Networks, Markets, and the Pacific Rim - W. Mark Fruin 1998

This volume explores the wide diversity in the kinds of networks that have been established between firms in Japan and the Pacific Rim. Editor W. Mark Fruin shows how networks in Japan and Korea are more prescribed and standardized than those found in the United States. For example, Toyota's satellite organizational system is more flexible, open-ended, and market-conforming than General Motors divisional organization. But less market-conforming networks can also arise. In China, for example, networks have arisen because of the unpredictable nature of markets. The contributors to this volume utilize new ideas and data to formulate an understanding of the importance of networks to the success of Asian firms. The book's postmodern approach--seeking not a single model but rather a variety of models of equally probable validity--makes it a unique resource for scholars and professionals in the field.

Air Pollution by Nitrogen Oxides - L. Grant 2013-10-22

Studies in Environmental Science, Volume 21: Air Pollution by Nitrogen Oxides presents the proceedings of the US-Dutch International Symposium on Nitrogen Oxide, held in Maastricht, The Netherlands on

May 24–28, 1982. This book provides research and development information related to the national and international policies on nitrogen oxides in the United States, The Netherlands, Japan, and elsewhere in Europe. Organized into five sessions encompassing 94 chapters, this volume begins with an overview of the atmospheric cycle of nitrogen oxide in terms of source strength, destruction rates, and atmospheric chemistry. This text then examines the fundamental physical and chemical processes involved in the formation of nitrogen oxides. Other chapters consider the regional pulmonary deposition of nitrogen dioxide in man, guinea pigs, rats, and rabbits by using a general mathematical model formulation for the transport of gases in the lungs. This book discusses as well the emission control methods and systems with low nitrogen oxide capability for possible application in The Netherlands and other parts of Europe. This book is a valuable resource for government administrative officials, research scientists, air pollution control experts, and students.

Machine Learning Bookcamp - Alexey Grigorev 2021-11-23

Time to flex your machine learning muscles! Take on the carefully designed challenges of the Machine Learning Bookcamp and master essential ML techniques through practical application. Summary In Machine Learning Bookcamp you will: Collect and clean data for training models Use popular Python tools, including NumPy, Scikit-Learn, and TensorFlow Apply ML to complex datasets with images Deploy ML models to a production-ready environment The only way to learn is to practice! In Machine Learning Bookcamp, you'll create and deploy Python-based machine learning models for a variety of increasingly challenging projects. Taking you from the basics of machine learning to complex applications such as image analysis, each new project builds on what you've learned in previous chapters. You'll build a portfolio of business-relevant machine learning projects that hiring managers will be excited to see. Purchase of the print book includes a free eBook in PDF, Kindle, and ePub formats from Manning Publications. About the technology Master key machine learning concepts as you build actual projects! Machine learning is what you need for analyzing customer behavior, predicting price trends, evaluating risk, and much more. To master ML, you need great examples, clear explanations, and lots of practice. This book delivers all three! About the book Machine Learning Bookcamp presents realistic, practical machine learning scenarios, along with crystal-clear coverage of key concepts. In it, you'll complete engaging projects, such as creating a car price predictor using linear regression and deploying a churn prediction service. You'll go beyond the algorithms and explore important techniques like deploying ML applications on serverless systems and serving models with Kubernetes and Kubeflow. Dig in, get your hands dirty, and have fun building your ML skills! What's inside Collect and clean data for training models Use popular Python tools, including NumPy, Scikit-Learn, and TensorFlow Deploy ML models to a production-ready environment About the reader Python programming skills assumed. No previous machine learning knowledge is required. About the author Alexey Grigorev is a principal data scientist at OLX Group. He runs DataTalks.Club, a community of people who love data. Table of Contents 1 Introduction to machine learning 2 Machine learning for regression 3 Machine learning for classification 4 Evaluation metrics for classification 5 Deploying machine learning models 6 Decision trees and ensemble learning 7 Neural networks and deep learning 8 Serverless deep learning 9 Serving models with Kubernetes and Kubeflow

Automotive Fuel Economy - National Research Council 1992-02-01

This volume presents realistic estimates for the level of fuel economy that is achievable in the next decade for cars and light trucks made in the United States and Canada. A source of objective and comprehensive information on the topic, this book takes into account real-world factors such as the financial conditions in the automotive industry, costs and benefits to consumers, and marketability of high-efficiency vehicles. The committee is composed of experts from the fields of science, technology, finance, and regulation and offers practical evaluations of technological improvements that could contribute to increased fuel efficiency. The volume also examines potential barriers to improvement, such as high production costs, regulations on safety and emissions, and consumer preferences. This practical book is of considerable interest to car and light truck manufacturers, policymakers, federal and state agencies, and the public.
