## **A Short History of (Nearly) Everything Paranormal -**

Terje G. Simonsen 2020-06-09

The book on the paranormal, endorsed by consciousness experts as the best introduction to psychic phenomena, offering the latest scientific research as well as highly compelling anecdotes. "Superb survey of the paranormal ... Although serious

in content, it is written in a light, often humorous, style which is a delight to read. As someone who has myself made a lifelong study of the paranormal, I cannot recommend it highly enough." - New York Times bestselling author Herbie Brennan This is the most entertaining and broad survey of the paranormal ever made, combining forgotten lore, evidence from parapsychological experiments and the testament of scientists, archaeologists, anthropologists, psychologists, physicists and philosophers, and also quite a few celebrities. Exploring the possibility that paranormal phenomena may be - and that some most likely are - objectively real, this travelogue through the twilight zone of human consciousness is both scientifically rigorous and extremely entertaining. Readers may be surprised to learn that reputable scientists, among them several Nobel laureates, have claimed that telepathy is a reality, that Cleopatra's lost palace and Richard III's burial place were

recovered by means of clairvoyance, and that an espionage program using psychics was set up by the US military! The author proposes that all humans (perhaps all living beings) are linked together in a sort of "mental internet" that allows us to exchange "telepathic emails" and make clairvoyant downloads of information. Could it be that what we usually call "supernatural" is a natural but little understood communication via this mental internet? An engaging, entertaining and informative analysis of a controversial subject, in which these phenomena are approached as potential expressions of unexplained powers of the human mind.

Time-Travel Television - Sherry Ginn 2015-10-08

Stories of time travel have been part of science fiction since H. G. Wells sent his nameless hero hurtling into Earth's distant future in *The Time Machine*. Time travel enables the storyteller to depict alternate realities, bring fictional characters face to face with historical figures, and depict moral and ethical dilemmas in which millions of lives (or the world as we know it) are at stake. From *Doctor Who* and *Quantum Leap* to the multiple incarnations of *Star Trek*, time travel has been a staple of science fiction television for more than fifty years. *Time-Travel Television: The Past from the Present, the Future from the Past* surveys the whole range of time travel stories on the small screen. The essays in this collection explore time travel series both familiar (*Babylon 5*, *Stargate SG-1*) and forgotten (*The Time Tunnel*, *Voyagers!*), as well as time-travel themed episodes and arcs in series where it is not central, such as *Red Dwarf*, *Lost*, and *Heroes*. Contributors to this volume consider some of

the classic themes of time-travel stories: the promise (and peril) of “fixing” the past, the chance to experience (and choose) possible futures, and the potential for small changes to have great effects. Exploring time travel as a teaching tool, as a vehicle for moral lessons, and as a background for high adventure, this book offers new perspectives on many familiar programs and the first serious study of several unjustly neglected ones. *Time-Travel Television* is essential reading for science fiction scholars and fans, and for anyone interested in the many ways that television brings the fantastic into viewers’ living rooms.

Sawyer and foreword by David Gerrold. Trekkies and Trekkers alike will get starry-eyed over this eclectic mix of essays on the groundbreaking original

Star Trek, one of the most culturally impactful TV shows of the last 50 years. Star Trek scriptwriters D. C. Fontana, David Gerrold, Norman Spinrad, and Howard Weinstein, science fiction writers including Allen Steele and Lawrence Watt-Evans, and various academics share behind-the-scenes anecdotes, discuss the show's enduring appeal and influence, and examine some of the classic features of the series. Inside: Communications and media theorist Paul Levinson shows how the unprecedented success of the "seventy-nine jewels" in syndication changed the way we look at television forever. Star Trek writer D. C. Fontana remembers Gene Roddenberry and what it was like on the set and behind the scenes. Hugo Award-winning author Allen Steele explores the strong science fiction tradition that made the show so great. Cultural theorist Eric Greene details the show's complex dialogue with the Vietnam War, highlighting the evolving stances on

interventionist politics. Science fiction novelist DON Debrandt contends that the famously logical Spock isn't quite as rational as Star Trek's writers would have you believe.

Scientist Robert A. Metzger proves that Scotty's ability to lie makes him the most valuable member of the Enterprise crew. Fanfiction author Melissa Dickinson explains why we still feel compelled to write our own stories about Kirk, Spock, and the rest of the show's memorable characters.
