The Master of Disguise - Antonio J. Mendez 2009-10-13

From the author of *Argo* comes an unforgettable behind-the-scenes story of espionage in action. In the first ever memoir by a top-level operative to be authorized by the CIA, Antonio J. Mendez reveals the cunning tricks and insights that helped save hundreds from deadly situations. Adept at creating new identities for anyone, anywhere, Mendez was involved in operations all over the world, from "Wild West" adventures in East Asia to Cold War intrigue in Moscow. In 1980, he orchestrated the escape of six Americans from a hostage situation in revolutionary Tehran, Iran. This extraordinary operation inspired the movie *Argo*, directed by and starring Ben Affleck. *The Master of Disguise* gives us a privileged look at what really happens at the highest levels of international espionage: in the field, undercover, and behind closed doors.

Olympic Marketing - Alain Ferrand 2012-07-26

The Olympic Games have become the definitive sports event, with an unparalleled global reach and a remarkably diverse constituency of stakeholders, from the IOC and International Federations to athletes, sponsors and fans. It has been estimated, for example, that 3.6 billion people (about half of the world population) watched at least one minute of the Beijing Games in 2008 on television. The driving force behind the rise of the modern Olympics has been the Olympic marketing programme, which has acted as a catalyst for cooperation between stakeholders and driven the promotion, financial security and stability of the Olympic movement. This book is the first to explain the principles of Olympic marketing and to demonstrate how they can be applied successfully in all other areas of sports marketing and management. The book outlines a strategic and operational framework based on three types of co-productive relationships (market, network and informal) and explains how this framework can guide professional marketing practice. Containing case studies, summaries, insight boxes and examples of best practice in every chapter, this book is important reading for all students and practitioners working in sports marketing, sports management or Olympic studies.

Counting the Cost of COVID-19 on the Global Tourism Industry - Godwell Nhamo 2020-09-19

This book profiles preliminary findings on the impact of COVID-19 on the travel, tourism and hospitality sector. Starting with a narrative relating COVID-19 to the global development agendas, the book proceeds with a focus on global tourism value chains and linkages between COVID-19 and the Sustainable Development Goals (SDGs). Other perspectives addressed in separate chapters include impacts of COVID-19 on various

industries within the global tourism value chain including aviation, airports, cruise ships, car rentals as well as ride and share car services, hotels, restaurants, sporting, pilgrimage and religious tourism, gaming and entertainment, and the stock market. The book also includes chapters on corporate, philanthropic and public donations, as well as tourism economic stimulus packages. It then concludes with a chapter focusing on building back a better tourism sector post-COVID-19 that strongly draws from the Sendai Framework on Disaster Risk Reduction (2015-2030) and the disaster cycle. To this end, this book is suitable as a read for several professionals in disciplines such as tourism and hospitality studies, economics, sustainable development, development studies, environmental sciences, geography, politics, planning and public health.

World Development Report 2020 - World Bank 2019-11-19

Global value chains (GVCs) powered the surge of international trade after 1990 and now account for almost half of all trade. This shift enabled an unprecedented economic convergence: poor countries grew rapidly and began to catch up with richer countries. Since the 2008 global financial crisis, however, the growth of trade has been sluggish and the expansion of GVCs has stalled. Meanwhile, serious threats have emerged to the model of trade-led growth. New technologies could draw production closer to the consumer and reduce the demand for labor. And trade conflicts among large countries could lead to a retrenchment or a segmentation of GVCs. *World Development Report 2020: Trading for Development in the Age of Global Value Chains* examines whether there is still a path to development through GVCs and trade. It concludes that technological change is, at this stage, more a boon than a curse. GVCs can continue to boost growth, create better jobs, and reduce poverty provided that developing countries implement deeper reforms to promote GVC participation; industrial countries pursue open, predictable policies; and all countries revive multilateral cooperation.

Lancia 037 - Peter Collins 2008-03-15

The world of rallying was changed forever on January 1st 1982 with the introduction of the new Group B rules. These virtually gave manufacturers carte blanche to design the fastest car they could for world rally special stages, so long as they built at least 200 identical examples. This is the story of Lancia's mid-engined and supercharged rally. The reader is taken from initial thinking about the car and conception, through development to the full history of its rallying lifetime with the help of the car designer and chief engineer, Ing Sergio Limone. Featuring many of Limone's own photographs during development, and interviews with team members. Illustrated with 250 stunning and rare rally action photos.

The Collaborative Economy in Action: European Perspectives - Andrzej Klimczuk 2021-10-04

The book titled *The Collaborative Economy in Action: European Perspectives* is one of the important outcomes of the COST Action CA16121, *From Sharing to Caring: Examining the Socio-Technical Aspects of the Collaborative Economy* (short name: *Sharing and Caring*; sharingandcaring.eu) that was active between March 2017 and September 2021. The Action was funded by the European Cooperation in Science and Technology - COST (www.cost.eu/actions/CA16121). The main objective of the COST Action *Sharing and Caring* is the development of a European network of researchers and practitioners interested in investigating the collaborative economy models, platforms, and their socio-technological implications. The network involves scholars, practitioners, communities, and policymakers. The COST Action *Sharing and Caring* helped to connect research initiatives across Europe and enabled scientists to develop their ideas by collaborating with peers. This collaboration opportunity represented a boost for the participants' research, careers, and innovation potential. The main aim of this book is to provide a comprehensive overview of the collaborative economy (CE) in European countries with a variety of its aspects for a deeper understanding of the phenomenon as a whole. For this reason, in July 2017, an open call for country reports was distributed among the members of the COST Action *Sharing and Caring*. Representatives of the member countries were invited to produce short country reports covering: definition(s) of the CE; types and models of the CE; key stakeholders involved; as well as legislation and technological tools relevant for the CE. Submitted reports varied in length and regarding the level of detail included, in accordance with how much information was available in each respective country at the time of writing. Editors of the book have compiled these early reports into a summary report, which was intended as a first step in mapping the state of the CE in Europe. The Member Countries Report on the Collaborative Economy, edited by Gaia Mosconi, Agnieszka Lukaszewicz, and Gabriela Avram (2018) that was published on the *Sharing and Caring* website, represented its first synergetic outcome and provided an overview of the CE phenomenon as interpreted and manifested in each of the countries part of the network. Additionally, Sergio Nassare-Aznar, Kosjenka Dumančić, and Giulia Priora compiled a Preliminary Legal Analysis of Country Reports on Cases of Collaborative Economy (2018). In 2018, after undertaking an analysis of the previous reports' strengths and weaknesses, the book editors issued a call for an updated version of these country reports. Prof. Ann Light advised the editorial team, proposing a new format for country reports and 4000 words limit. The template included: Introduction, Definition, Key Questions, Examples, Illustration, Context, Developments, Issues, Other Major Players, and Relevant Literature. The new template was approved by the Management Committee in October 2018. The task force that had supported the production of the first series of country reports (Dimitar Trajanov, Maria del Mar Alonso, Bálint Balázs, Kosjenka Dumančić, and Gabriela Avram) acted as mentors for the team of authors in each country. The final reports arrived at the end of 2018, bringing the total number of submissions to 30 (twenty-nine European countries plus Georgia). A call for book editors was issued, and a new editorial team was formed by volunteers from the participants of the COST Action: Andrzej Klimczuk, Vida Česnuityte, Cristina Miguel, Santa Mijalche, Gabriela Avram, Bori Simonovits, Bálint Balázs, Kostas Stefanidis, and Rafael Laurenti. The editorial team organized the double-blind reviews of reports and communicated to the authors the

requirements for improving their texts. After reviews, the authors submitted updated versions of their country reports providing up-to-date interdisciplinary analysis on the state of the CE in 2019, when the reports were collected. During the final phase, the chapters were again reviewed by the lead editors together with all editorial team members. At the time, the intention was to update these reports again just before the end of the COST Action *Sharing and Caring* in 2021 and to produce a third edition. However, the COVID-19 pandemic changed these plans. Thus, this final volume was created by 82 scholars-editors and contributors-and consists of reports on 27 countries participating in the COST Action.

New and Old Routes of Portuguese Emigration - Cláudia Pereira 2019-01-01

This open access book offers a comparative overview on Portuguese emigration in Europe and outside the EU in times of recession. It looks at Portuguese emigrants who, after the crisis of 2008, moved both intra-EU, such as UK, France, Switzerland, Germany and Spain, but also into countries with historical links, such as the USA and Canada, and to Portuguese speaking countries such as Brazil, Angola and Mozambique, as well as the processes of return. In addition to the dynamics of movement, the book provides an in-depth analysis of the heterogeneity of this emigration. It deepens the multifaceted identities concerning social and professional pathways among highly skilled and less skilled emigrants. The labour market continues to be the main regulatory force of Portuguese emigration, which helps to explain the outflow and the processes of settlement and return. Nonetheless, this book demonstrates that non-economic factors have likewise been of great importance in the decision to emigrate. As such this book will be a valuable read to policy makers, students and scholars in migration.

Integrated Design and Manufacturing in Mechanical Engineering - Patrick Chedmail 2012-12-06

This volume contains the selected papers of the first I.D.M.M.E. conference on 'Integrated Design and Manufacturing in Mechanical Engineering', held in Nantes from 15-17 April 1996. Its objective was to discuss the questions related to the definition of the optimal design and manufacturing processes and to their integration through coherent methodologies in adapted environments. The initiative of the Conference and the organization thereof, is mainly due to the efforts of the french PRIMECA group (Pool of Computer Resources for Mechanics) started eight years ago. We were able to attract the international community with the support of the International Institution for Production Engineering Research (C.I.R.P.). The conference brought together two hundred and fifty specialists from around the world. About ninety papers and twenty posters were presented covering three main topics : optimization and evaluation of the product design process, optimization and evaluation of the manufacturing systems and methodological aspects.
