The Parent Trap - Nate G. Hilger 2022-04-26  
How parents have been set up to fail, and why helping them succeed is the key to achieving a fair and prosperous society. Few people realize that raising children is the single largest industry in the United States. Yet this vital work receives little political support, and its primary workers—parents—labor in isolation. If they ask for help, they are made to feel inadequate; there is no centralized organization to represent their interests; and there is virtually nothing spent on research and development to help them achieve their goals. It's almost as if parents are set up to fail—and the result is lost opportunities that limit children's success and make us all worse

off. In *The Parent Trap*, Nate Hilger combines cutting-edge social science research, revealing historical case studies, and on-the-ground investigation to recast parenting as the hidden crucible of inequality. Parents are expected not only to care for their children but to help them develop the skills they will need to thrive in today's socioeconomic reality—but most parents, including even the most caring parents on the planet, are not trained in skill development and lack the resources to get help. How do we fix this? The solution, Hilger argues, is to ask less of parents, not more. America should consider child development a public investment with a monumental payoff. We need a program like Medicare—call it Familycare—to drive this investment. To make it happen, parents need to organize to wield their political power on behalf of children—who will always be the largest bloc

of disenfranchised people in this country. The Parent Trap exposes the true costs of our society's unrealistic expectations around parenting and lays out a profoundly hopeful blueprint for reform.

*Development of an Ultrasonic Sensing Technique to Measure Lubricant Viscosity in Engine Journal Bearing In-Situ* - Michele Schirru  
2017-02-21

This thesis presents a novel ultrasonic instrument for non-invasive and in-situ

characterization of journal bearing lubricant viscosity. In particular, the application to journal bearings is described by non-invasively measuring the viscosity and localized power losses throughout operation. This ultrasonic viscometer is based on the reflection of polarized shear waves from a thin resonating coating layer to increase the measurement sensitivity, in comparison to conventional ultrasonic methods. This instrument allows for a full engine oil viscoelastic characterization in-situ. The book investigates the effects of temperature, pressure and shear rate, and describes in detail the ultrasonic setup and method. Further, it demonstrates that the same technique can be applied similarly to monitor the lubrication of other engine components. As such, it offers a unique instrument that can drive the research of oil formulations to improve engine performance and fulfill the requirements of international fuel economy regulations.

**Pilgrims** - Elizabeth Gilbert 2009-11-23

The cowboys, strippers, labourers and magicians of Pilgrims are all on their way to being somewhere, or someone, else. Some are browbeaten and world-weary, others are deluded and naïve, yet all seek companionship as fiercely as they can. A tough East Coast girl dares a western cowboy to run off with her; a matronly bar owner falls in love with her nephew; an innocent teenager falls hopelessly for the local bully's sister. These are tough heroes and heroines, hardened by their experiences, who struggle for their epiphanies. Yet hope is never far away and though they may act blindly, they always act bravely. Sharply drawn and tenderly observed, Pilgrims is filled with Gilbert's inimitable humour and warmth.

**World Development Report 2019** - World Bank 2018-10-31

Work is constantly reshaped by technological progress. New ways of production are adopted, markets expand, and societies evolve. But some

changes provoke more attention than others, in part due to the vast uncertainty involved in making predictions about the future. The 2019 World Development Report will study how the nature of work is changing as a result of advances in technology today. Technological progress disrupts existing systems. A new social contract is needed to smooth the transition and guard against rising inequality. Significant investments in human capital throughout a person's lifecycle are vital to this effort. If workers are to stay competitive against machines they need to train or retool existing skills. A social protection system that includes a minimum basic level of protection for workers and citizens can complement new forms of employment. Improved private sector policies to encourage startup activity and competition can help countries compete in the digital age. Governments also need to ensure that firms pay their fair share of taxes, in part to fund this new social contract. The 2019 World Development

Report presents an analysis of these issues based upon the available evidence.

Debt, Updated and Expanded - David Graeber  
2014-12-09

Now in paperback, the updated and expanded edition: David Graeber's "fresh . . . fascinating . . . thought-provoking . . . and exceedingly timely" (Financial Times) history of debt Here anthropologist David Graeber presents a stunning reversal of conventional wisdom: he shows that before there was money, there was debt. For more than 5,000 years, since the beginnings of the first agrarian empires, humans have used elaborate credit systems to buy and sell goods—that is, long before the invention of coins or cash. It is in this era, Graeber argues, that we also first encounter a society divided into debtors and creditors. Graeber shows that arguments about debt and debt forgiveness have been at the center of political debates from Italy

to China, as well as sparking innumerable insurrections. He also brilliantly demonstrates that the language of the ancient works of law and religion (words like "guilt," "sin," and "redemption") derive in large part from ancient debates about debt, and shape even our most basic ideas of right and wrong. We are still fighting these battles today without knowing it. Articoli: La Repubblica dal 1985 al 1995 - Eugenio Scalfari 2004

**Dawn of the Solar Age** - Prem Shankar Jha  
2017-11-20

Our planet is growing hotter, which is mainly due to the burning of fossil fuels. Yet, most of us remain chained to the belief that there is no alternative source of energy sufficiently plentiful

and cheap. Dawn of the Solar Age provides a blueprint for shifting the energy base of human civilisation out of fossil fuels and successfully reducing the concentration of greenhouse gases in the atmosphere. The author shows how the commercialisation of fully proven technologies—that can provide limitless amounts of renewable energy and entirely replace all fossil fuels—is being delayed to serve the purposes of dominant corporations and nations. He studies the economic viability of these technologies and tells us how we can avert the imminent disaster that we face today. He concludes that the transition out of fossil fuels, though difficult, need not be too slow to prevent irreparable damage.

**Inventing the Future** - Nick Srnicek  
2015-11-17

A major new manifesto for the end of capitalism. Neoliberalism isn't working. Austerity is forcing millions into poverty and many more into precarious work, while the left remains trapped

in stagnant political practices that offer no respite. Inventing the Future is a bold new manifesto for life after capitalism. Against the confused understanding of our high-tech world by both the right and the left, this book claims that the emancipatory and future-oriented possibilities of our society can be reclaimed. Instead of running from a complex future, Nick Srnicek and Alex Williams demand a postcapitalist economy capable of advancing standards, liberating humanity from work and developing technologies that expand our freedoms. This new edition includes a new chapter where they respond to their various critics.

*Trading e investimenti online* - Andrea Fiorini  
2021-02-05T00:00:00+01:00

Un libro che illustra le varie possibilità di investimento che si possono effettuare in piena autonomia, sfruttando le potenzialità offerte da computer e Internet. Un obiettivo che, in ottica di un'efficace diversificazione, può essere

raggiunto impiegando una parte del capitale a disposizione per operare in borsa (con un alto rischio e con un orizzonte temporale di breve o medio periodo) e, allo stesso tempo, investendo la maggior parte dei propri capitali in attività o strumenti più tradizionali, a basso rischio e con un orizzonte temporale di lungo termine, beneficiando di cedole o interessi periodici. Fondi comuni d'investimento, conti di deposito, piani di accumulo, dividendi, equity crowdfunding sono solo alcuni degli esempi di investimenti effettuabili "in autonomia" presentati nel libro, accanto agli strumenti più classici del trading online, il tutto arricchito da un'introduzione alla consulenza finanziaria. Chi sceglie questa duplice strategia di approccio alla finanza e ai mercati è quindi parte di una nuova specie di investitori-trader, quella degli investrader, ossia di investitori attivi che vogliono decidere con la propria testa, mantenere bassi i costi e operare nei tempi e nei modi a loro più congeniali, a fronte di un

impegno serio e costante nello studio e nell'analisi dei mercati.

*International Perspectives on Spinal Cord Injury*  
- World Health Organization 2013

"Every year between 250 000 and 500 000 people suffer a spinal cord injury, with road traffic crashes, falls and violence as the three leading causes. People with spinal cord injury are two to five times more likely to die prematurely. They also have lower rates of school enrollment and economic participation than people without such injuries. Spinal cord injury has costly consequences for the individual and society, but it is preventable, survivable and need not preclude good health and social inclusion. Ensuring an adequate medical and rehabilitation response, followed by supportive services and accessible environments, can help minimize the disruption to people with spinal cord injury and their families. The aims of International perspectives on spinal cord injury are to: ---assemble and summarize information

on spinal cord injury, in particular the epidemiology, services, interventions and policies that are relevant, together with the lived experience of people with spinal cord injury; --- make recommendations for actions based on this evidence that are consistent with the aspirations for people with disabilities as expressed in the Convention on the Rights of Persons with Disabilities.

These seemingly disparate characters gradually realize their connections to each other just as they realize that something is not quite right about their world. And it seems as though the answers might lie with Hawthorne Abendsen, a mysterious and reclusive author whose bestselling novel describes a world in which the US won the War... The Man in the High Castle is Dick at his best, giving readers a harrowing

vision of the world that almost was. "The single most resonant and carefully imagined book of Dick's career." —New York Times  
Modern Value Investing - Sven Carlin  
2018-04-24

My personal goal is to help people reach their financial goals. One way of doing that is through investing education. The book is my attempt to help with the development of a strong investing mindset and skillset to help you make better investment decisions. There is a gap in the value investing world. Benjamin Graham published The Intelligent Investor in 1949 with several subsequent editions up to 1972, while Seth Klarman published Margin of Safety in 1991. With more than 50 years since Graham published his masterpiece and almost 30 since Klarman's, there was the need for a contemporary book to account for all the changes in the financial environment we live in. Modern Value Investing book does exactly that, in 4 parts. Part 1 discusses the most

important psychological traits a successful investor should have. Part 2 describes 25 tools that help with investment analysis. Part 3 applies those tools on an example. Part 4 is food for investing thought as it discusses modern approaches to investing. Approaches range from an all-weather portfolio strategy to hyperbolic discounting and others you can take advantage of when the time is right.

*Edge of Eternity* - Ken Follett 2014-09-16

Ken Follett's extraordinary historical epic, the Century Trilogy, reaches its sweeping, passionate conclusion. In *Fall of Giants* and *Winter of the World*, Ken Follett followed the fortunes of five international families—American, German, Russian, English, and Welsh—as they made their way through the twentieth century. Now they come to one of the most tumultuous eras of all: the 1960s through the 1980s, from civil rights, assassinations, mass political movements, and Vietnam to the Berlin Wall, the Cuban Missile Crisis, presidential impeachment,

revolution—and rock and roll. East German teacher Rebecca Hoffmann discovers she's been spied on by the Stasi for years and commits an impulsive act that will affect her family for the rest of their lives. . . . George Jakes, the child of a mixed-race couple, bypasses a corporate law career to join Robert F. Kennedy's Justice Department and finds himself in the middle of not only the seminal events of the civil rights battle but a much more personal battle of his own. . . . Cameron Dewar, the grandson of a senator, jumps at the chance to do some official and unofficial espionage for a cause he believes in, only to discover that the world is a much more dangerous place than he'd imagined. . . . Dimka Dvorkin, a young aide to Nikita Khrushchev, becomes an agent both for good and for ill as the United States and the Soviet Union race to the brink of nuclear war, while his twin sister, Tanya, carves out a role that will take her from Moscow to Cuba to Prague to Warsaw—and into history.

**A Modern Way to Live** - Matt Gibberd

2021-10-28

Find happiness at home with five guiding principles from cultural phenomenon THE MODERN HOUSE. 'A source of fascination, inspiration and fantasy' Guardian In 2005, childhood friends Matt Gibberd and Albert Hill set out to convince people of the power of good design and its ability to influence our wellbeing. They founded The Modern House - in equal parts an estate agency, a publisher and a lifestyle brand - and went on to inspire a generation to live more thoughtfully and beautifully at home.

As The Modern House grew, Matt and Albert came to realise that the most successful homes they encountered - from cleverly conceived studio flats to listed architectural masterpieces - had been designed with attention to the same timeless principles: Space, Light, Materials, Nature and Decoration. In this lavishly illustrated book, Matt tells the stories of these remarkable living spaces and their equally remarkable owners, and demonstrates how the five principles can be applied to your own space in ways both large and small. Revolutionary in its simplicity, and full of elegance, humour and joy, this book will inspire you to find happiness in the place you call home. **MhGAP Intervention Guide for Mental, Neurological and Substance-Use Disorders in Non-Specialized Health Settings - Version 2.0** - World Health Organization  
2016-11-30

The mhGAP Intervention Guide (mhGAP-IG) for Mental, Neurological and Substance-use Disorders for Non-specialist Health Settings, is a technical tool developed by WHO to assist in implementation of mhGAP. The Intervention Guide has been developed through a systematic review of evidence followed by an international consultative and participatory process. The mhGAP-IG presents integrated management of

priority conditions using protocols for clinical decision-making. The priority conditions included are: depression, psychosis, bipolar disorders, epilepsy, developmental and behavioural disorders in children and adolescents, dementia, alcohol use disorders, drug use disorders, self-harm/suicide and other significant emotional or medically unexplained complaints. The mhGAP-IG is a model guide and has been developed for use by health-care providers working in non-specialized health-care settings after adaptation for national and local needs.
