*The Cruising Almanac 2023* - Cruising Association 2022-09-07

The Cruising Almanac remains the perfect onboard companion for cruising sailors. This 2023 edition is introduced by Mike Golding, OBE, who reminds us that "The Cruising Almanac provides that 'hard copy' information which today's electronic navigators so frequently lack." Compiled annually by a team of Cruising Association editors and Imray, the Almanac encompasses Northwest Europe from the Shetlands to Gibraltar and from the Baltic to the west coast of Ireland. This 2023 edition includes some changes to the presentation of essential information to make it more readily accessible. The Netherlands section has been revised so that the format conforms to the other regions. A new chapter for Northwest Spain has been created to allow more extensive overall coverage of the Spanish and Portuguese Atlantic coasts. Updating of the Almanac continues throughout the year, with corrections published monthly on the Cruising Association website Almanac corrections page.

**Inland Waterways of the Netherlands** - Louise Busby 2016-05-20

With 6,000km of navigable waterways, the Netherlands offers one of the most extensive yet compact cruising grounds in Europe. This book is a user's guide to the whole network, covering

all the mast-up routes and excluding only those waterways which offer less than 3.5m bridge height. Navigational details are provided for each waterway, comprising dimensions and obstacles to be expected, including service arrangements for bridges and locks. This is followed by details of over 300 stopping places across all 12 provinces; some which are large or popular harbours, and others which are well off the beaten track. Comments on the significant features are expanded for nearly 100 'principal venues' where more details on things to do and see are provided, as well as information on practical facilities ashore and the authors' selective and subjective restaurant tips! The book is designed to be of interest to all crew members, not just the skipper or navigator, whether its to establish how to approach a place, or to discover what to do or see of interest on arrival. Easy to browse, the book's illustrations have been selected to give a flavour of this water-loving country as well as to prepare the visiting yachtsman, whether under power or sail. This second edition has been updated with amendments to the text and maps. There are also many new photos by the authors. Louise Busby's interest in boating has led to commissions for Motor Boats Monthly as well as the Cruising Association's magazine. She is a former CA regional Almanac editor for the Netherlands and Belgium. David Broad is a detailed journal writer and log keeper, many of David's notes and sketches have been used in the compilation of this book. He is a Council member of the Cruising Association and the

Chairman of the Broom Owners Club. A website, which is a useful annexe to the book, is kept up to date with details of changes to the waterways along with useful links to further information.

**Inland Waterways of Belgium** - Jacqueline Jones 2005-01-01

There has not been a guide in English to the Inland Waterways of Belgium since E E Benest's handbook went out of print in the early 1960's. Jacqueline Jones' new guide provides detailed coverage for anyone interested in this under-rated waterway network. It is a fascinating cruising area in it's own right, with contrasting canals and navigable rivers that thread their way across both the lowlands of Flanders and the massif of the Ardennes. The Belgian waterways link Northern France with the Netherlands and Germany and this work will be essential for boats crossing borders. Jacqueline Jones's new waterway-by-waterway guide provides all the essential information for navigation, as well as details about things to do and places to see in Belgium's historic cities. Fully illustrated with clear maps and the author's photography, this book is a must for anyone cruising Belgium or en-route to the French or Dutch canals. This book comes with a folded map of the Belgian Waterways System.

When Scotland Was Jewish - Elizabeth Caldwell Hirschman 2015-05-07

The popular image of Scotland is dominated by widely recognized elements of Celtic culture. But a significant non-Celtic influence on Scotland's history has been largely ignored for centuries? This book argues that much of Scotland's history and culture from 1100

forward is Jewish. The authors provide evidence that many of the national heroes, villains, rulers, nobles, traders, merchants, bishops, guild members, burgesses, and ministers of Scotland were of Jewish descent, their ancestors originating in France and Spain. Much of the traditional historical account of Scotland, it is proposed, rests on fundamental interpretive errors, perpetuated in order to affirm Scotland's identity as a Celtic, Christian society. A more accurate and profound understanding of Scottish history has thus been buried. The authors' wide-ranging research includes examination of census records, archaeological artifacts, castle carvings, cemetery inscriptions, religious seals, coinage, burgess and guild member rolls, noble genealogies, family crests, portraiture, and geographic place names.

**Southeast Asia Cruising Guide, Volume II** - Stephen Davies 2008-01-01

This is the first of the two-volume set of the Southeast Asia Cruising Guide to reach a second edition. It is the only guide that covers the entire length and breadth of a region frequently visited by round-the-world sailors, many of whom leave Australia to head west. This edition concentrates on the most frequented routes and includes the most popular stops. There are hundreds of possible anchorages, the most popular of which are usefully summarised in tables. Introductory sections cover planning and the last part of the book deals with more general topics including advice on provisioning and the problems that are often faced by cruisers. Stephen Morgan and Elaine Davies first arrived in the region over 30 years ago. They work in Hong Kong; Stephen Davies as Director of the Hong Kong Maritime Museum and Elaine Morgan as a writer and editor. While this pilot is aimed at yachtsmen and indeed was surveyed from the Davies/Morgan yacht, it is just as relevant to the commercial or military mariner. The part of the world described in this work is one of the most interesting on our planet. Culturally, scenically, climatically and commercially; it has everything. This excellent book - now in its second edition, describes it all very enticingly. Set to the usual high standard of the Imray pilots that precede it, this one is spiced up by the wit and anecdotes the authors are so good at.

Norie's Nautical Tables - John William Norie  
2007-01-01

This famous set of mathematical tables was first published in 1803. It has been a bestseller ever since, and despite developments in electronic navigation it remains an essential requirement for anyone learning and practising astro-navigation. Last updated in 1994, the editor, George Blance, has worked for some time on the modernisation of all the tables for this major new edition. New tables have been included and obsolete ones deleted to conform with the changing techniques of navigation, with the aim of improving the accuracy of the calculated position and reducing the tedium of the calculation. All the tables required for coastal and deep sea navigation are included. A simple uniform method of interpolation for all the trigonometrical tables is used. Certain tables and data are also included which are not readily available on board ship or are only used in the examination room. The section 'Seaports of the World' has also been extensively updated and restructured with several hundred additional ports. The ports are listed geographically in the following order from Arctic Russia, Scandinavia, the Baltic Sea, the Atlantic coast of Europe, the Mediterranean Sea, West Africa, East Africa, Arabia, the Persian Gulf, the Indian sub-continent, the Far East, Australasia, the west coast of North and South America and finally the east coast of North and South America. At the back of the section is an index of the seaports.

Inland Waterways of France Volume 3 - David Edwards-May 2021-12-31

Inland Waterways of Germany - Barry Sheffield  
2016-09-23

This is the only comprehensive directory to the entire navigable German waterway system available in English. After a general introduction to the area, details of German formalities and cruising notes, each river and canal is described in detail and supported by a table of distances indicating locks, bridges, mooring places and

other features. The text is supported by small scale mapping and colour photographs. Barry Sheffield's first edition of this book was published in 1995 shortly after the reunification of Germany. He had spent several years exploring the navigable waterways and, with the assistance of Konrad Nussbaum, the acknowledged expert on German rivers and canals, he produced this authoritative work on the subject. Barry Sheffield died some years ago and this revised edition has been produced as a result of many contributions from users of the original book. Catherine and John Best have completely recompiled many of the original tables, brought information up to date and supplied excellent new photographs. Robert Thomas has contributed a more general update, in particular to the introductory sections.
