Crosstown Park - Melanie Bragg 2013-10-01

On a flight from New York to Houston, Alex Stockton, a successful young lawyer, meets Reverend Morse. He is in dire need of a lawyer to represent one of his foster home house parents, Jose Gonzales. The Reverend believes that Jose was falsely accused of sexually molesting Chris Jackson, a teenage boy, in Crosstown Park. He convinces Alex that Chris Jackson made the allegation against Jose because his uncle, Voodoo, is seeking revenge against the Reverend for disrupting his illegal drug and prostitution activities. Alex's instincts take over and her long buried memories of her foster home background surface. Before the plane lands she has taken Jose's case- pro bono. She has six weeks to discover what happened in Crosstown Park between Jose and Chris. She

teams up with Nic Wright, a handsome former cop-turned-security-company-owner, to save Jose and the poor children at Shepherd's Cottages. As the case progresses, Alex's life and perfect trial record is threatened. Not to mention her lifelong dream of becoming a judge. What she really needs is a witness...

Environmental Humanities of Extraction in Africa - James Ogude
2022-08-11

This book brings together perspectives on resource exploitation to expose the continued environmental and socio-political concerns in post-colonial Africa. The continent is host to a myriad of environmental issues, largely resulting from its rich diversity of natural resources that have been historically subjected to exploitation. Colonial patterns of resource use and capital accumulation continue unabated, making environmental and related socio-political problems a dominant feature of African economies. The book pursues the manifestation of these problems through four themes: environmental justice, violent capitalocenes,

indigenous knowledge, and climate change. The editors locate the book within the broad fields of political ecology and environmental geopolitics to highlight the intricate geographies of resource exploitation across Africa. It uniquely focuses on the socio-political and geopolitical dynamics associated with the exploitation of Africa's natural resources and its people. The case studies from different parts of Africa tell a compelling story of resource exploitation, related issues of environmental degradation in a continent particularly vulnerable to climate change, and the continued plundering of its natural resources. The book will be of great interest to scholars and students from the interdisciplinary fields of the environmental humanities and environmental studies more broadly, as well as those studying political ecology, environmental policy, and natural resources with a specific focus on Africa.

Engineering - Unesco 2010-01-01

This report reviews engineering's importance to human, economic, social and cultural development and in addressing the UN Millennium Development Goals. Engineering tends to be viewed as a national issue, but engineering knowledge, companies, conferences and journals, all demonstrate that it is as international as science. The report reviews the role of engineering in development, and covers issues including poverty reduction, sustainable development, climate change mitigation and adaptation. It presents the various fields of engineering around the world and is intended to identify issues and challenges facing engineering, promote better understanding of engineering and its role, and highlight ways of making engineering more attractive to young people, especially women.--Publisher's description.

Facilitating Interdisciplinary Research - Institute of Medicine 2005-04-04

Facilitating Interdisciplinary Research examines current interdisciplinary research efforts and recommends ways to stimulate and support such research. Advances in science and engineering increasingly require the collaboration of scholars from various fields. This shift is driven by the need to address complex problems that cut across traditional disciplines, and the capacity of new technologies to both transform existing disciplines and generate new ones. At the same time, however, interdisciplinary research can be impeded by policies on hiring, promotion, tenure, proposal review, and resource allocation that favor traditional disciplines. This report identifies steps that researchers, teachers, students, institutions, funding organizations, and disciplinary

societies can take to more effectively conduct, facilitate, and evaluate interdisciplinary research programs and projects. Throughout the report key concepts are illustrated with case studies and results of the committee's surveys of individual researchers and university provosts.

The Economics of the Parables - Robert Sirico 2022-05-10
Timeless and moral economic wisdom for life's choices and changes derived from the parables of the New Testament by famed free market advocate and Catholic priest Robert Sirico. Libraries are filled with

books on the parables of Christ, and rightly so. In the words of Pope Emeritus Benedict XVI, "While civilizations have come and gone, these stories continue to teach us anew with their freshness and their humanity." Two millennia later, the New Testament parables remain ubiquitous, and yet, few have stopped to glean from one of Christ's most prevalent analogies: money. In *The Economics of the Parables*, Rev. Robert Sirico pulls back the veil of modernity to reveal the timeless economic wisdom of the parables. Thirteen central stories—including "The Laborers in the Vineyard," "The Rich Fool," "The Five Talents," and "The Faithful Steward"—serve as his guide, revealing practical lessons in caring for the poor, stewarding wealth, distributing inheritances, navigating income disparities, and resolving family tensions. As contemporary as any business manual and sure to outlast them, *The Economics of the Parables* equips any economically informed reader to uncover the enduring financial truths of the parables in a reasonable, sensible, and life-empowering manner.
