**A Dangerously Curious Eye** - Barry Shapiro  
2010

Far from the bridges and cable cars, hidden away behind the famous hills, there is another San Francisco Bay Area that most people never see. San Francisco's Hunter's Point and Fillmore District, West Oakland and Richmond's Iron Triangle - in the 1970s these places on the edges of this great American metropolis offered Barry Shapiro an alternate reality where he pointed his lens. Although Barry made his reputation as a professional photographer with the 1972 publication of *Handmade Houses: The Woodbutcher's Art*, his day job as a teacher of remedial reading to adults gave him an entrée into a world that white America only saw in the blaxploitation films of the day like "Shaft" and "Superfly." His curious eye brought him to many dangerous places, but with the trust he earned, he was able to not only hang out in this unique subculture, but be allowed to photograph their very intimate and sometimes dark moments. In these photos we see glimpses of tenderness that can explode into violence, tension that dissolves into laughter, kids showing off for the camera, and tough motorcycle gangs chilled out after a night of hard partying. What instantly captures the viewer's attention is that Barry, with the force of his energetic personality, established a trusting relationship with each of his subjects, whether that relationship lasted for years or only a few seconds. When Barry wasn't hanging out in these fringe neighborhoods, he was prowling the streets of the Bay Area with his stealth Leica shooting poignant black-and-white moments of street life through the windows of his VW bus. These images record an incredible slice of everyday urban life without any hint of his even being there. Barry captured what Henri Cartier-Bresson called "the decisive moment" over and over with a natural ability that only the best

photographers have. Always a maverick, rarely inclined to shoot to spec and unwilling to compromise or cater to photographic fashion, Barry shot his black-and-white photographs with no thoughts of commercialism. Although his career as a photographer spanned more than forty years, and he spent the last sixteen years of his life as a high-school teacher and principal, he never stopped shooting. With a foreword by famed San Francisco rock photographer Jim Marshall and an introduction by best-selling novelist Mark Joseph, two of Barry's closest friends, *A Dangerously Curious Eye* will show you a very different side of the San Francisco Bay Area.

*Create and Be Recognized* - John F. Turner  
2004-09-09

Create and Be Recognized is the first survey of a compelling, always surprising art form -- outsider photography. Presented here is the work of seventeen largely self-taught artists who have used photography or photographic elements in their creations, including such luminaries as Adolf Wolfli, Howard Finster, and Henry Darger, as well as discoveries from little known, equally dramatic artists. As with most outsider art, the work here is fuelled by singular passions, marginalized mindsets, and extreme circumstances, falling outside mainstream picture-making. Employing collage (affixing photos or reproductions to a background), photocollage (photographs cut and pasted together to form a new whole), and tableaux (works based on manipulation and staging), the artists here present work that is, by turns, lyrical and frightening, and always fascinating. Published to coincide with a major touring exhibition of the same name originating at San Francisco's Yerba Buena Center for the Arts, Create and Be Recognized documents an emerging and important facet of contemporary photography.

[The Photographer's Exposure Field Guide](#) -  
Michael Freeman 2011-03-07

Choosing the exposure for a photograph is both alarmingly simple and infinitely complex; in fact, it's one of photography's most absorbing paradoxes. Exposure is at the very heart of photography. It has always been a subject of fascination to aspiring amateurs and professional photographers alike. Developments in digital technology have transformed the ways in which exposures can be manipulated, and this in turn has forced photographers to think about what they can achieve by understanding the variables of aperture, ISO, and time. In this book Michael Freeman takes you through this difficult and fast-moving area using unique workflow illustrations, histograms, and clear, visual examples to explore the subtleties of the subject and enable you to shoot with confidence. Divided into six sections ? Fast-track & Foolproof, Technical, The Twelve, Style, Post-processing, and Reference ? the book will provide you with the necessary instruction to get perfect exposure anywhere and with any subject matter.

*Portraiture Unplugged* - Carl Caylor 2015-06-22  
Good lighting is everything in portraiture. The right light sculpts our subjects, smooths the skin, evens skin tones, and helps create the feeling of a third dimension in a two-dimensional image. The gold standard of lighting has, for the better part of a century, been produced by artificial lights (hot lights or strobes) in the studio. These sources allow for precise lighting effects on demand. However, artificial light cannot match the beauty or ambience that gorgeous natural light creates—and studio lighting can break the bank. In part 1 of this book, Carl Caylor introduces readers to a failproof method for understanding, shaping, and harnessing natural light for dazzling results

that rival studio-lighting looks. Using your powers of observation, an understanding of the physics of light, and employing a couple of inexpensive tools (reflector panels to bounce light and a gobo to block light), Caylor shows you how to make the most of the sunlight for indoor and outdoor location shoots—and even studio work. You'll learn how to tweak the direction of light and manipulate lighting angles to re-create classic portrait lighting styles—short lighting, broad lighting, Rembrandt lighting, and more—that flatter and contour your subjects' facial structures to make them look their very best. In part 2 of the book, Carl provides an in-depth analysis into the techniques he used to create 60 beautiful natural-light portraits in myriad locations and circumstances, producing a wide range of portrait looks. Readers will learn how to integrate other elements that are important to building an effective portrait—including prop selection, wardrobe, composition, expression, posing, and even planning for a top-notch, contrasty black & white shot. The text in this book, along with inspirational images, will coax many readers to enjoy a “back to basics” approach that will allow them to produce technically exquisite and profoundly artful, flattering portraits that will sell themselves to clients every time.

Tim Kelly is a Master Photographer whose portrait work has inspired people in the portrait photography industry since the 1980s. His work has a classic, polished quality that beautifully depicts the personality of each subject, with no gimmicks. His style is reliant on careful camera technique, flawless lighting, and an uncanny ability to coax the most flattering-possible pose from every man, woman, and child who steps in front of his camera. In this book, Tim Kelly presents 60 of his most impressive and diverse black & white portrait images of men, women,

children, and groups. For each of the sixty images, readers will get a deconstructive look at every aspect of building the image, from the ground up. Kelly will discuss the creative concept behind his images and share the gear, exposure, lighting, and posing strategies he learned to create gorgeous black & white portraiture with an exquisite tonal range, beautiful, form-flattering highlights and shadows, and both refined and comfortable poses that invite the viewer to study the image frame. This book contains all of the information you need to create standout black & white portraiture—from conceptualization, to posing and lighting, to postproduction and printing options.
