Sisters of the Ice - R. Bruce Macdonald 2021-04-24

This book is a biography of two British Columbian ships that performed legendary service in the Canadian Arctic. The St. Roch, now on permanent display at the Vancouver Maritime Museum, is the better known of the two, although North Star of Herschel Island is still sailing and still adding to her legend. Historian Bruce Macdonald—who, along with his wife, owns North Star of Herschel Island—has meticulously researched the origins and service logs of each ship and created a book that will enthrall old Arctic hands, maritime history buffs and anyone who appreciates well-written Canadian history. Under the command of Captain Henry Larsen, the sturdy RCMP vessel St. Roch spent years showing the Canadian flag in the Arctic, performing many duties including delivering medical supplies and taking census information in addition to enforcing the law in the North. St. Roch is world renowned for achieving many firsts, including being the first vessel through the Northwest Passage west to east, the first vessel to navigate the passage in both directions and the first vessel to circumnavigate North America. Inspired by St. Roch, renowned trapper and Inuit leader Fred Carpenter designed the elegant North Star, the ultimate ice vessel used to transport furs and people to and from remote Banks Island. Together, the two iconic ships have helped to solidify Canadian sovereignty in the Arctic and have become symbols of unity among Northern communities. In *Sisters of the Ice*, Macdonald documents in vivid detail the adventurous histories of these two vessels, as well as the history of the Northern communities in which they gained renown. Detailing daring escapes from dangerous ice conditions to thrilling sea voyages to raucous whaling towns, Macdonald reveals the perilous and often lawless climate in which these vessels operated and the ties of Canadian identity that they helped forge.

Island Life - Jay Fleming 2021-10-15

Photographer Jay Fleming turned his attention to Smith and Tangier Islands - the Chesapeake Bay's last inhabited 'water-locked' islands. Fleming has made countless trips to the islands to document the unique way of life and environment that have been shaped by isolation and the waters of the Chesapeake. This collection of photographs will fill the pages of Fleming's second book, *Island Life*. This body work comes at an important time for the islands, as their populations continue to decline and the unrelenting forces of the bay threaten the working waterfronts that have sustained the communities for centuries. Fleming hopes that his photography will immerse readers in the *Island Life* and capture a crucial moment in time for the Chesapeake's most unique communities.

Farewell Mr Puffin - Paul Heiney 2021-07-08

'It would be hard to imagine a more thoughtful, intelligent and companionable person to go to sea with than Paul Heiney.' Bill Bryson 'High comedy on the high seas. Informative and warm and freezing. It's quite a combination.' Griff Rhys Jones The puffin is the joker amongst the seabirds of the north Atlantic, but what is happening to this much-loved bird is far from a laughing matter. This is the conclusion of writer and broadcaster, Paul Heiney, who set sail from the east coast of England bound for Iceland, propelled by a desire to breathe the cool, clear air of the high latitudes, and to follow in the wake of generations of sailors who have made this often treacherous journey since the 13th century. In almost every harbour he tripped over maritime history and anecdote, and came face to face with his own past as he sailed north along his childhood coastline of east Yorkshire towards the Arctic Circle. But there was one major thing missing from this voyage - the sight of puffins. They are remarkable birds, uplifting as a ray of sunshine after a storm. To see them and share their waters was also part of Heiney's ambition. Imagine

then his disappointment when, first, no puffins appeared off the Farne Islands, then none to be seen on puffin hotspots like Orkney. When he failed to see puffins on Iceland, it was the last straw, and he started to become seriously concerned. Heiney senses that a new chapter is about to be written, and it is one in which we may have to say farewell to the puffin forever. This book is rich in travel and sailing narrative, natural and social history, and with a strong undercurrent of good humour. It provides not only an insight into the private life of the puffin, but an honest portrait of human life on the ocean waves, as well as a reflection on what we might lose if the puffin disappears from our icy northern waters.

Yacht Register - 1883

River Queens - Alexander Watson 2019-10

The river, "€,"any river,"€,"is another planet, with its own language, rules, and culture. River Queens is a story of the unlikeliest of fellows (and a dog) coming to the river,"€,"and what happens to them once they arrive. At first glance, it seems to be a how-to manual for any adventuresome (but perhaps foolhardy) type who's ever thought of restoring a wooden yacht and sailing it halfway across the country. Second glance, however, shows that it's a classic travel narrative in which two intrepid (but perhaps foolhardy) explorers head out to tour what is usually called "a distant, alien world."

Around the World in a Dugout Canoe - John M. MacFarlane 2019-09-28

Anticipating fame and wealth, Captain John Voss set out from Victoria, BC, in 1901, seeking to claim the world record for the smallest vessel ever to circumnavigate the globe. For the journey, he procured an authentic dugout cedar canoe from an Indigenous village on the east coast of Vancouver Island. For three years Voss and the Tilikum, aided by a rotating cast of characters, visited Australia, New Zealand, South Africa, Brazil and finally England, weathering heavy gales at sea and attracting large crowds of spectators on shore. The austere on-board conditions and simple navigational equipment Voss used throughout the voyage are a testimony to his skill and to the solid construction of the

Nuu-Chah-Nulth vessel. Both Voss and his original mate, newspaperman N.K. Luxton, later wrote about their journey in accounts compromised by poor memories, brazen egos and outright lies. Stories of murder, cannibalism and high-seas terror have been repeated elsewhere without any regard to the truth. Now, over a century later, a full and fair account of the voyage—and the magnitude of Voss's accomplishment—is at last fully detailed. In this groundbreaking work, marine historians John MacFarlane and Lynn Salmon sift fact from fiction, critically examining the claims of Voss's and Luxton's manuscripts against research from libraries, archives, museums and primary sources around the world. Including unpublished photographs, letters and ephemera from the voyage, *Around the World in a Dugout Canoe* tells the real story of a little-understood character and his cedar canoe. It is an enduring story of courage, adventure, sheer luck and at times tragedy.
