**Emerging Space Markets** - Stella Tkatchova  
2017-09-19  
This book analyzes the commercial space activities and commercialization processes of the

last fifteen years and maps the future challenges that NewSpace companies will face developing commercial space markets. What is new and what has happened in these markets up till now? Is there a business case for private companies for commercial space? What are the targeted commercial space markets? Who are the future customers for commercial space transportation markets? How can NewSpace companies attract investors? Can we learn lessons from traditional space industries or other companies in other areas? In what way have the last fifteen years made a difference in the evolution of space markets? Is there a future for in-situ resource mining, space debris services, in-orbit satellite servicing and sub-orbital transportation? What are the lessons learned from ISS commercialization? In addition the reader will find a synopsis of several space transportation programs, commercial space markets, future Moon and Mars missions, in-situ resource exploitation concepts, space debris mitigation

projects and sub-orbital commercial markets. Major lessons learned are identified, related to the attraction of first time customers and long term R&D funding, managing technological and market risks and developing new markets and applications.

*Tyrannosaurus Wrecks!* - Sudipta Bardhan-Quallen 2014-04-01

In this read-along picture book, a classroom full of young dinosaurs plays with toys, does art projects, and reads books. But each activity is another opportunity for the over-enthusiastic Tyrannosaurus Rex to wreak havoc. Parents and young children will love the call-and-response nature of the book, and young dinosaur fans will appreciate the listing (and pronunciation guide) for a dozen different dino species. The format is extra vertical in order to accommodate T. Rex's biggest messes. Praise for *Tyrannosaurus Wrecks* "Punchy writing, an equally in-your-face palette, and OHora's characteristically brash painting style make this as much a stompalong

as a read-aloud." --Publishers Weekly "Along with the pleasure of pronouncing those multisyllabic dino names, young audiences may find food for thought in the behavioral dynamics on display." -Kirkus Reviews "Warmly colored with childlike bodies and emotive faces, Ohora's dinosaurs are among the cutest you will come across in children's books." --Booklist "The brief rhyming text, which scans well, tells a story with child appeal. There is a good balance of two-to-three word sentences with large, uncluttered illustrations, making the book a good choice for reading aloud. In their simplicity, the brightly colored pictures have the look of children's art, but they enhance the classroom setting appropriately with interesting details." --School Library Journal "The shapely dinos, whose rough charcoal-style outlines and strong colors vividly contrast with the white or sometimes black backgrounds, are chunky and friendly in an eight-crayon-box color scheme and snazzy Peanuts-reminiscent outfits." --Bulletin of the

Center for Children's Books "Together the chanting rhythm, ragged lines, and setting of an un-chaperoned dinosaur class create a satisfyingly high-energy, primal read-aloud strongly reminiscent of Bob Shea's 'Dinosaur vs.' series." --The Horn Book Magazine

*Bound by Ice* - Sandra Neil Wallace 2017-09-19  
A Kirkus Reviews Best Children's Book This thrilling and terrifying true story of the 1879 search for the North Pole follows the frightening fates of the USS Jeannette crew as disaster strikes -- and the men battle to survive two years bound by ice. In the years following the Civil War, "Arctic fever" gripped the American public, fueled by myths of a fertile, tropical sea at the top of the world. *Bound by Ice* follows the journey of George Washington De Long and the crew of the USS Jeannette, who departed San Francisco in the summer of 1879 hoping to find a route to the North Pole. However, in mid-September the ship became locked in ice north of Siberia and drifted for nearly two years before it was crushed by ice and sank. De Long and his men escaped the ship and began a treacherous journey in extreme polar conditions in an attempt to reach civilization. Many—including De Long—did not survive. This true story for middle graders keeps readers on the edge of

their seats to the very end. Includes excerpts from De Long's extensive journals, which were recovered with his body; newspapers from the time; and photos and sketches by the men on the expedition.
