A New Climate for Theology - Sallie McFague 2008-04-03

Climate change promises monumental changes to human and other planetary life in the next generations. Yet government, business, and individuals have been largely in denial of the possibility that global warming may put our species on the road to extinction. Further, says Sallie McFague, we have failed to see the real root of our behavioral troubles in an economic model that actually reflects distorted religious views of the person. At its heart, she maintains, global warming occurs because we lack an appropriate understanding of ourselves as inextricably bound to the planet and its systems. A New Climate for Theology not only traces the distorted notion of unlimited desire that fuels our market system; it also paints an alternative idea of what being human means and what a just and sustainable economy might mean. Convincing, specific, and wise, McFague argues for an alternative economic order and for our relational identity as part of an unfolding universe that expresses divine love and human freedom. It is a view that can inspire real change, an altered lifestyle, and a form of Christian discipleship and desire appropriate to who we really are.

Educating the Neoliberal Whole Child - Bronwen MA Jones
2021-12-24

This book questions what 'educating the whole child' means in the context of our current neoliberal education system. In analysing the impact of how education policy is enacted and understood, it examines how this 'neoliberalisation' has shaped the personal and ethical relations of education. The book is unique in raising questions about the way in which a common and universally held truth about the importance and value of educating the whole child is conceptualised and articulated in education policy. Employing Foucault's concepts of bio power, governmentality, the dispositif and subjectivities, this book explores the importance of psy-scientific knowledge, systems of education governance and classroom practices in constructing a neoliberal whole child. It examines how government policy structures the relationship between the child, school and government and claims that current policy and practice operate as forms of bio power that extends neoliberal governance to the emotional and moral life of the child. *Educating the Neoliberal Whole Child* will be of great interest to researchers, academics and students in the fields of education policy, sociology of education and critical pedagogy. It is also a valuable addition to studies of Foucault and education.
