Confessions of an English Opium-Eater - Thomas De Quincey 2015-06-08

This vintage book contains Thomas De Quincey's 1821 autobiographic account, "Confessions of an English Opium-Eater". Within this volume, De Quincey describes his addiction to opium and explains, in great detail, the effects that it had on him and his life. It was his first major work, and one that brought him fame almost overnight. Thomas Penson De Quincey (1785 - 1859) was a seminal English essayist. Many antiquarian books like this are increasingly rare and expensive, and it is with this in mind that we are republishing this book now in an affordable, modern, and high-quality edition. It comes complete with a specially commissioned new biography of the author.

Hunger - Roxane Gay 2017-06-13

From the New York Times bestselling author of *Bad Feminist*: a searingly honest memoir of food, weight, self-image, and learning how to feed your hunger while taking care of yourself. "I ate and ate and ate in the hopes that if I made myself big, my body would be safe. I buried the girl I was because she ran into all kinds of trouble. I tried to erase every memory of her, but she is still there, somewhere. . . . I was trapped in my body, one that I barely recognized or understood, but at least I was safe." In her phenomenally popular essays and long-running Tumblr blog, Roxane Gay has written with intimacy and sensitivity about food and body, using her own emotional and psychological struggles as a means of exploring our shared anxieties over pleasure, consumption, appearance, and health. As a woman who describes her own body as "wildly undisciplined," Roxane understands the tension between desire and denial, between self-comfort and self-care. In *Hunger*, she explores her past—including the devastating act of violence that acted as a turning point in her young life—and brings readers along on her journey to understand and ultimately save herself. With the bracing candor, vulnerability, and power that have made her one of the most admired writers of her generation, Roxane explores what it means to learn to take care of yourself: how to feed your hungers for delicious and satisfying food, a smaller and safer body, and a body that can love and be loved—in a time when the bigger you are, the smaller your world becomes.

Narcissism - Alexander Lowen 2012-08-21

NARCISSISM Are you a narcissist? Do you interact with someone who is? Contrary to popular belief, narcissists do not love themselves or anyone else. They cannot accept their true selves, constructing instead fixed masks that hide emotional numbness. Influenced by forces in culture and predisposed by factors in the human personality, narcissists tend to be • More concerned with how they appear than what they feel • Seductive and manipulative, striving for power and control • Egotists, focused on their own interests but lacking the true values of the self -- self-expression, self-possession, dignity, and integrity • Without a solid sense of self, which leads them to experience life as empty and meaningless In this groundbreaking study, Dr. Alexander Lowen uses his extensive clinical experience to demonstrate how narcissists can recover their suppressed feelings and regain their lost humanity. By the use of Bioenergetic Analysis, the psychotherapy created by Dr. Lowen, a new possibility of a fulfilling and authentic life is presented for people with narcissistic characteristics and for those who interact with them.

The Language of the Body - Alexander Lowen 2012-12-18

The Language of the Body, originally published as Physical Dynamics of Character Structure, brilliantly describes how personality is expressed in the form and function of the body. The body is the key to understanding behavior and working with the body is the key to psychological health. The Language of the Body outlines the foundations of character structure: schizoid, oral, masochistic, hysteric, and phallic narcissistic personality types. Dr. Lowen examines the relationship between psychoanalytic theory and body therapy.

Emotional Wellness - Osho 2007-04-03

How do we reconcile our need to express our emotions with our desire to protect others? Far too often we find ourselves trapped in this dilemma of expression versus repression. We fear that by expressing our true feelings, we will hurt and alienate those close to us. But by repressing our emotions—even in the benevolent guise of “self-control”—we only risk hurting ourselves. Osho, one of the most provocative and inspiring spiritual teachers of our time, provides here a practical and comprehensive approach to dealing with this conflict effectively.

Incorporating new, never-before-published material, Emotional Wellness leads us to understand the roots of our emotions, to react to situations in a way that can teach us more about ourselves and others, and to respond to life's inevitable ups and downs with far greater confidence and equilibrium. Discover:

- The impact that fear, anger, and jealousy have on our lives
- How emotions like guilt, insecurity, and fear are used to manipulate us
- How to break out of unhealthy responses to strong emotions
- How to transform destructive emotions into creative energy
- The role of society and culture on our individual emotional styles

Osho's unique insight into the human mind and heart goes far beyond conventional psychology. He teaches us to experience our emotions fully and to deal with them creatively in order to achieve a richer, fuller life.

Shame and Guilt - June Price Tangney 2003-11-01

This volume reports on the growing body of knowledge on shame and guilt, integrating findings from the authors' original research program with other data emerging from social, clinical, personality, and developmental psychology. Evidence is presented to demonstrate that these universally experienced affective phenomena have significant implications for many aspects of human functioning, with particular relevance for interpersonal relationships. --From publisher's description.

How to Worry Less About Money - John Armstrong 2012-05-10

Our relationship with money is one that lasts a lifetime, yet traditionally books on the subject tend to take one of two routes: a) how to get more, or b) how to deal with less. John Armstrong turns these approaches upside down, and looks not at money itself, but at how we relate to it and the meaning we attach to it. How does it drive us and frighten us? Can it change the world for the better? And how much do we actually need? Offering surprising and helpful new insights, this book will encourage you to redefine your feelings about money, and ultimately enable you to discover what is really important to you in life. One in the new series of books from The School of Life, launched May 2012: How to Stay Sane by Philippa Perry How to Find Fulfilling Work by Roman Krznaric How to Worry Less About Money by John Armstrong How to Change the World by John-Paul Flintoff How to Thrive in the Digital Age by Tom Chatfield How to Think More About Sex by Alain de Botton

Mad in America - Robert Whitaker 2019-09-10

An updated edition of the classic history of schizophrenia in America, which gives voice to generations of patients who suffered through

"cures" that only deepened their suffering and impaired their hope of recovery Schizophrenics in the United States currently fare worse than patients in the world's poorest countries. In Mad in America, medical journalist Robert Whitaker argues that modern treatments for the severely mentally ill are just old medicine in new bottles, and that we as a society are deeply deluded about their efficacy. The widespread use of lobotomies in the 1920s and 1930s gave way in the 1950s to electroshock and a wave of new drugs. In what is perhaps Whitaker's most damning revelation, Mad in America examines how drug companies in the 1980s and 1990s skewed their studies to prove that new antipsychotic drugs were more effective than the old, while keeping patients in the dark about dangerous side effects. A haunting, deeply compassionate book -- updated with a new introduction and prologue bringing in the latest medical treatments and trends -- Mad in America raises important questions about our obligations to the mad, the meaning of "insanity," and what we value most about the human mind.

Love Relations - Otto F. Kernberg 1998-01-01

Internationally renowned psychoanalytic theorist and clinician Dr. Otto Kernberg here examines the success and failure of sexual love in couples, from adolescence to old age. Dr. Kernberg considers both "normal" and pathological relationships, including the role of narcissism, masochism, and aggression in each. The result expands the boundaries of our current understanding of love relations.

Quando il lavoro ci fa ammalare - Hans-Peter Unger 2009

Clinical Management of Sex Addiction - Patrick J. Carnes 2019-11-28

Clinical Management of Sex Addiction's newest edition updates many of the original chapters from 28 leaders in the field with new findings and treatment methods in the field of sex addiction. With a growing awareness of sex addiction as a problem, plus the advent of cybersex compulsion, professional clinicians are being confronted with sexual compulsion with little clinical or academic preparation. This is the first book distilling the experience of the leaders in this emerging field. It additionally provides new chapters on emerging areas of interest, including partner counseling, trauma and sexual addiction, and adolescent sex addiction. With a focus on special populations, the book creates a current and coherent reference for the therapist who faces quickly escalating new constellations of addictive sexual behavior. Readable, concise and filled with useful interventions, it is a key text for professionals new to the field and a classic reference for all clinicians who treat sex addiction.

The Power Is Within You - Louise Hay 1995-03-07

"Louise Hay writes to your soul—where all healing begins. I love this book... and I love Louise Hay." — Dr. Wayne W. Dyer In The Power Is Within You, Louise L. Hay expands her philosophies of loving the self through:

- learning to listen and trust the inner voice;
- loving the child within;
- letting our true feelings out;
- the responsibility of parenting;
- releasing our fears about growing older;
- allowing ourselves to receive prosperity;
- expressing our creativity;
- accepting change as a natural part of life;
- creating a world that is ecologically sound;
- where it's safe to love each other';
- and much more.

She closes the book with a chapter devoted to meditations for personal and planetary healing.

Coping with Alcohol and Drug Problems - Jim Orford 2013-01-11

What difference does culture make? Coping with Alcohol and Drug Problems: The Experiences of Family Members in Three Contrasting Cultures aims to deepen and extend understanding of the experiences of family members trying to cope with the excessive drinking or drug taking of a relative. Comprehensive and thoroughly up to date, this book draws on the results of the cross-cultural study of alcohol and drug problems in the family, and places these results within the broader context of the international literature on the subject. By investigating the similarities and differences in the experiences of family members in three parts of the world, the authors reveal results which have far-reaching implications for professional intervention and prevention. Subjects covered include: models of understanding: how families continue to be pathologised and misunderstood. how family members cope. an integrated view of alcohol and drug problems in the family. ways of

empowering family members. This book aims to demonstrate the possibility of a constructive alliance between professionals, substance misusing relatives, and the affected family members by thoroughly investigating the dilemmas that face family members and the lack of support they experience. This fascinating insight into the impact of alcohol and drug problems on family members will be a valuable resource for all those who are interested in substance misuse in family and cultural contexts, and particularly those who are interested in the treatment of alcohol and other drug problems.

Depressive Rumination - Costas Papageorgiou 2004-02-06

Rumination (recyclic negative thinking), is now recognised as important in the development, maintenance and relapse of recurrence of depression. For instance, rumination has been found to elevate, perpetuate and exacerbate depressed mood, predict future episodes of depression, and delay recovery during cognitive therapy. Cognitive therapy is one of the most effective treatments for depression. However, depressive relapse and recurrence following cognitive therapy continue to be a significant problem. An understanding of the psychological processes which contribute to relapse and recurrence may guide the development of more effective interventions. This is a major contribution to the study and treatment of depression which reviews a large body of research on rumination and cognitive processes, in depression and related disorders, with a focus on the implications of this knowledge for treatment and clinical management of these disorders. * First book on rumination in depressive and emotional disorders * Contributors are the leaders in the field * First editor is a rising researcher and clinician with specialist interest in depression, and second editor is world renowned for his work on cognitive therapy of emotional disorders

On Narcissism - Sigmund Freud 2021-04-21

On Narcissism: An Introduction is widely considered an introduction to Freud's theories of narcissism. In the paper, Freud sums up his earlier discussions on the subject of narcissism and considers its place in sexual development. Furthermore, he looks at the deeper problems of the relation between the ego and external objects, drawing a new distinction between the 'ego-libido' and 'object-libido'. He introduces the idea of the 'ego ideal', and the self-observing agency related to it. Freud also looks briefly at his controversies with Carl Jung and Alfred Adler; indeed one of his motives for writing this was probably to show that the concept of narcissism offers an alternative to Jung's non-sexual 'libido' and Adler's 'masculine protest'.

Zoo Station - Christiane F. 2019-08-01

This incredible autobiography of Christiane F. provides a vivid portrait of teen friendship, drug abuse, and alienation in and around Berlin's notorious Zoo Station. Christiane's rapid descent into heroin abuse and prostitution is shocking, but the boredom, longing for acceptance, thrilling risks, and even her musical obsessions are familiar to everyone. Previously published in Germany and the US to critical acclaim, Zest's new translation includes original photographs of Christiane and her friends.

Non sono più a tua disposizione. Come liberarsi dalle sensazioni opprimenti e vivere al meglio le proprie relazioni - Olaf Jacobsen 2010

Psychomagic - Alejandro Jodorowsky 2010-06-18

A healing path using the power of dreams, theater, poetry, and shamanism • Shows how psychological realizations can cause true transformation when manifested by concrete poetic acts • Includes many examples of the surreal but successful actions Jodorowsky has prescribed to those seeking his help While living in Mexico, Alejandro Jodorowsky became familiar with the colorful and effective cures provided by folk healers. He realized that it is easier for the unconscious to understand the language of dreams than that of rationality. Illness can even be seen as a physical dream that reveals unresolved emotional and psychological problems. Psychomagic presents the shamanic and genealogical principles Jodorowsky discovered to create a healing therapy that could use the powers of dreams, art, and theater to empower individuals to heal wounds that in some cases had traveled through generations. The concrete and often surreal poetic actions Jodorowsky employs are part of an elaborate strategy intended to break apart the dysfunctional persona with whom the patient identifies in order to connect with a deeper self. That is when true transformation can manifest. For a young man who complained that he lived only in his head and was unable to grab hold of reality and advance toward the financial autonomy he desired, Jodorowsky gave the prescription to paste two gold coins to the soles of his shoes so that all day he would be walking on gold. A judge whose

vanity was ruling his every move was given the task of dressing like a tramp and begging outside one of the fashionable restaurants he loved to frequent while pulling glass doll eyes out of his pockets. The lesson for him was that if a tramp can fill his pockets with eyeballs, then they must be of no value, and thus the eyes of others should have no bearing on who you are and what you do. Taking his patients directly at their words, Jodorowsky takes the same elements associated with a negative emotional charge and recasts them in an action that will make them positive and enable them to pay the psychological debts hindering their lives.

Brief Strategic Therapy - Giorgio Nardone 2005

Describes brief strategic therapy, looking at its theory, applications, and techniques.

The Distracted Mind - Adam Gazzaley 2017-10-27

A "brilliant and practical" study of why our brains aren't built for media multitasking—and how we can learn to live with technology in a more balanced way (Jack Kornfield, author of *The Wise Heart*) Most of us will freely admit that we are obsessed with our devices. We pride ourselves on our ability to multitask—read work email, reply to a text, check Facebook, watch a video clip. Talk on the phone, send a text, drive a car. Enjoy family dinner with a glowing smartphone next to our plates. We can do it all, 24/7! Never mind the errors in the email, the near-miss on the road, and the unheard conversation at the table. In *The Distracted Mind*, Adam Gazzaley and Larry Rosen—a neuroscientist and a psychologist—explain why our brains aren't built for multitasking, and suggest better ways to live in a high-tech world without giving up our modern technology. The authors explain that our brains are limited in their ability to pay attention. We don't really multitask but rather switch rapidly between tasks. Distractions and interruptions, often technology-related—referred to by the authors as "interference"—collide with our goal-setting abilities. We want to finish this paper/spreadsheet/sentence, but our phone signals an incoming message and we drop everything. Even without an alert, we decide that we "must" check in on social media immediately. Gazzaley and Rosen offer practical strategies, backed by science, to fight distraction. We can change our brains with meditation, video games, and physical exercise; we can change our behavior by planning our accessibility and recognizing our anxiety about being out of touch even briefly. They don't suggest that we give up our devices, but that we use them in a more balanced way.

Behavioral Addictions - Kenneth Paul Rosenberg, MD 2014-02-17

"Behavioral Addictions is a timely landmark achievement and a must read for anyone interested in addictive and compulsive behavior and its treatment. Rosenberg and Feder have brought us leading addiction experts, who clearly present the growing evidence for including behavioral addictions in the DSM-5 and how best to treat them. While gambling is the first to be included in the DSM-5 chapter on substance related disorders, other behavioral addictions are likely to follow as evidence grows. This is the most important new textbook in addiction psychiatry in recent years." - Richard Frances MD, Founding President, American Academy of Addiction Psychiatry DSM-V broke new ground in May of 2013, designating a new disorder called "behavioral addiction." Clinicians immediately wanted to know: how is a behavioral addiction different from an impulse control disorder? What are the criteria for determining that some behaviors are addictions rather than impulses? What, if anything, does this mean in terms of effective treatment? Behavioral Addictions is the first and most authoritative text ever written on the subject of behavioral addictions. This comprehensive work explains the criteria used to determine addiction, the evidence for identifying assorted behaviors as addictions, and the evidence-based treatment for each. With contributions from preeminent experts covering an exhaustive list of behavioral addictions, this book is unique in its coverage of behavioral addictions, their criteria, and treatment. It is a valuable and timely resource for any clinician treating addictions. A guide to understanding the new DSM-V designation of behavioral addiction Defines the criteria for behavior to be considered an addiction designation Discusses the evidence for behaviors meeting addiction criteria Identifies what is now, likely will be, and is not a behavioral addiction per evidence Discusses behaviors formerly considered impulse control disorders Presents evidence-based treatment for each behavioral addiction

Cocchi di mamma, cocche di papà. Riconoscere il proprio ruolo e vivere in armonia - Anna Zanardi 2010

Bad Doctor - Ian Williams 2014-06-01

Cartoonist and doctor Ian Williams introduces us to the troubled life of

Dr Iwan James, as all humanity, it seems, passes through his surgery door. Incontinent old ladies, men with eagle tattoos, traumatized widowers - Iwan's patients cause him both empathy and dismay, as he tries to do his best in a world of limited time and budgetary constraints, and in which there are no easy answers. His feelings for his partners also cause him grief: something more than friendship for the sympathetic Dr Lois Pritchard, and not a little frustration at the prankish and obstructive Dr Robert Smith. Iwan's cycling trips with his friend Arthur provide some welcome relief, but even the landscape is imbued with his patients' distress. As we explore the phantoms from Iwan's past, we too begin to feel compassion for The Bad Doctor, and ask what is the dividing line between patient and provider? Wry, comic, graphic, from the humdrum to the tragic, his patients' stories are the spokes that make Iwan's wheels go round in this humane and eloquently drawn account of a doctor's life. The Handbook of Narcissism and Narcissistic Personality Disorder - W. Keith Campbell 2011-08-09

The Handbook of Narcissism and Narcissistic Personality Disorder is the definitive resource for empirically sound information on narcissism for researchers, students, and clinicians at a time when this personality disorder has become a particularly relevant area of interest. This unique work deepens understanding of how narcissistic behavior influences behavior and impedes progress in the worlds of work, relationships, and politics.!--EndFragment--

La vita dopo il risveglio. La vera natura dell'illuminazione - Adyashanti 2010

The Ancestor Syndrome - Anne Ancelin Schutzenberger 2014-02-25
In The Ancestor Syndrome Anne Ancelin Schutzenberger explains and

provides clinical examples of her unique psychogenealogical approach to psychotherapy. She shows how, as mere links in a chain of generations, we may have no choice in having the events and traumas experienced by our ancestors visited upon us in our own lifetime. The book includes fascinating case studies and examples of 'genosociograms' (family trees) to illustrate how her clients have conquered seemingly irrational fears, psychological and even physical difficulties by discovering and understanding the parallels between their own life and the lives of their forebears. The theory of 'invisible loyalty' owed to previous generations, which may make us unwittingly re-enact their life events, is discussed in the light of ongoing research into transgenerational therapy. Anne Ancelin Schutzenberger draws on over 20 years of experience as a therapist and analyst and is a well-respected authority, particularly in the field of Group Therapy and Psychodrama. First published as *Aie, mes Aieux* this fascinating insight into a unique style of clinical work has already sold over 32,000 copies in France and will appeal to anyone working in the psychotherapy profession.

Semantic Polarities and Psychopathologies in the Family - Valeria Ugazio 2013-08-21

The gap between psychotherapeutic practice and clinical theory is ever widening. Therapists still don't know what role interpersonal relations play in the development of the most common psychopathologies. Valeria Ugazio bridges this gap by examining phobias, obsessive-compulsions, eating disorders, and depression in the context of the family, using an intersubjective approach to personality. Her concept of "semantic polarities" gives a groundbreaking perspective to the construction of meaning in the family and other interpersonal contexts. At no point is theory left in the wasteland of abstraction. The concreteness of the many case studies recounted, and examples taken from well-known novels, will allow readers to immediately connect the topics discussed with their own experience.
