Dilemmas of a Trading Nation - Mireya Solís
2017-08-01

The balancing of competing interests and goals will have momentous consequences for Japan—and the United States—in their quest for economic growth, social harmony, and international clout. Japan and the United States face difficult choices in charting their paths ahead as trading nations. Tokyo has long aimed for greater decisiveness, which would allow it to move away from a fragmented policymaking system favoring the status quo in order to enable meaningful internal reforms and acquire a larger voice in trade negotiations. And Washington confronts an uphill battle in rebuilding a fraying domestic consensus in favor of internationalism essential to sustain its leadership role as a champion of free trade. In *Dilemmas of a Trading Nation*, Mireya Solís describes how accomplishing these tasks will require the skillful navigation of vexing tradeoffs that emerge from pursuing desirable, but to some extent contradictory goals: economic competitiveness, social legitimacy, and political viability. Trade policy has catapulted front and center to the national conversations taking place in each country about their desired future direction—economic renewal, a relaunched social compact, and projected international influence. *Dilemmas of a Trading Nation* underscores the global consequences of these defining trade dilemmas for Japan and the United States: decisiveness, reform, internationalism. At stake is the ability of these leading economies to upgrade international economic rules and create incentives for emerging economies to converge toward these higher standards. At play is the reaffirmation of

a rules-based international order that has been a source of postwar stability, the deepening of a bilateral alliance at the core of America's diplomacy in Asia, and the ability to reassure friends and rivals of the staying power of the United States. In the execution of trade policy today, we are witnessing an international leadership test dominated by domestic governance dilemmas.

By More Than Providence - Michael J. Green
2017-03-21

Soon after the American Revolution, certain of the founders began to recognize the strategic significance of Asia and the Pacific and the vast material and cultural resources at stake there. Over the coming generations, the United States continued to ask how best to expand trade with the region and whether to partner with China, at the center of the continent, or Japan, looking toward the Pacific. Where should the United States draw its defensive line, and how should it export democratic principles? In a history that spans the eighteenth century to the present, Michael J. Green follows the development of U.S. strategic thinking toward East Asia, identifying recurring themes in American statecraft that reflect the nation's political philosophy and material realities. Drawing on archives, interviews, and his own experience in the Pentagon and White House, Green finds one overarching concern driving U.S. policy toward East Asia: a fear that a rival power might use the Pacific to isolate and threaten the United States and prevent the ocean from becoming a conduit for the westward free flow of trade, values, and forward defense. *By More Than Providence* works through these problems from the perspective of history's major strategists and statesmen, from Thomas Jefferson to Alfred Thayer Mahan and Henry Kissinger. It records the fate of their ideas as they collided with the realities of the Far East and adds clarity to America's stakes in the region, especially when compared with those of Europe and the Middle East.

Social Capital in the Asia Pacific - Yuliani Suseno 2020-05-06
Social capital is broadly conceptualised as

consisting of resources and network ties embedded in the social structures and relationships that facilitate beneficial outcomes for the actors within those structures. Despite the number of research studies on social capital, there have been fewer attempts to examine social capital in the context of service-oriented firms, particularly in the Asia Pacific. This is surprising as the service industry plays an important role in the global services trade transactions and business activities. Social capital enables and maintains social relations for business transformation for service-oriented firms. Indeed, it would be unimaginable for any economic activity, particularly in service-oriented firms, to occur without social capital. This examination of social capital in the Asia Pacific region provides the context for recognising the cultural, social and economic opportunities and challenges of several Asia Pacific countries that can potentially enrich our knowledge and understanding of the region. Contributions are drawn from cases based in Thailand, Indonesia, South Korea, China and Australia, for relevant application in the areas of social capital and service-oriented firms in the Asia Pacific. This book was originally published as a special issue of the Asia Pacific Business Review.

Global Business - Nader H. Asgary 2021-01-01

The arrival of the COVID-19 pandemic throughout the globe at the end of 2019 turned global business upside down. It forced the closure of many businesses, disrupted global supply chains, reduced travel across borders, and created fear about face-to-face interactions. As the lockdowns in many countries created uncertainty about the future business activities,

global business leaders were scrambling to find new strategies to safely re-establish their business relationships with their stakeholders. The existing historical economic, social, and racial injustice in the American society toward Black, Indigenous, and People of Color was compounded by the COVID-19. This led the movements of the Black Lives Matter to reenergize and become a global phenomenon. The horrific and sad death of George Floyd and many others triggered huge global movements to demand respect for human rights and dignity for all. Additionally, climate change and environmental degradation have caused unprecedented forests fires, more frequent and damaging hurricanes, and migration demand a revived global business book. This third edition of *Global Business: An Economic, Social, and Environmental Perspective* incorporates global business issues related to COVID-19, the economic and social injustice of BIPOC, and environmental degradation where it is appropriate. The reader will understand the impact of these critical global business issues discussed in the book through examples, case studies and thought-provoking discussions. These challenges require businesses, governments, and the active engagement of citizens to succeed. The aim of this book is to bring these issues for discussion and action by these stakeholders. Each chapter includes supplementary PowerPoint slides, Test-Bank, and Teaching notes that are available for instructors only.

Implementing the CCPA - Dominique Shelton
Leipzig 2020-11-20

Global Talent - Gi-Wook Shin 2015-03-18
Global Talent seeks to examine the utility of skilled foreigners beyond their human capital value by focusing on their social capital potential, especially their role as transnational bridges between host and home countries. Gi-Wook Shin and Joon Nak Choi build on an emerging stream of research that conceptualizes global labor mobility as a positive-sum game in which countries and businesses benefit from building ties across geographic space, rather than the zero-sum game implied by the "global war for talent" and "brain drain" metaphors. The book empirically demonstrates its thesis by examination of the case of Korea: a state archetypical of those that have been embracing economic globalization while facing a demographic crisis—and one where the dominant narrative on the recruitment of skilled foreigners is largely negative. It reveals the unique benefits that foreign students and professionals can provide to Korea, by enhancing Korean firms' competitiveness in the global marketplace and by generating new jobs for Korean citizens rather than taking them away. As this research and its key findings are relevant to other advanced societies that seek to utilize skilled foreigners for economic development, the arguments made in this book offer insights that extend well beyond the Korean experience.

Innovation in the Asia Pacific - Thomas Clarke 2017-10-20

This book promotes the creation of advanced knowledge-based economies driven by innovation networks and the continuous development of human capital and capability. It provides valuable insights into the growing emergence of knowledge-based industries of the Asia Pacific, and highlights research on: modes of creativity and innovation; intellectual property; the components of national innovation systems such as firms, education and training; knowledge and technical infrastructure; and public policy. The Asia Pacific region is currently in the process of transforming from being the manufacturing centre of the global economy to a centre of innovation for the knowledge economy, with the successful IPO of Alibaba in 2014 being a prime example of this shift. From a neo-Schumpeterian perspective, the region is increasingly engaged in shortening and

intensifying cycles of innovation. The historic agreement at the Beijing APEC meeting between China and the US to radically reduce carbon emissions indicates that one imperative of this innovation is to contribute to sustainability. The fact that the US Government is moving away from this historic commitment, while the Chinese Government is endorsing the commitment, indicates an emerging opportunity for Asia to lead the world technologically in a vital industrial sector of the future.
