Juvenile Delinquency in American Society - Wendi Johnson
2016-12-31

Juvenile Delinquency in American Society: Race, Class, and Politics examines juvenile delinquency and the juvenile justice system as they are influenced by matters of race and ethnicity. Rooted in current research,

the book explores how race and racism play a role in which youth are arrested, which are adjudicated delinquents in juvenile courts, and which end up in residential facilities, juvenile detention centers, or adult prisons. The content is organized into four primary units covering the historical context of race, theories of race and delinquency, the social context of race and delinquency, and current issues in juvenile justice. Specific topics include the impact of race on the social construction of adolescence, measures and correlates of delinquency, social process, life course, and critical theories, the school-to-prison pipeline, and corrections and punishment in the modern era. With its thoughtful exploration of a critical issue, *Juvenile Delinquency in American Society* is designed to serve as a primary text in college and university courses in criminal justice and juvenile justice. It can also be used to provide in-service training for professionals at all levels within the juvenile justice system. James Windell has worked for many years as a court clinical psychologist. Authoritative Parenting - Robert E. Larzelere 2013

Psychologist Diana Baumrind's revolutionary prototype of parenting, called authoritative parenting, combines the best of various parenting styles. In contrast to previously advocated styles involving high responsiveness and low demandingness (i.e., permissive parenting) or low responsiveness and high demandingness (i.e., authoritarian parenting), authoritative parenting involves high levels of both responsiveness and demandingness. The result is an appropriate mix of warm nurturance and firm discipline. Decades of research have supported the prototype, and we now know that authoritative parenting fosters high achievement, emotional adjustment, self-reliance, and social confidence in children and adolescents. In this book, leading scholars update our thinking about authoritative parenting and address three unresolved issues: mechanisms of the style's effectiveness, variations of effectiveness across cultures, and untangling how parents influence children from how children influence them. By integrating perspectives from developmental and clinical psychology, the book will inform prevention and intervention efforts to help parents maximise their children's potential.
