Exploring and Optimizing
Agricultural Landscapes -
Lothar Mueller 2021-06-14
The book informs about
agricultural landscapes, their
features, functions and
regulatory mechanisms. It

characterizes agricultural
production systems, trends of
their development, and their
impacts on the landscape.
Agricultural landscapes are
multifunctional systems,
coupled with all nexus

problems of the 21th century. This has led to serious discrepancies between agriculture and environment, and between urban and rural population. The mission, key topics and methods of research in order to understanding, monitoring and controlling processes in rural landscapes is being explained. Studies of international expert teams, many of them from Russia, demonstrate approaches towards both improving agricultural productivity and sustainability, and enhancing ecosystem services of agricultural landscapes. Scientists of different disciplines, decision makers, farmers and further informed people dealing with the evolvement of thriving rural landscapes are the primary audience of this book.

*Beyond Edutainment:
Exploring the Educational
Potential of Computer Games* -
Simon Egenfeldt-Nielsen
2011-01-25

Computer games have attracted much attention over the years, mostly attention of the less flattering kind. This has been true for computer games focused on entertainment, but also for what for years seemed a sure winner, edutainment. These years the area has gained new momentum and labels - game-based learning, serious games and educational games are just some of them. This dissertation aims to be a contribution to understanding educational use of computer games by building a framework that goes beyond edutainment. The framework laid out extends from an experiential learning approach, where concrete experiences are the starting point that can be transformed through reflection, instruction and

active experimentation. It is concluded that computer games provide rich concrete experience that can be manipulated in the game universe providing more handles for the student compared to other media formats.
