As the follow-up to the Bram Stoker Award winning collection Soft Apocalypses, it contains plenty of darkly imaginative tales. Many of these stories, including the title piece, are heavily influenced by the work of H.P. Lovecraft and The King in Yellow mythos. They whisper madly among each other creating weird echoes. Like the black stars of theoretical astronomy they are dense entities born from polarization so strong that instead of collapsing into nothingness, a black hole, they instead form dark constellations burning dimly with spectral light.

An Inheritance of Stone - Leslie J. Anderson 2013-09-27 From the introduction: Some poems in this book gallop and kick. Some swerve elegantly like an escape pod caught in a gravity well. Other roll quiet as a child's blanket. The words in these pages won't seem the same each time you read them. They will be just what you were looking for, but nothing that you expected. - Lucy A. Snyder, author of the Bram Stoker Award-winning poetry collection Chimeric Machines Praise for An Inheritance of Stone The poems in An Inheritance of Stone ponder what it is to be human -- to be consciously conscious -- from diversely entertaining angles. Lava lamp chronicles, deluded horses, jaded rocketship captains, and a woman who turns into a diamond figure in this landscape of cheerful disillusionment. Leslie Anderson can be simultaneously candid and canny, moving and funny; her narratives take astonishing turns; her restless curiosity leads her to explore frontiers uncommonly broached in poetry. This book introduces a surprising and engaging new voice. - J Allyn Rosser, author of The New Criterion Poetry Prize-winning poetry collection Foiled Again Merging her fascination with images of the space age and cowboy/equine lore, Leslie Anderson gives a quirky personal vision of the contemporary world where "America is a boy with long hair/ Who holds cigarettes like

a burden" and who tells us we can be anything we desire "but first you have to be sad for 200 years." - Diane Wakoski, author of the William Carlos Williams Award-winning book Emerald Ice. Many of Leslie Anderson's poems dramatize her discoveries of the frightening spaces between individuals who might be supposed to understand one another intimately. In "Locks" and "My High School Boyfriend is Gay" there are secrets within romance that threaten the agreed-upon definitions of the relationships; and within the family, too, there are silences between daughter and parents -- in "Portrait" and "An Inheritance of Stone" -- that reveal the limits of love even when it is strong. Leslie Anderson in such poems deftly and touchingly evokes the wary alertness of a young woman trying to figure out what in the world can be relied upon. - Mark Halliday, past winner of the Rome Fellowship in Literature from the American Academy of Arts and Letters, a Lila Wallace/Reader's Digest

Evolutionary Psychopathology - Marco Del Giudice 2018-07-06 Mental disorders arise from neural and psychological mechanisms that have been built and shaped by natural selection across our evolutionary history. Looking at psychopathology through the lens of evolution is the only way to understand the deeper nature of mental disorders and turn a mass of behavioral, genetic, and neurobiological findings into a coherent, theoretically grounded discipline. The rise of evolutionary psychopathology is part of an exciting scientific movement in psychology and medicine -- a movement that is fundamentally transforming the way we think about health and disease. Evolutionary Psychopathology takes steps toward a unified approach to psychopathology, using the concepts of life history theory -- a biological account of how individual differences in development, physiology and behavior arise from tradeoffs in survival and reproduction -- to build an integrative framework for mental disorders. This book reviews existing evolutionary models of specific conditions and connects them in a broader perspective, with the goal of explaining the large-scale patterns of risk and comorbidity that characterize psychopathology. Using the life history framework allows for a seamless integration of mental disorders with normative individual differences in personality and cognition, and offers new conceptual tools for the analysis of developmental, genetic, and neurobiological data. The concepts presented in Evolutionary Psychopathology are used to derive a new taxonomy of mental disorders, the Fast-Slow-Defense (FSD) model. The FSD model is the first classification system explicitly based on evolutionary concepts, a biologically

grounded alternative to transdiagnostic models. The book reviews a wide range of common mental disorders, discusses their classification in the FSD model, and identifies functional subtypes within existing diagnostic categories.

Blood Sisters - Paula Guran 2015-05-05 A tantalizing selection of stories from some of the best female authors who've helped define the modern vampire. Bram Stoker was hardly the first author—male or female—to fictionalize the folkloric vampire, but he defined the modern iconic vampire when Dracula appeared in 1897. Since then, many have reinterpreted the ever-versatile vampire over and over again—and female writers have played vital roles in proving that the vampire, as well as our perpetual fascination with it, is truly immortal. These authors have devised some of the most fascinating, popular, and entertaining of our many vampiric variations: suavely sensual . . . fascinating but fatal . . . sexy and smart . . . undead but prone to detection . . . tormented or terrifying . . . amusing or amoral . . . doomed or deadly . . . badass and beautiful . . . cutting-edge or classic . . . Blood Sisters collects a wide range of fantastical stories from New York Times bestsellers Holly Black, Nancy Holder, Catherynne M. Valente, and Carrie Vaughn, and critically acclaimed writers Chelsea Quinn Yarbro and Tanith Lee, all of whom have left their indelible and unique stamps on the vampire genre. Whether they are undeniably heroes and heroines or bloodthirsty monsters (or something in between), the undead are a lively lot. This anthology offers some of the best short fiction ever written by the "blood sisters" who know them best: stories you can really sink your

teeth into.

Chimeric Machines - Lucy A. Snyder 2009 This collection from rising author Lucy A. Snyder offers three dozen poems to delight readers who enjoy sly wordplay and subtle allusion, high intelligence and fierce heart. "Snyder's work is complex yet grounded. You can read it on several levels and it'll work on each and every one. It's lyrical but rooted in authenticity and validity. There's truth here, and tackling the truth is the highest calling of any poet. "She's been through the trenches; she knows the way the world comes down. You can feel it in the work. You're not just looking at words in a book, you're regarding a life that's been opened up and splashed down on the page. This lady is not only courageous, she's fearless. We need more like her to give us that grand plucking of the guts." - Tom Piccirilli, author of The Midnight Road and Waiting My Turn to Go Under the Knife, from his introduction "There is nothing illusory or mechanical about these poems. They take us on a marvelously eclectic journey, with a cast that includes a black hole voicing its thoughts and a dead man coming 'Home For the Holidays.' Read and be dazzled." - Christopher Conlon, author of Mary Falls: Requiem for Mrs. Surratt and Midnight on Mourn Street Winner of the 2009 Bram Stoker Award for Superior Achievement in Poetry.
