafficking and sexual exploitation of slaves. Told in alternating chapters from perspectives spanning more than a century apart, read the riveting 19th century first-hand account of Harriet Jacobs and the modern-day eyewitness account of Timothy Ballard. Harriet Jacobs was an African-American, born into slavery in North Carolina in 1813. She thwarted the sexual advances of her master for years until she escaped and hid in the attic crawl space of her grandmother's house for seven years before escaping north to freedom. She published an autobiography of her life, *Incidents in the Life of a Slave Girl*, which was one of the first open discussions about sexual abuse endured by slave women. She was an active abolitionist, associated with Frederick Douglass, and, during the Civil War, used her celebrity to raise money for black refugees. After the war, she worked to improve the conditions of newly-freed slaves. As a former Special Agent for the Department of Homeland Security who has seen the horrors and carnage of war, Timothy Ballard founded a modern-day "underground railroad" which has rescued hundreds of children from being fully enslaved, abused, or trafficked in third-world countries. His story includes the rescue and his eventual adoption of two young siblings--Mia and Marky, who were born in Haiti. Section 2 features the lives of five abolitionists, a mix of heroes from past to present, who call us to action and teach us life lessons based on their own experiences: Harriet Tubman--The "Conductor"; Abraham Lincoln--the "Great Emancipator"; Little Mia--the sister who saved her little brother; Guesno Mardy--the Haitian father who lost his son to slave traders; and Harriet Jacobs--a teacher for us all.

Mao's Cultural Army - Brian James DeMare 2015-04-02

Charting their training, travels, and performances, this innovative study explores the role of the artists that roamed the Chinese countryside in support of Mao's communist revolution. DeMare traces the development of Mao's 'cultural army' from its genesis in Red Army propaganda teams to its full development as a largely civilian force composed of amateur and professional drama troupes in the early years of the People's Republic of China (PRC). Drawing from memoirs, artistic handbooks, and rare archival sources, *Mao's Cultural Army* uncovers the arduous and complex process of creating revolutionary dramas that would appeal to China's all-important rural audiences. The Communists strived for a disciplined cultural army to promote party policies, but audiences often shunned modern and didactic shows, and instead clamoured for traditional works. DeMare illustrates how drama troupes, caught between the party and their audiences, did their best to resist the ever growing reach of the PRC state.

Plagiarism, Intellectual Property and the Teaching of L2 Writing - Joel

Bloch 2012-03-23

Plagiarism and intellectual property law are two issues that affect every student and every teacher throughout the world. Both concepts are concerned with how we use texts - print, digital, visual, and aural - in the creation of new texts. And both have been viewed in strongly moral terms, often as acts of 'theft'. However, they also reflect the contradictory views behind norms and values and therefore are essential to understand when using all forms of texts both inside and outside the classroom. This book discusses the current and historical relationship between these concepts and how they can be explicitly taught in an academic writing classroom.

This edition brings the story up to date and charts the arrival and evolution of the New Beetle, visually inspired by the original, which appeared in 1998. Prosecutors in the Boardroom - Anthony S. Barkow 2011-04-18

Who should police corporate misconduct and how should it be policed? In recent years, the Department of Justice has resolved investigations of dozens of Fortune 500 companies via deferred prosecution agreements

and non-prosecution agreements, where, instead of facing criminal charges, these companies become regulated by outside agencies. Increasingly, the threat of prosecution and such prosecution agreements is being used to regulate corporate behavior. This practice has been sharply criticized on numerous fronts: agreements are too lenient, there is too little oversight of these agreements, and, perhaps most important, the criminal prosecutors doing the regulating aren't subject to the same checks and balances that civil regulatory agencies are. Prosecutors in the Boardroom explores the questions raised by this practice by compiling the insights of the leading lights in the field, including criminal law professors who specialize in the field of corporate criminal liability and criminal law, a top economist at the SEC who studies corporate wrongdoing, and a leading expert on the use of monitors in criminal law. The essays in this volume move beyond criticisms of the practice to closely examine exactly how regulation by prosecutors works. Broadly, the contributors consider who should police corporate misconduct and how it should be policed, and in conclusion offer a policy blueprint of best practices for federal and state prosecution. Contributors: Cindy R. Alexander, Jennifer Arlen, Anthony S. Barkow, Rachel E. Barkow, Sara Sun Beale, Samuel W. Buell, Mark A. Cohen, Mariano-Florentino Cuellar, Richard A. Epstein, Brandon L. Garrett, Lisa Kern Griffin, and Vikramaditya Khanna

Capital Offenses: Business Crime and Punishment in America's Corporate Age - Samuel W. Buell 2016-08-16

From the lead prosecutor on the Enron investigation, an eye-opening examination of the explosion of American white-collar crime. If "corporations are people too," why isn't anyone in jail? A serious defect in a GM car causes accidents; Enron scams investors out of their money; banks bet on the housing market crash and win. In the race to maximize profits, corporations can behave in ways that are morally outrageous but technically legal. In Capital Offenses, Samuel Buell draws on the unique pairing of his expertise as a Duke University law professor and his personal experience leading the investigation into Enron—the biggest white-collar crime case in U.S. history—to present an in-depth examination of business crime today. At the heart of it sits the limited liability corporation, simultaneously the bedrock of American prosperity and the reason that white-collar crime is difficult to prosecute—a brilliant legal innovation that, in its modern form, can seem impossible to regulate or even manage. By shielding employees from legal responsibility, the corporation encourages the risk-taking that drives economic growth. But its special legal status and its ever-expanding scale place daunting barriers in the way of federal and local investigators. Detailing the complex legal frameworks that govern both corporations and the people who carry out their missions, Buell shows that deciphering business crime is rarely black or white. In lucid, thought-provoking prose, he illuminates the depths of the legal issues at stake—delving into fraudulent practices like Ponzi schemes, bad accounting, insider trading, and the art of "loopholing"—showing how every major case and each problem of law further exposes the ambivalence and instability at the core of America's relationship with its corporations. An expert in criminal law, Buell masterfully examines the limits of too permissive or overzealous prosecution of business crimes. Capital Offenses invites us to take a fresh look at our legal framework and learn how it can be used to effectively discipline corporations for wrongdoing, without dismantling the corporation.

Porsche 914, 914/6, 916 - Jürgen Lewandowski 2019-04-11

The Porsche 911's little brother... In 1969 a very special sports car was born. The 914 rose from a marriage of convenience of Volkswagen and Porsche, because both companies wanted a small, modern and affordable sports car in their product range, but for little cost. Thus, it was decided to combine the skills of both manufacturers. The result was a light mid-engine sports car with a lively road performance and even 50 years after its launch, it pleases the eye with a fresh design. Back then it was often ridiculed as a 'housewife Porsche' or 'Volks-Porsche', but now, the 914 has come out of the shadow of its big brother the 911 and has a huge fan base; today it lives on in the Boxster and Cayman models. This volume includes: the result of thorough research in the Porsche and VW archives; rich photography; all technical data; development, production,

model history and racing appearances.
