Words That Work - Alicia Eaton 2015-10-21

Too many parents, and teachers for that matter, struggle to get their requests heard, understood and taken seriously - kids just don't seem to be able to do as they're told nowadays. In *Words that Work: How to Get Kids to Do Almost Anything*, author Alicia Eaton,

a leading Harley Street Hypnotherapist & Advanced NLP Practitioner, explains how much easier it is to get children to co-operate, simply by changing the vocabulary and structure of your sentences. She shows how powerful words are if you know about the NLP 'language of persuasion and influence'. And

also shares the secret to slipping 'hypnotic influence' into day-to-day conversations. Originally a Montessori teacher and a mother to three, now grown-up children, Alicia's combined all her skills, knowledge and expert training to create this unique parenting system that really works. So whether the issue is mealtime arguments over fussy eating or junk food cravings; an anxiety or phobia about dogs, spiders, going to school or exams; a lack of confidence; bad habits such as nail-biting, thumbsucking or bedwetting, you'll quickly learn what to say and what not to say. You'll be able to put an end to the nagging and yelling that gets you nowhere and wears you out; reward systems and star charts that quickly lose their appeal; bribery and punishments that achieve nothing and make everyone feel bad. Parents who appear to have well-behaved, happy, high achieving kids are not just plain 'lucky' - quite simply, they're handling things differently and with a bit of

inside knowledge, you can too.

The NLP Cookbook - Fran Burgess 2011-11-16

The NLP Cookbook is a veritable smorgasbord of NLP and related techniques gleaned from some of the greatest

names in the field and adapted to provide an encyclopaedic resource for all therapists, coaches, change agents or health professionals. Fran Burgess uses the metaphor of cooking to describe the process of bringing together the best ingredients in NLP and selecting them carefully in order to produce some mouth watering results. The recipes are grouped into sections depending on their purpose. Quite a few focus on how to shift state, with some of these targeting specific states like acceptance and anxiety. These are followed by recipes that seek to develop behaviours and skills, and others that address beliefs and identity. There is then a wide range to choose from which deal with goals, relationships and the process of change. The beauty is that most of them can be used time and again for different circumstances and contexts, so they never wear out. Each recipe is prefaced by an introduction, giving you some background to its source and evolution. You are provided

with its ingredients, should you be interested in its engineering, plus timings and materials required, and if it is suitable for working solo, or with a partner. Novice cooks can follow the recipes slavishly whereas those with more experience can adapt a recipe, adding a little something here, removing a little something there. This is not magic. They understand the chemistry that underpins the cooking process. They know what happens when you put this with that, now or later.

What Do You Say? - William Stixrud, PhD 2021-08-17

A guide to effectively communicating with teenagers by the bestselling authors of *The Self-Driven Child* If you're a parent, you've had a moment--maybe many of them--when you've thought, "How did that conversation go so badly?" At some point after the sixth grade, the same kid who asked "why" non-stop at age four suddenly stops talking to you. And the conversations that you wish you could have--ones fueled by your desire to see

your kid not just safe and healthy, but passionately engaged--suddenly feel nearly impossible to execute. The good news is that effective communication can be cultivated, learned, and taught. And as you get better at this, so will your kids. William Stixrud, Ph.D., and Ned Johnson have 60 years combined experience talking to kids one-on-one, and the most common question they get when out speaking to parents and educators is: What do you say? While many adults understand the importance and power of the philosophies behind the books that dominate the parenting bestseller list, parents are often left wondering how to put those concepts into action. In *What Do You Say?*, Johnson and Stixrud show how to engage in respectful and effective dialogue, beginning with defining and demonstrating the basic principles of listening and speaking. Then they show new ways to handle specific, thorny topics of the sort that usually end in parent/kid standoffs:

delivering constructive feedback to kids; discussing boundaries around technology; explaining sleep and their brains; the anxiety of current events; and family problem-solving. What Do You Say? is a manual and map that will immediately transform parents' ability to navigate complex terrain and train their minds and hearts to communicate ever more successfully.

The Origins of Neuro Linguistic Programming -

John Grinder 2012-11-30

The Origins of NLP brings together the recollections and thoughts of some of the main protagonists from the very early days of NLP. In 1971 Richard Bandler and Frank Pucelik were students at Kresge College at the University of California Santa Cruz. They had a strong mutual interest in Gestalt Therapy, Frank because of his traumatic time in Vietnam and because he had been working with some disaffected and drug-addicted kids, and Richard because he had been working with Science and Behavior Books on transcribing and editing Fritz Perls' seminal

work, The Gestalt Approach and Eyewitness to Therapy. They started a local Gestalt group and ran 2-3 sessions a week collaborating and experimenting with the language of therapy. They started achieving some brilliant results but were having problems transferring their skills to others and so Richard invited one of their college professors, John Grinder, to observe what they were doing in order that he would, hopefully, be able to deconstruct what they were doing that was so effective. John was a professor of Linguistics and was instantly impressed with the work that they were doing. He was able to add more structure and in due course the three of them formalised what is now known as the Meta Model. NLP, or Meta as it was known then, was born.
