

The Global War On Tobacco Mapping The Worlds First Public Health Treaty

When somebody should go to the book stores, search foundation by shop, shelf by shelf, it is in fact problematic. This is why we give the ebook compilations in this website. It will utterly ease you to look guide **The Global War On Tobacco Mapping The Worlds First Public Health Treaty** as you such as.

By searching the title, publisher, or authors of guide you essentially want, you can discover them rapidly. In the house, workplace, or perhaps in your method can be every best place within net connections. If you strive for to download and install the The Global War On Tobacco Mapping The Worlds First Public Health Treaty , it is totally easy then, back currently we extend the colleague to purchase and make bargains to download and install The Global War On Tobacco Mapping The Worlds First Public Health Treaty as a result simple!

Tobacco War - Stanton A. Glantz 2000-05-10
Charting the dramatic and complex history of tobacco politics in California between 1975 and

2000, this text provides a graphic demonstration of the successes and failures of both the tobacco industry and public health forces.

Sweetsmoke - David Fuller 2008-09

Compromising his position as a favored slave in 1862 Virginia, talented carpenter Cassius investigates the murder of a close friend and finds an unexpected ally in field worker Quashee, an effort that earns the enmity of his master. A first novel. 125,000 first printing.

A Little History of the World - E. H. Gombrich 2014-10-01

E. H. Gombrich's Little History of the World, though written in 1935, has become one of the treasures of historical writing since its first publication in English in 2005. The Yale edition alone has now sold over half a million copies, and the book is available worldwide in almost thirty languages. Gombrich was of course the best-known art historian of his time, and his text suggests illustrations on every page. This illustrated edition of the Little History brings together the pellucid humanity of his narrative with the images that may well have been in his mind's eye as he wrote the book. The two

hundred illustrations—most of them in full color—are not simple embellishments, though they are beautiful. They emerge from the text, enrich the author's intention, and deepen the pleasure of reading this remarkable work. For this edition the text is reset in a spacious format, flowing around illustrations that range from paintings to line drawings, emblems, motifs, and symbols. The book incorporates freshly drawn maps, a revised preface, and a new index.

Blending high-grade design, fine paper, and classic binding, this is both a sumptuous gift book and an enhanced edition of a timeless account of human history.

Women and Tobacco - Claire Chollat-Traquet 1992

Explores the many special issues that surround the impact of tobacco use on the health and well-being of women. Concentrates on the gender-specific factors that help explain why girls and women smoke and how tobacco damages their health. Covers all dimensions of the problem,

ranging from conditions in developing countries that deter female smoking to the reasons why women may find it more difficult to quit than men. The impact of the tobacco industry's efforts to recruit female smokers is also considered.

Tobacco Control Policy - Kenneth E. Warner
2006-10-13

Required reading for anyone wishing to be conversant with tobacco control policy, the book is edited by Kenneth E. Warner—dean of the School of Public Health at the University of Michigan and a leading tobacco policy researcher—who leads with an overview of the field. Warner's overview is supported by reprints of some of the field's most significant articles, written by leading scholars and practitioners.

The topics discussed are: Taxation and Price
Clean Indoor Air Laws Advertising, Ad Bans, and
Counteradvertising Possession, Use, and
Purchase (PUP) Laws and Sales to Minors
Cessation Policy Comprehensive State Laws

The Global Cigarette - Howard Cox 2000

In the 1880s, tobacco industries were revolutionised by mechanised production. This study charts how these innovations led to the formation in 1902 of the British American Tobacco Company.

Preventing Tobacco Use Among Youth and Young Adults - United States. Public Health Service. Office of the Surgeon General 2012
NOTE: NO FURTHER DISCOUNT FOR THIS PRINT PRODUCT -- OVERSTOCK SALE --
Significantly reduced list price This Surgeon General's Report details the causes and the consequences of tobacco use among youth and young adults by focusing on the social, environmental, advertising, and marketing influences that encourage youth and young adults to initiate and sustain tobacco use. This is the first time tobacco data on young adults as a discrete population have been explored in detail. The report also highlights successful strategies to prevent young people from using tobacco. This three volume set includes the following

items: A booklet containing highlights from the 2012 Surgeon General's report on tobacco use among youth and teens ages 12 through 17 and young adults ages 18 through 26. This booklet provides an overview of tobacco use within this targeted age group. The second booklet is an Executive Summary with two messages. One message from for Kathleen Sebelius, Secretary of Health and Human Services and a second message from Howard Koh, Assistant Secretary of Health and contains a brief introduction to the set and summary and conclusions for each chapter contained in the final volume. The final volume contains over 800 pages of documentation, interwoven with text and data addressing the adverse health consequences of tobacco use by children and young adults. It includes research on a variety of topics, including nicotine addiction, trends in cigarette smoking among young adults, trends in smokeless tobacco use and cigar smoking over time, genetic factors in tobacco use among

youth, and mass media influence on smoking to this age group to name a few. This third volume is rich with table data research findings to support the Surgeon General's concerns with America's use and tobacco. If you would like to find similar products, please check out our Alcoholism, Smoking, and Substance Abuse resources collection at this link: <https://bookstore.gpo.gov/catalog/health-benefits/alcoholism-smoking-substance-abuse> "

Merchants of Doubt - Naomi Oreskes
2011-05-31

Documents the troubling influence of a small group of scientists who the author contends misrepresent scientific facts to advance key political and economic agendas, revealing the interests behind their detractions on findings about acid rain, DDT, and other hazards.
Great Policy Successes - Paul 't Hart 2019
"Or, a tale about why it's amazing that governments get so little credit for their many everyday and extraordinary achievements as told

by sympathetic observers who seek to create space for a less relentlessly negative view of our pivotal public institutions."

The Cigarette Century - Allan M. Brandt
2007-03-13

An expose of the tobacco industry discusses the cultural, political, scientific, and legal aspects of cigarette smoking in modern America.

Selling Smoke - Kenneth E. Warner 1986

Ashes to Ashes - Richard Kluger 1996

A history of America's tobacco industry traces the development of the cigarette, revelations of its toxicity, and the anti-smoking campaign

Code Talker - Joseph Bruchac 2006-07-06

"Readers who choose the book for the attraction of Navajo code talking and the heat of battle will come away with more than they ever expected to find."—Booklist, starred review Throughout World War II, in the conflict fought against Japan, Navajo code talkers were a crucial part of the U.S. effort, sending messages back and forth

in an unbreakable code that used their native language. They braved some of the heaviest fighting of the war, and with their code, they saved countless American lives. Yet their story remained classified for more than twenty years. But now Joseph Bruchac brings their stories to life for young adults through the riveting fictional tale of Ned Begay, a sixteen-year-old Navajo boy who becomes a code talker. His grueling journey is eye-opening and inspiring. This deeply affecting novel honors all of those young men, like Ned, who dared to serve, and it honors the culture and language of the Navajo Indians. An ALA Best Book for Young Adults "Nonsensational and accurate, Bruchac's tale is quietly inspiring..."—School Library Journal
Mapping Crime - Keith D. Harries 1995

Global Trends 2040 - National Intelligence Council 2021-03

"The ongoing COVID-19 pandemic marks the most significant, singular global disruption since

World War II, with health, economic, political, and security implications that will ripple for years to come." -Global Trends 2040 (2021) Global Trends 2040-A More Contested World (2021), released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world: - Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers,

entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.

Bureaucrats, Planters, and Workers - Susan Deans-Smith 1992-01-01

A government monopoly provides an excellent case study of state-society relationships. This is especially true of the tobacco monopoly in colonial Mexico, whose revenues in the later half of the eighteenth century were second only to the silver tithe as the most valuable source of government income. This comprehensive study of the tobacco monopoly illuminates many of the most important themes of eighteenth-century Mexican social and economic history, from issues of economic growth and the supply of agricultural credit to rural relations, labor markets, urban protest and urban workers, class formation, work discipline, and late colonial political culture. Drawing on exhaustive research of previously unused archival sources,

Susan Deans-Smith examines a wide range of new questions. Who were the bureaucrats who managed this colonial state enterprise and what policies did they adopt to develop it? How profitable were the tobacco manufactories, and how rational was their organization? What impact did the reorganization of the tobacco trade have upon those people it affected most--the tobacco planters and tobacco workers? This research uncovers much that was not previously known about the Bourbon government's management of the tobacco monopoly and the problems and limitations it faced. Deans-Smith finds that there was as much continuity as change after the monopoly's establishment, and that the popular response was characterized by accommodation, as well as defiance and resistance. She argues that the problems experienced by the monopoly at the beginning of the nineteenth century did not originate from any simmering, entrenched opposition. Rather, an emphasis upon political stability and short-

term profits prevented any innovative reforms that might have improved the monopoly's long-term performance and productivity. With detailed quantitative data and rare material on the urban working poor of colonial Mexico, *Bureaucrats, Planters, and Workers* will be important reading for all students of social, economic, and labor history, especially of Mexico and Latin America.

Ending the Tobacco Problem - Institute of Medicine 2007-10-27

The nation has made tremendous progress in reducing tobacco use during the past 40 years. Despite extensive knowledge about successful interventions, however, approximately one-quarter of American adults still smoke. Tobacco-related illnesses and death place a huge burden on our society. *Ending the Tobacco Problem* generates a blueprint for the nation in the struggle to reduce tobacco use. The report reviews effective prevention and treatment interventions and considers a set of new tobacco

control policies for adoption by federal and state governments. Carefully constructed with two distinct parts, the book first provides background information on the history and nature of tobacco use, developing the context for the policy blueprint proposed in the second half of the report. The report documents the extraordinary growth of tobacco use during the first half of the 20th century as well as its subsequent reversal in the mid-1960s (in the wake of findings from the Surgeon General). It also reviews the addictive properties of nicotine, delving into the factors that make it so difficult for people to quit and examines recent trends in tobacco use. In addition, an overview of the development of governmental and nongovernmental tobacco control efforts is provided. After reviewing the ethical grounding of tobacco control, the second half of the book sets forth to present a blueprint for ending the tobacco problem. The book offers broad-reaching recommendations targeting federal,

state, local, nonprofit and for-profit entities. This book also identifies the benefits to society when fully implementing effective tobacco control interventions and policies.

Smoking, Culture and Economy in The Middle East - Relli Shechter 2006-04-28

"In this book, Relli Shechter examines the emergences of 'modern' markets in the complex social environment of the Middle East. Focusing on the tobacco market in Egypt, he looks at how markets interact with the society, politics and culture of the region."--BOOK JACKET.

Up in Smoke - Martha Derthick 2005

In a landmark report by the U.S. Surgeon General in 1964, the government warned its citizens of the adverse effects of smoking on their health and took a series of steps to discourage smoking. These steps stemmed from "ordinary politics" -that is, actions taken or authorized by legislatures. 1994 heralded a new era in tobacco politics: of "adversarial legalism," wherein state attorneys general sued leading

cigarette manufacturers for the harm they had done to public health. These law-suits culminated in the Master Settlement Agreement (MSA) that directed an estimated \$250 billion to state governments over the next 25 years and imposed new marketing and advertising restrictions. In her second edition, Martha Derthick introduces new evidence from 5 years of experience under the MSA to show that the states were more interested in raising revenue than in improving tobacco control, that the enrichment of wealthy tort lawyers violated the legal profession's ethics, and that the agreement, ironically, spawned the rise of small, upstart cigarette manufacturers able to undersell the major companies. In this clearly written, fast-paced case study, Derthick concludes that the tobacco lawsuits not only produced flawed public policy that flouted the American system of checks and balances, but has done little to improve or better safeguard public health.

The Ghost Map - Steven Johnson 2006

A historical chronicle of Victorian London's worst cholera outbreak traces the day-by-day efforts of Dr. John Snow, who put his own life on the line in his efforts to prove his previously dismissed contagion theory about how the epidemic was spreading. 80,000 first printing.

Kretek - Mark Hanusz 2000

Global Trends 2030 - National Intelligence Council (U.S.) 2012

This report is intended to stimulate thinking about the rapid and vast geopolitical changes characterizing the world today and possible global trajectories over the next 15 years. As with the NIC's previous Global Trends reports, we do not seek to predict the future, which would be an impossible feat, but instead provide a framework for thinking about possible futures and their implications. In-depth research, detailed modeling and a variety of analytical tools drawn from public, private and academic

sources were employed in the production of Global Trends 2030. NIC leadership engaged with experts in nearly 20 countries, from think tanks, banks, government offices and business groups, to solicit reviews of the report.

How Tobacco Smoke Causes Disease - 2010

This report considers the biological and behavioral mechanisms that may underlie the pathogenicity of tobacco smoke. Many Surgeon General's reports have considered research findings on mechanisms in assessing the biological plausibility of associations observed in epidemiologic studies. Mechanisms of disease are important because they may provide plausibility, which is one of the guideline criteria for assessing evidence on causation. This report specifically reviews the evidence on the potential mechanisms by which smoking causes diseases and considers whether a mechanism is likely to be operative in the production of human disease by tobacco smoke. This evidence is relevant to understanding how smoking causes disease, to

identifying those who may be particularly susceptible, and to assessing the potential risks of tobacco products.

Cigarettes, Inc. - Nan Enstad 2018-12-10

Traditional narratives of capitalist change often rely on the myth of the willful entrepreneur from the global North who transforms the economy and delivers modernity—for good or ill—to the rest of the world. With *Cigarettes, Inc.*, Nan Enstad upends this story, revealing the myriad cross-cultural encounters that produced corporate life before World War II. In this startling account of innovation and expansion, Enstad uncovers a corporate network rooted in Jim Crow segregation that stretched between the United States and China and beyond. *Cigarettes, Inc.* teems with a global cast—from Egyptian, American, and Chinese entrepreneurs to a multiracial set of farmers, merchants, factory workers, marketers, and even baseball players, jazz musicians, and sex workers. Through their stories, *Cigarettes, Inc.* accounts

for the cigarette's spectacular rise in popularity and in the process offers nothing less than a sweeping reinterpretation of corporate power itself.

The Global War on Tobacco - Heather Wipfli
2015-07-31

Aimed at public health professionals and students, The Global War on Tobacco is a fascinating look at how international relations is changing to respond to the modern global marketplace and protect human health.

Public Health Advocacy and Tobacco

Control - Simon Chapman 2007-09-04

Simon Chapman is one of the world's leading advocates for tobacco control, having won the coveted Luther Terry and WHO medals. His experience straddles 30 years of activism, highly original research and analysis, having run advocacy training on every continent and editing the British Medical Journal's Tobacco Control research journal. In this often witty and personal book, he lays out a program for making smoking

history. He eviscerates ineffective approaches, condemns overly enthusiastic policies which ignore important ethical principles, and provides a cookbook of strategy and tactics for denormalising smoking and the industry which promotes it. Public Health Advocacy and Tobacco Control is divided into two sections. The first contains chapters spanning such key topics as the place of advocacy in tobacco control, ethical issues, smoking cessation and prevention, harm reduction and product regulation and the denormalisation of smoking. The second section provides an invaluable A-Z of tobacco control advocacy strategy from Accuracy to Whistleblowers. 'I was fascinated, educated, and occasionally entertained by this broad and deep "manual" of how to do tobacco control in the 21st century.' Kenneth E. WarnerDean and Avedis Donabedian Distinguished University ProfessorSchool of Public Health, University of Michigan 'Simon Chapman's analysis provides the road map of

what needs to be done, how it needs to be done and that it needs to be done with a sense of urgency. It is a required reading for all those who want to make a difference in the lives of many, especially our children.' Jeffrey Wigand, MA, Ph.D., MAT, Sc.D. aka "The Insider" Related Titles Manual of Smoking Cessation By Andy McEwen, Peter Hajek, Hayden McRobbie and Robert West ISBN: 9781405133371 ISBN10: 1405133376

Global Trends 2030 - Office of the Director of National Intelligence Council 2017-03-11

This publication covers global megatrends for the next 20 years and how they will affect the United States. This is the fifth installment in the National Intelligence Council's series aimed at providing a framework for thinking about possible futures and their implications. The report is intended to stimulate strategic thinking about the rapid and vast geopolitical changes characterizing the world today and possible global trajectories during the next 15-20 years

by identifying critical trends and potential discontinuities. The authors distinguish between megatrends, those factors that will likely occur under any scenario, and game-changers, critical variables whose trajectories are far less certain. NIC 2012-001. Several innovations are included in Global Trends 2030, including: a review of the four previous Global Trends reports, input from academic and other experts around the world, coverage of disruptive technologies, and a chapter on the potential trajectories for the US role in the international system and the possible the impact on future international relations. Table of Contents: Introduction 1 Megatrends 6 Individual Empowerment 8 Poverty Reduction 8 An Expanding Global Middle Class 8 Education and the Gender Gap 10 Role of Communications Technologies 11 Improving Health 11 A MORE CONFLICTED IDEOLOGICAL LANDSCAPE 12 Diffusion of Power 15 THE RISE AND FALL OF COUNTRIES: NOT THE SAME OLD STORY 17 THE LIMITS OF HARD POWER IN THE WORLD

The Smoking Book - Lesley Stern 1999-12
The pleasures of smoking are revealed in this
literary study of the subject

Uncle Sam's Fact Book of the World War -
1918

Tobacco - Mark S. Gold 1995
Author Mark S. Gold presents the latest medical
information on nicotine and tobacco's
neurobiological, physiological, and psychological
effects. This timely monograph also discusses
the latest diagnostic and treatment programs as
well as model programs for use by practitioners

which were developed by the National Cancer
Institute and other eminent organizations. The
author also includes a comprehensive history of
tobacco use.

Trusting Doctors - Jonathan B. Imber 2008-09-14
Discusses the emphasis that Protestant
clergymen placed on the physician's vocation;
the focus that Catholic moralists put on specific
dilemmas faced in daily medical practice; and
the loss of unchallenged authority experienced
by doctors after World War II, when
practitioners became valued for their technical
competence rather than their personal integrity.
Imber shows how the clergy gradually lost their
impact in defining the physician's moral
character, and how vocal critics of medicine
contributed to a decline in patient confidence.
The author argues that as modern medicine
becomes defined by specialization, rapid medical
advance, profit-driven industry, and ever more
anxious patients, the future for a renewed trust
in doctors will be confronted by even greater

challenges.

Connecticut Valley Vernacular - James F.

O'Gorman 2002-07-31

"Little by little the gap grows larger and larger between people and their roots. Western life now plays out far from its origins in nature and history. Think of this essay as a pause in that on-rushing existence."--From the Introduction A traveler along the banks of the Connecticut River will be struck by the number of long low sheds rising from the fields as if they are an extension of the landscape. A building type shaped by necessity that grows more beautiful with use and age, these are tobacco curing sheds, mute witnesses to a slowly vanishing agricultural tradition and a thriving economic boom of the last hundred and fifty years. Surprisingly, the Connecticut River valley was once a major producer of cigar leaf tobacco. One of the plants whose cultivation was learned from the native Americans, tobacco was the main crop of many old Yankee farmers and, after them, the

Slavic newcomers. The need to season the "Indian weede" gave rise to the structure of the drying barns, a vernacular style unique to its time and place. Just as a picture can throw light on an entire world, so can these drying sheds open a window on a way of life that is fast receding. James F. O'Gorman reads through oral histories, newspaper reports, and the terse factual writing of agricultural diaries to bring to life the risks and rewards of living close to the seasons, at the mercy of rainfall and sunshine. He has collected an array of vintage and newly commissioned photos of the work of growing tobacco, from de facto portraits of anonymous laborers to images of the sheds themselves, with all their ventilating doors open, welcoming the air. In this beautifully crafted book, O'Gorman treats both the people and the sheds with the respect and admiration their precarious presence requires. An inquiry that becomes an elegy for a way of life that is part of our rural heritage, *Connecticut Valley Vernacular* is an

appreciative glance back by one of our premier architectural historians.

Smoking - Edward L. Koven 1996

Koven, an attorney, was encouraged to write this book after several of his letters to newspaper and magazine editors were published. The resulting rant argues point by point why smoking is the devil's creation from effects on health and the power of the tobacco industry to his view of smoking as a f

Smoking under the Tsars - Tricia Starks
2018-09-15

Approaching tobacco from the perspective of users, producers, and objectors, *Smoking under the Tsars* provides an unparalleled view of Russia's early adoption of smoking. Tricia Starks introduces us to the addictive, nicotine-soaked Russian version of the cigarette—the papirosa—and the sensory, medical, social, cultural, and gendered consequences of this unique style of tobacco use. Starting with the papirosa's introduction in the nineteenth century

and its foundation as a cultural and imperial construct, Starks situates the cigarette's emergence as a mass-use product of revolutionary potential. She discusses the papirosa as a moral and medical problem, tracks the ways in which it was marketed as a liberating object, and concludes that it has become a point of increasing conflict for users, reformers, and purveyors. The heavily illustrated *Smoking under the Tsars* taps into bountiful material in newspapers, industry publications, etiquette manuals, propaganda posters, popular literature, memoirs, cartoons, poetry, and advertising. Starks frames her history within the latest scholarship in imperial and early Soviet history and public health, anthropology and addiction studies. The result is an ambitious social and cultural exploration of the interaction of institutions, ideas, practice, policy, consumption, identity, and the body. Starks has reconstructed how Russian smokers experienced, understood, and presented their

habit in all its biological, psychological, social, and sensory inflections, providing the reader with incredible images and a unique application of anthropology and sensory analysis to the experience of tobacco dependency.

The Economics of the Tobacco Industry -

Paul Reynold Johnson 1984

Freedom to Smoke - Jarrett Rudy 2005

This book is a social and cultural history of smoking in Montreal from the arrival of cigarette mass production in Canada (1888) to the first studies linking the cigarette to lung cancer in 1950.

Tobacco - Nigel Gray 2010-08-19

Rev. ed. of: *Tobacco and public health: science and policy*. 2004.

Tobacco Merchant - Maurice Duke 2021-10-21

Maurice Duke and Daniel P. Jordan vividly describe the colorful life and times of one of the South's—and America's—most important businesses and provide insight into how luck,

management practices, and personalities helped the company rise to international prominence. Universal Leaf Tobacco Company, the world's largest independent leaf tobacco dealer, is one of the major buying arms for tobacco manufacturers worldwide, selecting, purchasing, processing, and storing leaf tobacco. The story opens during the aftermath of the Civil War when Southerners realized once again the worldwide potential of their native crop. The authors follow the company from its incorporation 1918 through one of the first hostile takeover attempts in American business, to its evolution in 1993 into Universal Corporation, a worldwide conglomerate with a number of products including tobacco. Based on scholarly research and over two hundred interviews with past and present Universal employees, this objective saga reveals much about American business and economic history. *The New Map* - Daniel Yergin 2020-09-15
A Wall Street Journal bestseller and a USA Today

Best Book of 2020 Named Energy Writer of the Year for *The New Map* by the American Energy Society “A master class on how the world works.” —NPR Pulitzer Prize-winning author and global energy expert, Daniel Yergin offers a revelatory new account of how energy revolutions, climate battles, and geopolitics are mapping our future. The world is being shaken by the collision of energy, climate change, and the clashing power of nations in a time of global crisis. Out of this tumult is emerging a new map of energy and geopolitics. The “shale revolution” in oil and gas has transformed the American economy, ending the “era of shortage” but introducing a turbulent new era. Almost overnight, the United States has become the world's number one energy powerhouse. Yet concern about energy's role in climate change is challenging the global economy and way of life, accelerating a second energy revolution in the search for a low-carbon future. All of this has been made starker and more urgent by the

coronavirus pandemic and the economic dark age that it has wrought. World politics is being upended, as a new cold war develops between the United States and China, and the rivalry grows more dangerous with Russia, which is pivoting east toward Beijing. Vladimir Putin and China's Xi Jinping are converging both on energy and on challenging American leadership, as China projects its power and influence in all directions. The South China Sea, claimed by China and the world's most critical trade route, could become the arena where the United States and China directly collide. The map of the Middle East, which was laid down after World War I, is being challenged by jihadists, revolutionary Iran, ethnic and religious clashes, and restive populations. But the region has also been shocked by the two recent oil price collapses--and by the very question of oil's future in the rest of this century. A master storyteller and global energy expert, Daniel Yergin takes the reader on an utterly riveting and timely

journey across the world's new map. He
illuminates the great energy and geopolitical

questions in an era of rising political turbulence
and points to the profound challenges that lie
ahead.
