Why We Make Mistakes - Joseph T. Hallinan
2009-02-17

We forget our passwords. We pay too much to go to the gym. We think we'd be happier if we lived in California (we wouldn't), and we think we should stick with our first answer on tests (we shouldn't). Why do we make mistakes? And could we do a little better? We human beings have design flaws. Our eyes play tricks on us, our stories change in the retelling, and most of us are fairly sure we're way above average. In *Why We Make Mistakes*, journalist Joseph T. Hallinan sets out to explore the captivating science of human error—how we think, see, remember, and forget, and how this sets us up for wholly irresistible mistakes. In his quest to understand our imperfections, Hallinan delves into psychology, neuroscience, and economics, with forays into aviation, consumer behavior, geography, football, stock picking, and more. He discovers that some of the same qualities that make us efficient also make us error prone. We learn to move rapidly through the world, quickly recognizing patterns—but overlooking details. Which is why thirteen-year-old boys discover errors that NASA scientists miss—and why you can't find the beer in your refrigerator. *Why We Make Mistakes* is enlivened by real-life stories—of weathermen whose predictions are uncannily accurate and a witness who sent an innocent man to jail—and offers valuable advice, such as how to remember where you've hidden something important. You'll learn why multitasking is a bad idea, why men make errors women don't, and why most people think San

Diego is west of Reno (it's not). *Why We Make Mistakes* will open your eyes to the reasons behind your mistakes—and have you vowing to do better the next time.

Vanquished - Mir Bahmanyar 2009-11-17
Throughout time, violent battles and bloody clashes have changed the course of history and shaped nations or empires. Battles of annihilation are rare, but ever since antiquity a stunning victory on the battlefield, even if it has failed to win the war, has captured the imagination of many. The battle of Cannae in 216BC, where Hannibal destroyed an entire Roman army, has become legend, inspiring generations of military thinkers to discuss and imitate this feat. Usually written off as incidents of luck, some argue that it is not possible to completely destroy the enemy, although historic engagements have proved that annihilating the opponent can be achieved, at least on a tactical level. In this book Mir Bahmanyar examines battles of annihilation throughout history, some well known, others less so, but all equally extraordinary, to discover what sets these engagements apart, whether they achieve a decisive strategic advantage in war, and why there are fewer battles of annihilation in modern times.

Excerpt from Allen's Synonyms and Antonyms
The collation and application of these memoranda have taken me many years of intense labor but these memoranda form the basis upon which the present dictionary has been constructed. My aim has been to make the scope of the book as broad as possible in order to meet the requirements of my most critical advisers, though this has not been easy. Some have urged that obsolete and rare words be omitted' others have advised that they be retained. Some have thought the contextual notes superfluous; others, even among professional writers, have considered them highly valuable. And so with other features of the book. At some have thought needless, others have thought helpful. As a result it has seemed advisable to meet all reasonable requirements by including those features which serve any widely felt need. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Introductory Grammar of Amharic - Wolf Leslau 2000

This book closes the gap for beginners who want to study the Amharic language and had difficulties in finding the right grammar for this purpose: The first grammar of Amharic, the national language of Ethiopia, was published by Hiob Ludolf in 1698. The Amharic grammar published by Praetorius in 1879 is based on Amharic religious texts and on scattered material, usually composed by missionaries. A milestone in the study of Amharic is Marcel Cohen's *Traite de langue amharique* (1936), but this grammar, too is not completely suited for beginners since the author's generalizations are at times aimed at linguists. The grammar that comes closest to the concept of a beginner's grammar is that of C.H. Dawkin (1960), yet this grammar is extremely short, does not give examples and does not introduce the student to the intricacies of the language. The new book gives all the grammatical forms and the sentences of the present grammar in Amharic script and in phonetic transcription. The illustrative examples have a free and a literal translation. This procedure should likewise

prove to be useful for the Semitist as well as for the general linguist.

Open Technical Communication - Tamara Powell 2020-08-19

"Technical communication is the process of making and sharing ideas and information in the workplace as well as the set of applications such as letters, emails, instructions, reports, proposals, websites, and blogs that comprise the documents you write...Specifically, technical writing involves communicating complex information to a specific audience who will use it to accomplish some goal or task in a manner that is accurate, useful, and clear. Whether you write an email to your professor or supervisor, develop a presentation or report, design a sales flyer, or create a web page, you are a technical communicator." (Chapter 1)

The Genius in All of Us - David Shenk 2011-03-08

"Fresh insights into the nature of exceptional performance.... A deeply interesting and important book" (New York Times Book Review) that offers a revolutionary and life-changing message on the new science of human potential. Is true greatness obtainable from everyday means and everyday genes? Conventional wisdom says no, that a lucky few are simply born with certain gifts. Now you can forget everything you think you know about genes, talent, and intelligence, and take a look at the amazing new evidence. Here, interweaving cutting-edge research from numerous scientific fields, David Shenk offers a new view of human potential, giving readers more of a sense of ownership over their accomplishments, and freeing parents from the bonds of genetic determinism. As Shenk points out, our genes are not a "blueprint" that dictate individual destinies. Rather we are all the product of interplay between genes and outside stimuli—a dynamic that we can influence. It is a revolutionary and life-changing message.

Think Smart - Richard Restak 2009-04-30

A leading neuroscientist and New York Times bestselling author of *Mozart's Brain and the Fighter Pilot* distills the research on the brain and serves up practical, surprising, and illuminating recommendations for warding off neurological decline, cognitive function, and encouraging smarter thinking day to day. In *Think Smart*, the renowned neuropsychiatrist and bestselling author Dr. Richard Restak details how each of us can improve and tone our body's most powerful organ: the brain. As a renowned expert on the brain, Restak knows that in the last five years there have been exciting new scientific discoveries about the brain and its performance. So he's asked his colleagues—many of them the world's leading brain scientists and researchers—one important question: What can I do to help my brain work more efficiently? Their surprising—and remarkably feasible—answers are at the heart of *Think Smart*. Restak combines advice culled from cutting-edge research with brain-tuning exercises to show how individuals of any age can make their brain work more effectively. In the same accessible prose that made *Mozart's Brain and the Fighter Pilot* a New York Times bestseller, Restak presents a wide array of practical recommendations about a variety of topics, including the crucial role sleep plays in boosting creativity, the importance of honing sensory memory, and the neuron-firing benefits of certain foods. In *Think Smart*, the "wise, witty, and ethical Restak" (says the Smithsonian Institution) offers readers helpful suggestions for fighting neurological decline that will put every reader on the path to building a healthier, more limber brain.

A New America - Tommy Mottola 2016-11-01

The long-anticipated companion book to the groundbreaking HBO documentary *The Latin Explosion* by renowned music producer Tommy

Mottola. Legendary music mogul, entertainment impresario, and New York Times bestselling author Tommy Mottola explores and expounds on his lifelong love of Latin music, its influence on his life and career, and its ever-growing influence in America. Tommy Mottola discovered a passion for Latin music when he was a small child on the streets of the Bronx, where he fell in love with the energy and rhythm of the legendary Tito Puente. It is a love he carries with him to this day. In *A New America*, Mottola explores the societal and cultural impact the Latino community and its music has had on America by sharing behind-the-scenes stories from his own life and his connection to the Latin sound throughout the decades—from his initial fascination with Latin music, which started with Puente, to the mainstream success of Ritchie Valens, to the groove-laden guitar wizardry of Carlos Santana. Along the way, Mottola reveals heartfelt accounts of his longtime collaboration and friendship with Gloria Estefan and her husband, Emilio, the meteoric rise and tragic end of Selena, and his orchestration of the Latin Explosion of the 1990s, which launched megastars such as Marc Anthony, Ricky Martin, Shakira, and Jennifer Lopez. But *A New America* is more than a story about music and musicians. It is the story of a culture that continues to grow and influence America in all its aspects and an irresistible sound that continues to move and inspire the nation.
