Fayûm Towns and Their Papyri - Bernard Pyne Grenfell 1900

Ancient Egyptian Medicine - John F. Nunn 2002

The skills of the ancient Egyptians in preserving bodies through mummification are well known, but their expertise in the everyday medical practices needed to treat the living is less familiar and often misinterpreted. John F. Nunn draws on his own experience as an eminent doctor of medicine and an Egyptologist to reassess the evidence. He has translated and reviewed the original Egyptian medical papyri and has reconsidered other sources of information, including skeletons, mummies, statues, tomb paintings and coffins. Illustrations highlight symptoms of similar conditions in patients ancient and modern, and the criteria by which the Egyptian doctors made their diagnoses - many still valid today - are evaluated in the light of current medical knowledge. In addition, an appendix listing all known named doctors contains previously unpublished additions from newly translated texts. Spells and incantations and the relationship of magic and religion to medical practice are also explored. Incorporating the most recent insights of modern medicine and Egyptology, the result is the most comprehensive and authoritative general book to be published on this fascinating subject for many years.

The Search for God in Ancient Egypt - Jan Assmann 2001

First English-language edition, with revisions and additions by the author. This classic work by one of the world's most distinguished Egyptologists was first published in German in 1984. The Search for God in Ancient Egypt offers a distillation of Jan Assmann's views on ancient Egyptian religion, with special emphasis on theology and piety. Deeply rooted in the texts of ancient Egypt and thoroughly informed by comparative religion, theology, anthropology, and semiotic analysis, Assmann's interpretations reveal the complexity of Egyptian thought in a new way. Assmann takes special care to distinguish between the "implicit" theology of Egyptian polytheism and the "explicit" theology that is concerned with exploring the problem of the divine. His discussion of polytheism and mythology addresses aspects of ritual, the universe, and myth; his consideration of explicit theology deals with

theodicy and the specifics of Amarna religion.

Why You Say It - Webb B. Garrison 2008-11

Why You BY WEBB B. GARRISON Illustrated by Henry R. Martin
 ABINGDON PRESS NEW YORK NASHVILLE To BRUCE and BEATRICE
 BLACKMAR GOULD Connoisseurs of Words Foreword Words and
 phrases are like persons. Some are dull and stodgy, while others are very
 good company indeed. It is from the ranks of the latter group that the
 words in this volume have been selected. Interest is the standard which
 determined whether or not a particular word or phrase should be
 included. Dedicated though it is to the general reader, it may be used
 with confidence by persons with special interests. In general, word-
 histories are developed along lines of standard scholarship. There are a
 few exceptions accounts based upon tradition. These stories, included
 because of their interest, are clearly indicated as based upon popular
 accounts. Much of the material included in this collection was originally
 published in the popular magazines which are listed on the acknowledg-
 ments page. Final research was done in the Joint University Library,
 Nashville, Tennessee. Many courtesies were extended by Dr. A. F.

 Ladies Home Journal reader first suggested that this material should be
 published in book form. Coming as it did from a reader in the Transvaal,
 Africa, the suggestion carried much weight though it was not acted upon
 for some months. Unfortunately, that reader's letter has been lost, so it is
 impossible to give due credit by name. WEBB B. GARJEUSON 7

Lords of the Two Lands - Pauline Gedge 2001

Ancient Egypt is an occupied land, a nation usurped by foreigners called
 the Setiu, better known to history as the Hyksos, who have gradually
 taken over a weakened government in a bloodless invasion through
 commerce and political power. Controlling the country for over two
 hundred years through a superior military force, the Setiu Kings plunder
 the land and slowly subvert its religion and culture. Finally one family of
 the true Egyptian blood is prepared to make a stand to claim back the
 authority which is rightfully theirs. Seqenenra Tao, Prince of Weset, can
 trace his descent back to the last rightful King of Egypt. When his
 family's lands, their people and their very lives are threatened by the
 Setiu King Apepa, Seqenenra is forced to make a choice between
 persecution and submission or a rebellion that will change the history of
 Egypt forever.

History of Embalming - Jean-Nicolas Gannal 2021-12-02

The Craftsman - Richard Sennett 2009-02-05

Why do people work hard, and take pride in what they do? This book, a

philosophically-minded enquiry into practical activity of many different
 kinds past and present, is about what happens when people try to do a
 good job. It asks us to think about the true meaning of skill in the 'skills
 society' and argues that pure competition is a poor way to achieve
 quality work. Sennett suggests, instead, that there is a craftsman in
 every human being, which can sometimes be enormously motivating and
 inspiring - and can also in other circumstances make individuals
 obsessive and frustrated. The Craftsman shows how history has drawn
 fault-lines between craftsman and artist, maker and user, technique and
 expression, practice and theory, and that individuals' pride in their work,
 as well as modern society in general, suffers from these historical
 divisions. But the past lives of crafts and craftsmen show us ways of
 working (using tools, acquiring skills, thinking about materials) which
 provide rewarding alternative ways for people to utilise their talents. We
 need to recognise this if motivations are to be understood and lives made
 as fulfilling as possible.

The Value of Ecocriticism - Timothy Clark 2019-02-07

The Value of Ecocriticism offers a brief, incisive overview of the fast-changing field of environmental literary criticism in a bewildering age of global environmental threat. The intellectual, moral and political complexity of environmental issues, especially at the global scale (the so-called 'Anthropocene') forms a new challenge of inventiveness for both literature and criticism. Ecocriticism has been going through a period of radical change and has become a diverse and huge field on the exciting but unstable boundary between the humanities and the sciences, with a mix of cultural, political, scientific and activist strands. Its mantra is that the environmental crisis demands a reconsideration of society's basic values, constitution and purposes, and that art and literature can be vital in that work. As a leading figure in this field, Timothy Clark surveys recent developments in ecocriticism lucidly, but also sometimes critically. This book examines ecopoetics, material ecocriticism, and the ideas of world literature as well as contentious claims that we are living in a new geological epoch.

The House of Life - ALAN H. GARDINER 2020-04-26

House of Life: an institution little known in culture current of those interested in ancient Egypt. Yet, as we will see, was a foundation of extreme importance for the elaboration of various facets of the religious and magical culture of Egypt. According to existing documents, the House of Life already exists in the Old Kingdom in the 6th dynasty and lasts until the end of the Pharaonic civilization. The available sources are not very talkative about what was done in this laboratory and this is also understandable given its nature. The activities of the House of Life were varied. Theurgy was about more secret and refined rituals that had to make the processes of the macrocosm functioned smoothly and extended their beneficial influence in society. The communion of the sovereign with the solar entities, as an intermediary of them, was the subject of rites and appropriate ceremonies. The defense of the King from enemies follows the same technique used against Ra and the Evil Apophis: in the "Book to Bring Down Apophis" are described by thread and by sign the ways of making images of the Evil One and the related deprecatory formulas. The staff of the House of Life also practiced natural magic intended to assist people in the various vicissitudes of life. Yes presumes that the consecration of amulets and magical texts also condoms took place in this place.

Pride and Honour will transport the listener right into the heart of this legend-shrouded part of the Early Middle Ages. Casanova's Guide to Medicine - Lisetta Lovett 2021-06-30

Forget the stereotype! Giacomo Casanova's (1725-1798) reputation as libertine has sadly eclipsed his talents as scholar, linguist, prolific writer and manqué doctor. Fortunately for us, he wrote his memoirs at the end of his life on the advice of his doctor to control his propensity to depression. Although these often have been harvested for information on political, cultural and social aspects of his time, the insights they give about medical practice and the lived experiences of illness have been largely neglected. This book addresses this deficiency through exploring in detail what Casanova wrote on a variety of conditions that include venereal disease and female complaints, duelling injuries, suicide, skin complaints and stroke and even piles. These descriptions provide alternately grim and amusing insights about public health measures, the doctor-patient relationship, medical etiquette and the dominant medical theories of the era. To help the reader understand the historical significance of the medical subjects covered, the author integrates throughout the book an extensive historical context drawn from contemporary sources of information and current history of medicine literature

Egyptian Magic - Sir Ernest Alfred Thompson Wallis Budge 1901

Egyptian magic dates from the time when the predynastic and prehistoric dwellers in Egypt believed that the earth, and the underworld, and the air, and the sky were peopled with countless beings, visible and invisible, which were held to be friendly or unfriendly to man according as the operations of nature, which they were supposed to direct, were favourable or unfavourable to him. In nature and attributes these beings were thought by primitive man to closely resemble himself and to possess all human passions, and emotions, and weaknesses, and defects; and the chief object of magic was to give man the pre-eminence over such beings. The favour of the beings who were placable and friendly to man might be obtained by means of gifts and offerings, but the cessation of hostilities on the part of those that were implacable and unfriendly could only be obtained by wheedling, and cajolery, and flattery, or by making use of an amulet, or secret name, or magical formula, or figure, or picture which had the effect of bringing to the aid of the mortal who possessed it the power of a being that was mightier than the foe who threatened to do evil to him. The magic of most early nations aimed at causing the transference of power from a supernatural being to man, whereby he was to be enabled to obtain superhuman results and to become for a time as mighty as the original possessor of the power; but the object of Egyptian magic was to endow man with the means of compelling both friendly and hostile powers, nay, at a later time, even God Himself, to do what he wished, whether they were willing or not. The belief in magic, the word being used in its best sense, is older in Egypt than the belief in God, and it is certain that a very large number of the Egyptian religious ceremonies, which were performed in later times as an integral part of a highly spiritual worship, had their origin in superstitious customs which date from a period when God, under any name or in any form, was unconceived in the minds of the Egyptians. Indeed it is probable that even the use of the sign which represents an axe, and which stands the hieroglyphic character both for God and "god," indicates that this weapon and tool was employed in the performance of some ceremony connected with religious magic in prehistoric, or at any rate in predynastic times, when it in some mysterious way symbolized the presence of a supreme Power. But be this as it may, it is quite certain that magic and religion developed and flourished side by side in Egypt throughout all periods of her history, and that any investigation which we may make of the one necessarily includes an examination of the other.
