Atlas - Tom Harper 2020-10

From the publication in 1595 of the first "atlas" by the Flemish cartographer Gerhard Mercator,

the term has become a universally adopted title for books containing accurate, uniform and evenly spread maps of all or some of the world. This is an atlas with a difference. Few of the maps in this book could reasonably be called "accurate" in the modern sense and could almost certainly not be used to plan a journey. Yet this atlas can help us to travel in a way that regular atlases do not, because by looking at old maps and getting to know their stories we can be transported back to the times in which they were made. The generous, full-color illustrations of each map in this large-format book range from the Klencke Atlas (1660) to Hokusai's map of China (1840-41), from a 1682 pirate map of Guatemala to 20th-century cartographic postcards featuring maps of Australia.

Atlas of Empires tells the story of how and why the great empires of history came into being,

operated and ultimately declined, and discusses the future of the empire in today's globalized world. Featuring 60 beautiful and detailed maps of the empires' territories at different stages of their existence and organized thematically to reflect the different driving forces behind empires throughout history (such as faith, nomadic culture, nationhood and capitalism), each section discusses the rise and fall of the empires that existed in a region: their government and society, wealth and technology, war and military force, and religious beliefs. From the earliest empires of the Sumerians and the Pharaohs to the modern empires of the USSR and the European Union, this is a story that reveals how empires are created and organized, how later empires resolve the problems of governance faced by earlier empires, and how the political and cultural legacies of ancient empires are still felt today.

He lives in a dusty heap of old maps and books in London investigating the places where exploration and mythology meet. [Atlas of the Heart](#) - Brené Brown 2021-11-30

#1 NEW YORK TIMES BESTSELLER • In her latest book, Brené Brown writes, “If we want to find the way back to ourselves and one another, we need language and the grounded confidence to both tell our stories and be stewards of the stories that we hear. This is the framework for meaningful connection.” In *Atlas of the Heart*, Brown takes us on a journey through eighty-seven of the emotions and experiences that define what it means to be human. As she maps the necessary skills and an actionable framework for meaningful connection, she gives us the language and tools to access a universe of new choices and second chances—a universe where we can share and steward the stories of our bravest and most heartbreaking moments with one another in a way that builds connection. Over the past two decades, Brown’s extensive research into the experiences that make us who we are has shaped the cultural conversation and helped define what it means to be courageous with our lives. *Atlas of the Heart*

draws on this research, as well as on Brown's singular skills as a storyteller, to show us how accurately naming an experience doesn't give the experience more power—it gives us the power of understanding, meaning, and choice. Brown shares, "I want this book to be an atlas for all of us, because I believe that, with an adventurous heart and the right maps, we can travel anywhere and never fear losing ourselves."

Geography of Claudius Ptolemy - Claudius Ptolemy 2011-03-01

Geography of Claudius Ptolemy, originally titled Geographia and written in the second century, is a depiction of the geography of the Roman Empire at the time. Though inaccurate due to Ptolemy's varying methods of measurement and use of outdated data, Geography of Claudius Ptolemy is nonetheless an excellent example of ancient geographical study and scientific method. This edition contains more than 40 maps and illustrations, reproduced based on Ptolemy's original manuscript. It remains a fascinating read for students of scientific history and Greek influence. CLAUDIUS PTOLEMY (A.D. 90- A.D. 168) was a poet, mathematician, astronomer, astrologer, and geographer who wrote in Greek, though he was a Roman citizen. He is most well-known for three scientific

treatises he wrote on astronomy, astrology, and geography, respectively titled Almagest, Apotelesmatika, and Geographia. His work influenced early Islamic and European studies, which in turn influenced much of the modern world. Ptolemy died in Alexandria as a member of Greek society.

Atlas of Untamed Places - Chris Fitch

2017-09-28

With beautiful, unique maps and evocative photography, Atlas of Untamed Places is an intrepid voyage to nature's wildest places. In a world that has increasingly become tamed by human activity, the true wild holds a growing mysticism. Rugged landscapes with unspoilt scenery invoke romantic visions of paradise, but there are also intense and powerful wildernesses that produce fear and awe alike and unexplored zones where feral wildlife roams in the shadows. Chris Fitch takes you on a journey through the world's most wild places, visiting immensely diverse floral kingdoms, remote jungles abundant with exotic birds, and both freezing

cold and scorching hot inhospitable environments. From these natural havens we travel to the extreme and the incredible: lightning inducing lakes, acidic mud baths, and man-eating tiger kingdoms. We encounter places being reclaimed by nature, such as Chernobyl, that after being left abandoned for years are returning to a natural wilderness, free from human intervention. Not forgetting those most bizarre of destinations, such as the tidal surges of the Qiantang River, the bridge to Modo Island that emerges from the sea, and the strange magnetic pull of Jabuka rock.

The Quarantine Atlas - Laura Bliss 2022-04-19

The Quarantine Atlas is a poignant and deeply human collection of more than 65 homemade maps created by people around the globe that reveal how the coronavirus pandemic has transformed our physical and emotional worlds, in ways both universal and unique. Along with eight original essays, it is a vivid celebration of wayfinding through a crisis that irrevocably

altered the way we experience our environment. In April 2020, Bloomberg CityLab journalists Laura Bliss and Jessica Lee Martin asked readers to submit homemade maps of their lives during the coronavirus pandemic. The response was illuminating and inspiring. The 400+ maps and accompanying stories received served as windows into what individuals around the world were experiencing during the crisis and its resonant social consequences. Collectively, these works showed how coronavirus has transformed the places we live, and our relationships to them. In *The Quarantine Atlas*, Bliss distills these stunning submissions and pairs them with essays by journalists and authors, as well as notes from the original mapmakers. The result is an enduring visual record of this unprecedented moment in human history. It is also a celebration of the act of mapping and the ways maps can help us connect and heal from our shared experience.
