and the U.S. Federal Aviation Administration's policy and guidance on safety-critical software. In this book, she draws on more than 20 years of experience as a certification authority, an avionics manufacturer, an aircraft integrator, and a software developer to present best practices, real-world examples, and concrete recommendations. The book includes: An overview of how software fits into the systems and safety processes Detailed examination of DO-178C and how to effectively apply the guidance Insight into the DO-178C-related documents on tool qualification (DO-330), model-based development (DO-331), object-oriented technology (DO-332), and formal methods (DO-333) Practical tips for the successful development of safety-critical software and certification Insightful coverage of some of the more challenging topics in safety-critical software development and verification, including real-time operating systems, partitioning,

configuration data, software reuse, previously developed software, reverse engineering, and outsourcing and offshoring An invaluable reference for systems and software managers, developers, and quality assurance personnel, this book provides a wealth of information to help you develop, manage, and approve safety-critical software more confidently.

*The Power of the Vote* - Martin Ott 2004

The 2004 elections in Malawi were pivotal in the democratisation process of a country, which is undergoing enormous changes in its political landscape. The elections carried a message of democratic hope, however were not free of concern for the future of a stable democracy in the country: the 2004 elections were characterised by voter apathy, registering fewer voters than in 1999. The papers in this book comprise the proceedings of a non-partisan, academic conference, which took place in Malawi after the elections, in

July 2004. They consider questions such as: the extent to which the people of the country were fully cognisant of their rights, responsibilities, and appreciated the power of the vote; the reasons for the reduced turnout, and whether or not this of itself represented a form of protest; and whether the elections will provide a stable and predictable foundation for the future. The papers further provide a comprehensive overview of the main aspects of the elections: the electoral process; the political parties; the participation of civil society and faith communities; the roles of the judiciary, media and donors; the management of conflicts; and perspectives of domestic and international observers. Finally, the editors outline a series of recommendations to local and international stakeholders in Malawi's democracy, and provide valuable statistical data.

Human Resource Information Systems - Michael J. Kavanagh  
2017-07-07

Human Resource Information Systems: Basics, Applications, and Future Directions is a one-of-a-kind book that provides a thorough introduction to the field of Human Resource Information Systems (HRIS) and shows how organizations today can leverage HRIS to make better people decisions and manage talent more effectively. Unlike other texts that overwhelm students with technical information and jargon, this revised Fourth Edition offers a balanced approach in dealing with HR issues and IT/IS issues by drawing from experts in both areas. It includes the latest research and developments in the areas of information security, privacy, cloud computing, social media, and HR analytics. Numerous examples, best practices, discussion questions, and case studies, make this book the most student-friendly and current text on the market.

**Analytical Framework** - Irina Bunda 2021-06-08

The coronavirus (COVID-19) crisis, which has hit financial systems across Africa, is likely to deteriorate banks' balance sheets. The largest threat to banks pertains to their loan portfolios, since many borrowers have faced a sharp collapse in their income, and therefore have difficulty repaying their obligations as they come due. This could lead to a sharp increase in nonperforming loans (NPLs) in the short to medium term.

Translation in Cascading Crises  
- Federico M. Federici  
2019-10-08

This volume addresses the imperative need for recognizing, exploring, and developing the role of multilingual communication in crisis settings. It is recognized that 'communication is aid' and that access to communication is an undeniable human right in crises. Even where effective and accurate information is available to be distributed, circulated, and broadcast in different ways through an ever-

growing array of technologies, too often the language barrier remains in place. From the Philippines to Lebanon via Spain, Italy, Columbia, and the UK, crisis situations occur worldwide, with different cultural reactions and needs everywhere. The contributors of this volume represent a geographical mixture of regions, language combinations, and disciplines, because crisis situations need to be studied in their locale with different methods.

Drawing on disaster studies research, this book aims to stimulate a broad, multidisciplinary debate on how complex communication is in cascading crises and on the role translation can play to facilitate communication.

Translation in Cascading Crises is a key resource for students and researchers of Translation and Interpreting Studies, Humanitarian Studies, and Disaster Studies.

*Violence at Work* - Duncan Chappell 2006

Violence at work, ranging from bullying and mobbing, to threats by psychologically unstable co-workers, sexual harassment and homicide, is increasing worldwide and has reached epidemic levels in some countries. This updated and revised edition looks at the full range of aggressive acts, offers new information on their occurrence and identifies occupations and situations at particular risk. It is organised in three sections:

understanding violence at work; responding to violence at work; future action.

*Airline Marketing and Management* - Stephen Shaw  
2016-03-23

Through six previous editions, *Airline Marketing and Management* has established itself as the leading textbook for students of marketing and its application to today's airline industry, as well as a reference work for those with a professional interest in the area. Carefully revised, the

seventh edition of this internationally successful book examines an exceptionally turbulent period for the industry. It features new material on: \*Changes in customer needs, particularly regarding more business travellers choosing - or being forced - to travel economy, and analysis of the bankruptcy of 'All Business Class' airlines. \* An explanation of the US/EU 'Open Skies' agreement and analysis of its impact. \*The increase in alliance activity and completion of several recent mergers, and the marketing advantages and disadvantages that have resulted. \* Product adjustments that airlines must make to adapt to changes in the marketing environment, such as schedule re-adjustments and the reconfiguration of aircraft cabins. \*Changes in pricing philosophies, with, for example, airlines moving to 'A La Carte' pricing, whereby baggage, catering and priority boarding are paid for as extras. \*Airline websites and their role as both a selling and distributing tool.

\*The future of airline marketing. A review of the structure of the air transport market and the marketing environment is followed by detailed chapters examining business and marketing strategies, product design and management, pricing and revenue management, current and future distribution channels, and selling, advertising and promotional policies. The reader will benefit from greater understanding of both marketing and airline industry jargon and from knowledge obtained regarding the extraordinary strategic challenges now facing aviation. Written in a straightforward, easy-to-read style and combining up-to-date and relevant examples drawn from the worldwide aviation industry, this new edition will further enhance the book's reputation for providing the ideal introduction to the subject.

**Violence Against Women and Girls** - Jennifer L.

Solotaroff 2014-09-04

This report documents the

dynamics of violence against women in South Asia across the life cycle, from early childhood to old age. It explores the different types of violence that women may face throughout their lives, as well as the associated perpetrators (male and female), risk and protective factors for both victims and perpetrators, and interventions to address violence across all life cycle stages. The report also analyzes the societal factors that drive the primarily male — but also female — perpetrators to commit violence against women in the region. For each stage and type of violence, the report critically reviews existing research from Afghanistan, Bangladesh, Bhutan, India, Maldives, Nepal, Pakistan, and Sri Lanka, supplemented by original analysis and select literature from outside the region. Policies and programs that address violence against women and girls are analyzed in order to highlight key actors and promising interventions. Finally, the report identifies

critical gaps in research, program evaluations, and interventions in order to provide strategic recommendations for policy makers, civil society, and other stakeholders working to mitigate violence against women in South Asia.

**Researching Japanese War Crimes Records** - Edward J. Drea 2006

*Sexual Violence as a Weapon of War?* - Maria Eriksson Baaz 2013-05-09

All too often in conflict situations, rape is referred to as a 'weapon of war', a term presented as self-explanatory through its implied storyline of gender and warring. In this

provocative but much-needed book, Eriksson Baaz and Stern challenge the dominant understandings of sexual violence in conflict and post-conflict settings. Reading with and against feminist analyses of the interconnections between gender, warring, violence and militarization, the authors address many of the thorny issues inherent in the arrival of sexual violence on the global security agenda. Based on original fieldwork in the Democratic Republic of the Congo, as well as research material from other conflict zones, *Sexual Violence as a Weapon of War?* challenges the recent prominence given to sexual violence, bravely highlighting various problems with isolating sexual violence from other violence in war. A much-anticipated book by two acknowledged experts in the field, on an issue that has become an increasingly important security, legal and gender topic.

**Foreign Humanitarian Assistance** - Department of Defense 2019-07-19

Foreign Humanitarian Assistance, Joint Publication 3-29, 14 May 2019 This publication provides fundamental principles and guidance to plan, execute, and assess foreign humanitarian assistance operations. ## **Male Roles, Masculinities and Violence** - Ingeborg Breines 2000

This book is based on an expert group meeting entitled 'Male Roles and Masculinities in the Perspective of a Culture of Peace', which was organised by UNESCO in Oslo, Norway in 1997, the first international discussion of the connections between men and masculinity and peace and war. The group consisted of researchers, activists, policy makers and administrators and the aim of the meeting was to formulate practical suggestions for change. Chapters in the book consist of both regional case studies and social science research on the connections of traditional masculinity and patriarchy to violence and peace building. The Culture of Peace initiatives in this book show how violence is ineffective, and the book contests the views in the socialisation of boy-children that aggressiveness, violence and force are an acceptable means of expression.

difference to the lives of people affected The Humanitarian Charter and Minimum Standards in Disaster Response (The Sphere Handbook) is one of the most widely known and internationally recognized sets of common principles and universal minimum standards for the delivery of quality humanitarian response and puts the right of disaster-affected populations to life with dignity, and to protection and assistance at the centre of humanitarian action. The Humanitarian Charter and Minimum Standards in Humanitarian Response and The Sphere Project promotes the active participation of affected populations as well as of local and national authorities, and is used to negotiate humanitarian space and resources with authorities in disaster-preparedness work. The minimum standards cover four primary life-saving areas of humanitarian aid: water supply, sanitation and hygiene promotion; food security and nutrition; shelter, settlement and non-food items; and health

action. The new edition of the Sphere Project's Handbook updates the qualitative and quantitative indicators and guidance notes and improves the overall structure and consistency of the text including a rewritten Humanitarian Charter, updated common standards, a stronger focus on protection and revised technical chapters.

The Influence of Global Environmental Change on Infectious Disease Dynamics - Institute of Medicine  
2014-09-03

The twentieth century witnessed an era of unprecedented, large-scale,

anthropogenic changes to the natural environment. Understanding how environmental factors directly and indirectly affect the emergence and spread of infectious disease has assumed global importance for life on this planet. While the causal links between environmental change and disease emergence are complex, progress in understanding these links, as well as how their impacts may vary across space and time, will require transdisciplinary, transnational, collaborative research. This research may draw upon the expertise, tools, and approaches from a variety of disciplines. Such research may inform improvements in global readiness and capacity for surveillance, detection, and response to emerging microbial threats to plant, animal, and human health. The Influence of Global Environmental Change on Infectious Disease Dynamics is the summary of a workshop hosted by the Institute of Medicine Forum on Microbial Threats in September 2013 to explore the scientific and

policy implications of the impacts of global environmental change on infectious disease emergence, establishment, and spread. This report examines the observed and potential influence of environmental factors, acting both individually and in synergy, on infectious disease dynamics. The report considers a range of approaches to improve global readiness and capacity for surveillance, detection, and response to emerging microbial threats to plant, animal, and human health in the face of ongoing global environmental change.

National Strategy for the COVID-19 Response and Pandemic Preparedness -

Joseph R. Biden, Jr. 2021-05-18

The ultimate guide for anyone wondering how President Joe Biden will respond to the COVID-19 pandemic—all his plans, goals, and executive orders in response to the coronavirus crisis. Shortly after being inaugurated as the 46th President of the United States, Joe Biden and his

administration released this 200 page guide detailing his plans to respond to the coronavirus pandemic. The National Strategy for the COVID-19 Response and Pandemic Preparedness breaks down seven crucial goals of President Joe Biden's administration with regards to the coronavirus pandemic:

1. Restore trust with the American people.
2. Mount a safe, effective, and comprehensive vaccination campaign.
3. Mitigate spread through expanding masking, testing, data, treatments, health care workforce, and clear public health standards.
4. Immediately expand emergency relief and exercise the Defense Production Act.
5. Safely reopen schools, businesses, and travel while protecting workers.
6. Protect those most at risk and advance equity, including across racial, ethnic and rural/urban lines.
7. Restore U.S. leadership globally and build better preparedness for future threats.

Each of these goals are explained and detailed in the

book, with evidence about the current circumstances and how we got here, as well as plans and concrete steps to achieve each goal. Also included is the full text of the many Executive Orders that will be issued by President Biden to achieve each of these goals. The National Strategy for the COVID-19 Response and Pandemic Preparedness is required reading for anyone interested in or concerned about the COVID-19 pandemic and its effects on American society.

*Covid-19: The Great Reset* - Thierry Malleret 2020-07-09

"The Corona crisis and the Need for a Great Reset" is a guide for anyone who wants to understand how COVID-19 disrupted our social and economic systems, and what changes will be needed to create a more inclusive, resilient and sustainable world going forward. Thierry Malleret, founder of the Monthly Barometer, and Klaus Schwab, founder and executive Chairman of the World Economic Forum, explore what the root causes of these crisis were, and why they lead to a need for a Great Reset. Theirs is a worrying, yet hopeful analysis. COVID-19 has created a great disruptive reset of our

global social, economic, and political systems. But the power of human beings lies in being foresighted and having the ingenuity, at least to a certain extent, to take their destiny into their hands and to plan for a better future. This is the purpose of this book: to shake up and to show the deficiencies which were manifest in our global system, even before COVID broke out. *Protection of Civilians* - Haidi Willmot 2016

The protection of civilians is a highly topical issue at the forefront of international discourse, and has taken a prominent role in many international deployments. It has been at the center of debates on the NATO intervention in Libya, UN deployments in Darfur, South Sudan, and the Democratic Republic of the Congo, and on the failures of the international community in Sri Lanka and Syria. Variously described as a moral responsibility, a legal obligation, a mandated peacekeeping task, and the culmination of humanitarian

activity, it has become a high-profile concern of governments, international organizations, and civil society, and a central issue in international peace and security. This book offers a multidisciplinary treatment of this important topic, harnessing perspectives from international law and international relations, traversing academia and practice. Moving from the historical and philosophical development of the civilian protection concept, through relevant bodies of international law and normative underpinnings, and on to politics and practice, the volume presents coherent cross-cutting analysis of the realities of conflict and diplomacy. In doing so, it engages a series of current debates, including on the role of politics in what has often been characterized as a humanitarian endeavor, and the challenges and impacts of the use of force. The work brings together a wide array of eminent academics and

respected practitioners, incorporating contributions from legal scholars and ethicists, political commentators, diplomats, UN officials, military commanders, development experts and humanitarian aid workers. As the most comprehensive publication on the subject, this will be a first port of call for anyone studying or working towards a better protection of civilians in conflict.

*Gender based violence in university communities -*

Anitha, Sundari 2018-06-27

Until recently, higher education in the UK has largely failed to recognise gender-based violence (GBV) on campus, but following the UK government task force set up in 2015, universities are becoming more aware of the issue. And recent cases in the media about the sexualised abuse of power in institutions such as universities, Parliament and Hollywood highlight the prevalence and damaging impact of GBV. In this book, academics and practitioners provide the first

in-depth overview of research and practice in GBV in universities. They set out the international context of ideologies, politics and institutional structures that underlie responses to GBV in elsewhere in Europe, in the US, and in Australia, and consider the implications of implementing related policy and practice. Presenting examples of innovative British approaches to engagement with the issue, the book also considers UK, EU and UN legislation to give an international perspective, making it of direct use to discussions of 'what works' in preventing GBV.
