**A Forest Journey: The Story of Wood and Civilization** - John Perlin 2005-09-20

A contemporary view of the effects of wood, as used for building and fuel, and of deforestation on the development of civilization. Its abundance or scarcity greatly shaped, as *A Forest Journey* ably relates, the culture, demographics, economy, internal and external politics, and technology of successive societies over the millennia. The book's comprehensive coverage of the major role forests have played in human life--told with grace, fluency, imagination, and humor--gained it recognition as a Harvard Classic in Science and World History and as one of Harvard's "One-Hundred Great Books." Others receiving the honor include such luminaries as Stephen Jay Gould and E. O. Wilson. This new paperback edition will add a prologue and an epilogue to reflect the current situation in which forests have become imperative for humanity's survival.

**Standard Guideline for the Collection and Depiction of Existing Subsurface Utility Data** - 2003

CI/ASCE Standard 38-02 presents a credible system for classifying the quality of utility location information that is placed in design plans. determine which utility quality level attribute to assign to data; and what the relative costs and benefits of the various quality levels are. Used as a reference or as part of a specification, the Standard will assist engineers, project and utility owners, and constructors in developing strategies to reduce risk by improving the reliability of information on existing subsurface utilities in a defined manner.
