Rules of Play - Katie Salen Tekinbas 2003-09-25

An impassioned look at games and game design that offers the most ambitious framework for understanding them to date. As pop culture, games are as important as film or television—but game design has yet to develop a theoretical framework or critical vocabulary. In *Rules of Play* Katie Salen and Eric Zimmerman present a much-needed primer for this emerging field. They offer a unified model for looking at all kinds of games, from board games and sports to computer and video games. As active participants in game culture, the authors have written *Rules of Play* as a catalyst for innovation, filled with new concepts, strategies, and methodologies for creating and understanding games. Building an aesthetics of interactive systems, Salen and Zimmerman define core concepts like "play," "design," and "interactivity." They look at games through a series of eighteen "game design schemas," or conceptual frameworks, including games as systems of emergence and information, as contexts for social play, as a storytelling medium, and as sites of cultural resistance. Written for game scholars, game developers, and interactive designers, *Rules of Play* is a textbook, reference book, and theoretical guide. It is the first comprehensive attempt to establish a solid theoretical framework for the emerging discipline of game design.

Toward a New Interior - Lois Weinthal 2011-10-19

Interior design, as a relatively young discipline within the academic world of design, has historically been interpreted as an extension of other fine arts. Narratives exist, but they all too often treat interior design as a function of architecture or display rather than experience. An independent interior design theory is virtually nonexistent. Professor Lois Weinthal envisions a future where interior design is treated with parity to architecture and industrial design, a future with a new interior. A reader for architects and interior designers, Weinthal has carefully curated a collection of forty-eight essays that will form the foundation of interior design theory and shape future interior space. Her introductory essays illuminate each source, prefacing and directing discussion of the material as it relates to interior design theory. Alluding to Le Corbusier's classic text, she has organized this material into a framework that inspires conversation, marking a break with the past and forming a new vocabulary for the discourse. Contributions to the book's eight sections include essays by David Batchelor, Aaron Betsky, Petra Blaisse, Andrew Blauvelt, Beatriz Colomina, Le Corbusier, Robin Evans, Adolf Loos, Ellen Lupton, Charlotte Perkins Gilman, Michel Serres, Henry Urbach, Wim Wenders, and Mark Wigley.
