Italian Cuisine - Alberto Capatti 2003-09-17
Italy, the country with a hundred cities and a thousand bell towers, is also the country with a hundred cuisines and a thousand recipes. Its great variety of culinary practices reflects a history long dominated by regionalism and political division, and has led to the common conception of Italian food as a mosaic of regional

customs rather than a single tradition. Nonetheless, this magnificent new book demonstrates the development of a distinctive, unified culinary tradition throughout the Italian peninsula. Alberto Capatti and Massimo Montanari uncover a network of culinary customs, food lore, and cooking practices, dating back as far as the Middle Ages, that are identifiably Italian: o Italians used forks 300 years before other Europeans, possibly because they were needed to handle pasta, which is slippery and dangerously hot. o Italians invented the practice of chilling drinks and may have invented ice cream. o Italian culinary practice influenced the rest of Europe to place more emphasis on vegetables and less on meat. o Salad was a distinctive aspect of the Italian meal as early as the sixteenth century. The authors focus on culinary developments in the late medieval, Renaissance, and Baroque eras, aided by a wealth of cookbooks produced throughout the early modern period. They show how Italy's

culinary identities emerged over the course of the centuries through an exchange of information and techniques among geographical regions and social classes. Though temporally, spatially, and socially diverse, these cuisines refer to a common experience that can be described as Italian. Thematically organized around key issues in culinary history and beautifully illustrated, Italian Cuisine is a rich history of the ingredients, dishes, techniques, and social customs behind the Italian food we know and love today.

Vivaldi - Michael Talbot 2017-07-05
Since 1978, the 300th anniversary of Vivaldi's death, there has been an explosion of serious writing about his music, life and times. Much of this has taken the form of articles published in academic journals or conference proceedings, some of which are not easy to obtain. The

twenty-two articles selected by Michael Talbot for this volume form a representative selection of the best writing on Vivaldi from the last 30 years, featuring such major figures in Vivaldi research as Reinhard Strohm, Paul Everett, Gastone Vio and Federico Maria Sardelli. Aspects covered include biography, Venetian cultural history, manuscript studies, genre studies and musical analysis. The intention is to serve as a 'first port of call' for those wishing to learn more about Vivaldi or to refresh their existing knowledge. An introduction by Michael Talbot reviews the state of Vivaldi scholarship past and present and comments on the significance of the articles.

Leonardo Sinisgalli (1908--1981) was born in Lucania, Italy, and was a painter as well as a major poet. His images and metaphors arise from nature. His muses perch on an ancient oak, eating, not ambrosia, but acorns and berries. The dominant landscapes of his poetry are intimate, a world of affections, places and people, that transcend time and the particulars of culture and locality. His language is plain and sensuous; his voice, gentle. In his poetry are the wonder of a child and the ironies of a twentieth century man.
