The Most Dangerous Game - Richard Connell 2020-04-21

From one of America's most popular short story writers and an Academy Award nominee: the O. Henry Award-winning tale that inspired the movie *The Hunt*. A subject of mysterious rumors and superstition, the deserted Caribbean Island was shrouded in an air of peril. To Sanger Rainsford, who fell off a yacht and washed up on its shores, the abandoned isle was a welcome paradise. But unknown to the big-game hunter, a predator lurked in its lush jungles—one more dangerous than any he had ever encountered: a human. First published in 1924, this suspenseful tale “has inspired serial killers, films and stirred controversy in schools. A century on, the story continues to thrill” (The Telegraph).

"[A] tense, relentless story of man-against-man adventure, in which the hunter Sanger Rainsford learns, at the hands of General Zaroff, what it means to be hunted." —Criterion

Breaking the Pendulum - Philip Goodman 2017-03-20

The history of criminal justice in the U.S. is often described as a pendulum, swinging back and forth between strict punishment and lenient rehabilitation. While this view is common wisdom, it is wrong. In *Breaking the Pendulum*, Philip Goodman, Joshua Page, and Michelle

Phelps systematically debunk the pendulum perspective, showing that it distorts how and why criminal justice changes. The pendulum model blinds us to the blending of penal orientations, policies, and practices, as well as the struggle between actors that shapes laws, institutions, and how we think about crime, punishment, and related issues. Through a re-analysis of more than two hundred years of penal history, starting with the rise of penitentiaries in the 19th Century and ending with ongoing efforts to roll back mass incarceration, the authors offer an alternative approach to conceptualizing penal development. Their agonistic perspective posits that struggle is the motor force of criminal justice history. Punishment expands, contracts, and morphs because of contestation between real people in real contexts, not a mechanical "swing" of the pendulum. This alternative framework is far more accurate and empowering than metaphors that ignore or downplay the importance of struggle in shaping criminal justice. This clearly written, engaging book is an invaluable resource for teachers, students, and scholars seeking to understand the past, present, and future of American criminal justice. By demonstrating the central role of struggle in generating major transformations, *Breaking the Pendulum* encourages combatants to keep fighting to change the system.

An enthralling and comprehensive look into the contemporary state of one of the wealthiest—and most misunderstood—family dynasties in the world, perfect for fans of *Succession*, *The House of Gucci*, *The Cartiers*, and *Fortune's Children*. Oil magnate J. Paul Getty, once the richest man in the world, is the patriarch of an extraordinary cast of sons, grandchildren, and great-grandchildren. While some have been brought low by mental illness, drug addiction, and one of the most sensational

kidnapping cases of the 20th century, many of Getty's heirs have achieved great success. In addition to Mark Getty, a cofounder of Getty Images, and Anne G. Earhart, an award-winning environmentalist, others have made significant marks in a variety of fields, from music and viniculture to politics and LGBTQ rights. Now, across four continents, a new generation of lively, unique, and even outrageous Gettys are emerging, and not coasting on the dynasty's still-immense wealth. August Getty designs extravagant gowns worn by Katy Perry, Cher, and other stars; his sibling, Nats—a fellow LGBTQ rights activist who announced his gender transition following his wedding to transgender icon Gigi Gorgeous—produces a line of exclusive streetwear. Their fascinating cousins include Balthazar, a multi-hyphenate actor-director-DJ-designer, and Isabel, a singer-songwriter-MBA candidate. A far-flung yet surprisingly close-knit group, the ascendant Gettys are bringing this iconic family onto the global stage in the 21st century. Through extensive research, including access to J. Paul Getty's diaries and love letters, and fresh interviews with family members and friends, *Growing Up Getty* offers an inside look into the benefits and burdens of being part of today's world of the ultra-wealthy.

Human activity during the Anthropocene has transformed landscapes worldwide on a scale that rivals or exceeds even the largest of natural forces. Landscape ecology has emerged as a science to investigate the

interactions between natural and anthropogenic landscapes and ecological processes across a wide range of scales and systems: from the effects of habitat or resource distributions on the individual movements, gene flow, and population dynamics of plants and animals; to the human alteration of landscapes affecting the structure of biological communities and the functioning of entire ecosystems; to the sustainable management of natural resources and the ecosystem goods and services upon which society depends. This novel and comprehensive text presents the principles, theory, methods, and applications of landscape ecology in an engaging and accessible format that is supplemented by numerous examples and case studies from a variety of systems, including freshwater and marine "scapes".

The Man Who Knew - Sebastian Mallaby 2016-10-11

"Exceptional . . . Deeply researched and elegantly written . . . As a description of the politics and pressures under which modern independent central banking has to operate, the book is incomparable."
—Financial Times The definitive biography of the most important economic statesman of our time Sebastian Mallaby's magisterial biography of Alan Greenspan, the product of over five years of research based on untrammelled access to his subject and his closest professional and personal intimates, brings into vivid focus the mysterious point where the government and the economy meet. To understand

Greenspan's story is to see the economic and political landscape of our time—and the presidency from Reagan to George W. Bush—in a whole new light. As the most influential economic statesman of his age, Greenspan spent a lifetime grappling with a momentous shift: the transformation of finance from the fixed and regulated system of the post-war era to the free-for-all of the past quarter century. The story of Greenspan is also the story of the making of modern finance, for good and for ill. Greenspan's life is a quintessential American success story: raised by a single mother in the Jewish émigré community of Washington Heights, he was a math prodigy who found a niche as a stats-crunching consultant. A master at explaining the economic weather to captains of industry, he translated that skill into advising Richard Nixon in his 1968 campaign. This led to a perch on the White House Council of Economic Advisers, and then to a dazzling array of business and government roles, from which the path to the Fed was relatively clear. A fire-breathing libertarian and disciple of Ayn Rand in his youth who once called the Fed's creation a historic mistake, Mallaby shows how Greenspan reinvented himself as a pragmatist once in power. In his analysis, and in his core mission of keeping inflation in check, he was a maestro indeed, and hailed as such. At his retirement in 2006, he was lauded as the age's necessary man, the veritable God in the machine, the global economy's avatar. His memoirs sold for record sums to publishers around the world. But then came 2008. Mallaby's story lands with both feet on the great crash which did so much to damage Alan Greenspan's reputation. Mallaby argues that the conventional wisdom is off base: Greenspan wasn't a naïve ideologue who believed greater regulation was unnecessary. He had pressed for greater regulation of some key areas of finance over the years, and had gotten nowhere. To argue that he didn't know the risks in irrational markets is to miss the point. He knew more than almost anyone; the question is why he didn't act, and whether anyone else could or would have. A close reading of Greenspan's life provides fascinating answers to these questions, answers whose lessons we would do well to heed. Because perhaps Mallaby's greatest lesson is that economic statesmanship, like political statesmanship, is the art of

the possible. *The Man Who Knew* is a searching reckoning with what exactly comprised the art, and the possible, in the career of Alan Greenspan.

Being a Teacher | Researcher - Konstantinos Alexakos 2015-12-01

Using a sociocultural approach to critical action research, this book is a primer in doing reflexive, authentic inquiry research in teaching and learning for educators as teacher | researchers. Rather than the artificial dichotomy between theory and practice, the roles of teacher and researcher are instead seen in a dialectic relationship (indicated by the symbol | in teacher | researcher) in which each informs and mediates the other in the process of revising and generating new knowledge that is of benefit to those being researched. In addition to providing a theoretical foundation for authentic inquiry, *Being a Teacher | Researcher* provides a detailed framework with ideas and strategies that interested educators can apply in exploring teaching and learning in both formal and informal settings. It provides concrete examples of how to use authentic inquiry as a basis for collaborating with others to improve the quality of teaching and learning while cogenerating new theory and associated practices that bridge what has been described as a theory-practice divide. Included in this book are how to plan and carry out authentic inquiry studies, choosing appropriate methodologies, methods of data collection and analysis, negotiating research with human participants, using authenticity criteria and characteristics, and addressing challenges and conflicts for teacher | researchers. As a primer, this book serves the needs of many different populations including prospective and practicing teachers, teacher educators, beginning researchers and seasoned researchers who are making changes to what and how they research.
