This atlas traces its turbulent history and remarkable cultural development, from the founding of Memphis around 5000 BC, through the territorial expansion and flourishing trade of the 'age of empire', to Greek domination and ultimate collapse. Political rivalries are charted through the successive dynasties, from the strife of the intermediate periods to the golden ages of prosperity and artistic glory under Akhenaten, Tutankhamun and Ramesses II. A History of Egypt - Jason Thompson 2011-03-02

In *A History of Egypt*, Jason Thompson has written the first one-volume work to encompass all 5,000 years of Egyptian history, highlighting the surprisingly strong connections between the ancient land of the Pharaohs and the modern-day Arab nation. No country's past can match Egypt's in antiquity, richness, and variety. However, it is rarely presented as a comprehensive panorama because scholars tend to divide it into distinct eras—prehistoric, pharaonic, Greco-Roman, Coptic, medieval Islamic, Ottoman, and modern—that are not often studied in relation to one another. In this daringly ambitious project, drawing on the most current scholarship as well as his own research, Thompson makes the case that few if any other countries have as many threads of continuity running through their entire historical experience. With its unprecedented scope and lively and readable style, *A History of Egypt* offers students, travelers, and general readers alike an engaging narrative of the extraordinarily long course of human history by the Nile.

The Nile - Toby Wilkinson 2014-02-13

From Herodotus's day to the present political upheavals, the steady flow of the Nile has been Egypt's heartbeat. It has shaped its geography, controlled its economy and moulded its civilisation. The same stretch of water which conveyed Pharaonic battleships, Ptolemaic grain ships, Roman troop-carriers and Victorian steamers today carries modern-day tourists past bankside settlements in which rural life - fishing, farming, flooding - continues much as it has for millennia. At this most critical juncture in the country's history, foremost Egyptologist Toby Wilkinson takes us on a journey up the Nile, north from Lake Victoria, from Cataract to Cataract, past the Aswan Dam, to the delta. The country is a palimpsest, every age has left its trace: as we pass the Nilometer on the island of Elephantine which since the days of the Pharaohs has measured the height of Nile floodwaters to predict the following season's agricultural yield and set the parameters for the entire Egyptian economy, the wonders of Giza which bear the scars of assault by nineteenth-century archaeologists and the modern-day unbridled urban expansion of Cairo - and in Egypt's earliest art (prehistoric images of fish-traps carved into cliffs) and the Arab Spring (fought on the bridges of Cairo) - the Nile is our guide to understanding the past and present of this unique, chaotic, vital, conservative yet rapidly changing land.
