Cut and Paste Urban Landscape - Mira Engler
2015-08-11

During the post-war era, the emerging consumer economy radically changed both the discourse and practice of architecture. It was a time where architecture became a mainstream commodity whose products sold through mass media; a time

in which Thomas Gordon Cullen came to be one of Britain's best-known twentieth-century architectural draftsmen. Despite Cullen's wide acclaim, there has been little research into his life and work; particularly his printed images and his methods of operation. This book examines Cullen's drawings and book design and also looks into his process of image making to help explain his considerable popularity and influence which continues to this day. It presents the lessons Cullen had to offer in today's design culture and practice and looks into the post-war consumerist design strategies that are still used today.

International Journal for Digital Art History:

Issue 3, 2018 - Liska Surkemper 2019-02-18

Art History is centrally concerned with a vast array of three-dimensional objects, such as sculptures, and spaces, such as architecture. Digital technologies allow the creation of virtual spaces, which in turn allow us to simulate and compare aspects of a visual culture's three-dimensional timespace that cannot be communicated as a single, still image. The third issue, thus, focusses on the third dimension in Art History, and the digital realm that continues to mediate and transform it.

Lone Stars III - Karoline Patterson Bresenhan 2012-01-29

From frontier times in the Republic of Texas until today, Texans have been making gorgeous quilts. Karoline Patterson Bresenhan and Nancy O'Bryant Puentes documented the first 150 years of the state's rich heritage of quilt art in *Lone Stars: A Legacy of Texas Quilts, 1836-1936* and *Lone Stars II: A Legacy of Texas Quilts, 1936-1986*. Now in *Lone Stars III*, they bring the Texas quilt story into the twenty-first century, presenting two hundred traditional and art quilts that represent "the best of the best" quilts created since 1986. The quilts in *Lone Stars III* display the explosion of creativity that has transformed quilting over the last quarter century. Some of the quilts tell stories, create landscapes, record events, and memorialize people. Others present abstract designs that celebrate form and color. Their makers have embraced machine quilting, as well as hand sewing, and they often embellish their quilts with buttons, beads, lace, ribbon, and even more exotic items. Each quilt is pictured in its entirety, and some entries also include photographs of quilt details. The accompanying text describes the quilt's creation, its maker, and its physical details. With 16.3 million American quilters who spend \$3.6 billion annually on their pastime, the quilting community has truly become a force to reckon with both artistically and socially. *Lone Stars III* is the perfect introduction to this world of creativity.

MEDINFO 2019: Health and Wellbeing e-Networks for All - L. Ohno-Machado 2019-11-12

Combining and integrating cross-institutional data remains a challenge for both researchers and those involved in patient care. Patient-generated data can contribute precious information to healthcare professionals by enabling monitoring under normal life conditions and also helping patients play a more active role in their own care. This book presents the

proceedings of MEDINFO 2019, the 17th World Congress on Medical and Health Informatics, held in Lyon, France, from 25 to 30 August 2019. The theme of this year's conference was 'Health and Wellbeing: E-Networks for All', stressing the increasing importance of networks in healthcare on the one hand, and the patient-centered perspective on the other. Over 1100 manuscripts were submitted to the conference and, after a thorough review process by at least three reviewers and assessment by a scientific program committee member, 285 papers and 296 posters were accepted, together with 47 podium abstracts, 7 demonstrations, 45 panels, 21 workshops and 9 tutorials. All accepted paper and poster contributions are included in these proceedings. The papers are grouped under four thematic tracks: interpreting health and biomedical data, supporting care delivery, enabling precision medicine and public health, and the human element in medical informatics. The posters are divided into the same four groups. The book presents an overview of state-of-the-art informatics projects from multiple regions of the world; it will be of interest to anyone working in the field of medical informatics.

Junk Journal Victorian Scrap Themed Signature - Strategic Publications 2019-08-06

Use it as is to create a small Junk Journal or get

more in my series as Signature elements and put them together in pockets of a Junk Journal or compile and bind them into a larger book. This slim 30 page paperback journal was created to be used as a no-sew Signature section to create a Junk Journal like no other. Collect all my signature book themes that appeal to you and bind them together into a journal that is totally unique to you. They are slim enough that you can add many layers of heavy trims and laces and still keep the book in shape. If you just want to quickly journal some memories you can create a mini journal in a one day session, just writing in the illustrated pages as-is, or also adding your own extra decorations, pictures and photos to it The images on the pages at the back of the book are to be cut out and used to create extra note cards, envelopes, embellishments, journal cards & their pockets, as well as scraps to all cut and glue into the pages of the book and just keep building as many layers as you want on each page. Then for extra fun in building up your Junk Journal layers, you also add your own laces, ribbons, fabric, photos, buttons, jewels, flowers, stickers and whatever scraps delight your creativity. Use these Signatures to make wonderful memory books for a life well lived, that are a beautiful and creative legacy.
