Smart Swarm - Peter Miller 2011-04

How Understanding Flocks, Schools and Colonies Can Make Us Better at Communicating, Decision Making

and Getting Things Done. The modern world may be obsessed with speed and productivity, but twenty-first century humans actually have much to learn from the ancient instincts of swarms. A fascinating new take on the concept of collective intelligence and its colourful manifestations in some of our most complex problems, *Smart Swarm* introduces a compelling new understanding of the real experts on solving our own complex problems relating to such topics as business, politics, and technology. Based on extensive globe-trotting research, this lively tour from National Geographic reporter Peter Miller introduces thriving throngs of ant colonies, which have inspired computer programs for streamlining factory processes, telephone networks, and truck routes; termites, used in recent studies for climate-control solutions; schools of fish, on which the U.S. military modelled a team of robots; and many other examples of the wisdom to be gleaned about the behaviour of crowds-among critters and corporations alike. In the tradition of James Surowiecki's *The Wisdom of Crowds* and the innovative works of Malcolm Gladwell, *Smart Swarm* is an entertaining yet enlightening look at small-scale phenomena with big implications for us all.

Dr. Jang's SAT 800 Math Workbook - Simon Jang, Ph. D. 2014-03-22

Dr. Jang's SAT 800 Math Workbook provides all the material you need to know to get a perfect score on the math section of the SAT exam. It was designed for students of any level to get an excellent math score on the SAT in a short period of time by helping them focus on the content required for the test and the skills to tackle the questions quickly and easily. This book divides the required content knowledge into three chapters. Within each chapter, all necessary sub-concepts are given in-depth instruction as well as

numerous practice questions provided to mimic those on the actual SAT. Each section has questions grouped into three levels: easy, medium, and hard. Problem solving tips and answers are located to the right of the problem. This makes it easy for students to reference the answer but can be easily covered if the student wants to attempt the problem first before consulting the solutions. In addition to a thorough overview of materials, this book provides over 1500 practice problems for students to reinforce their understanding of the material and pinpoint their weak areas you need to improve on. This book also showcases proven advice that aid in the critical thinking and problem solving process. The ten SAT math mock tests located at the back of book closely mimic the actual exam and provide even more practice. By taking these mock exams with a timer under test-like conditions, students will be even more prepared to master the real test. The redesigned SAT, which will be launched in 2016, will increase its focus on data analysis, problem solving, algebra and the topics leading into advanced math. The top score will return to 1600, which includes 800 points from the math section. The problems in this book help you prepare for both versions of the SAT. Working on the problem solving skills section in this book will help you build up a strong sense of intuition for when you need to make educated guesses on problems you do not immediately know how to solve.

Point No Point - Sujata Bhatt 2012-07-27

Sujata Bhatt's first book of poems, the award-winning *Brunizem*, appeared in 1988. In a very short time she has gained recognition as one of the distinct and reckonable new voices. She has things to say about her native India and her native tongue (Gujarati), about America and Britain, and about Germany where she now lives. She is, the *New Statesman* declared, 'one of the finest poets alive', and alive in a unique way to language, to issues of politics and gender, to place and history. Hers is a remarkable complete imagination, generous and at the same time unsparingly severe in its quest for the difficult truths of experience.
