Theoretical Perspectives for Direct Social Work Practice - Nick Coady, PhD 2007-10-22

Praise for the first edition "Finally, a social work practice text that makes a difference! This is the book that you have wished for but could never find. Although similar to texts that cover a range of practice theories and approaches to clinical practice, this book clearly has a social work frame of reference and a social work identity." --Gayla Rogers, Dean of the Faculty of Social Work, University of Calgary The major focus of this second edition is the same; to provide an overview of theories, models, and therapies for direct social work practice, including systems theory, attachment theory, cognitive-behavioral theory, narrative therapy, solution-focused therapy, the crisis intervention model, and many more. However, this popular textbook goes beyond a mere survey of such theories. It also provides a framework for integrating the use of each theory with central social work principles and values, as well as with the artistic elements of practice. This second edition has been fully updated and revised to include: A new chapter on Relational Theory, and newly-rewritten chapters by new authors on Cognitive-Behavioral Theory, Existential Theory, and Wraparound Services New critique of the Empirically Supported Treatment (EST) movement Updated information on the movement toward eclecticism in counseling and psychotherapy A refined conceptualization of the editors' generalist-eclectic approach *Generalist Social Work Practice with Groups* - Stephen J. Yanca 2009 Examining all aspects of group work that generalist social workers are likely to encounter, *Generalist Social Work Practice with Groups* uses a practical and applied approach to show how to effectively form and facilitate groups. It is the third in a series of generalist texts by Stephen Yanca and Louise Johnson that uses the authors' generalist model with individuals, families, groups, organizations, and communities.
