which famous masters win their games. How do they find those fantastic moves? Do they have special vision? And why do computers outwit us tactically? Forcing Chess Moves proposes a revolutionary method for finding winning moves. Charles Hertan has made an astonishing discovery: the failure to consider key moves is often due to human bias. Your brain tends to disregard many winning moves because they are counter-intuitive or look unnatural. It's a fact of life: computers outdo us humans when it comes to tactical vision and brute force calculation. So why not learn from them? Charles Hertan's radically different approach is: use COMPUTER EYES and always look for the most forcing move first. By studying forcing sequences according to Hertan's method you will: Develop analytical precision Improve your tactical vision Overcome human bias and staleness Enjoy the calculation of difficult positions Win more games by recognizing moves that matter. This New and Extended Fourth Edition of Hertan's award-

winning modern classic includes 50 extra pages with new and instructive combinations. There is a foreword by three-time US chess champion Joel Benjamin, and a special foreword to this new edition by Swedish Grandmaster Pontus Carlsson.

All the Wrong Moves - Sasha Chapin

2019-08-13

An enthralling journey into the world of chess--a story of heartbreak, obsession, failure, and the hunger for greatness Sasha Chapin is a victim of chess. Like countless amateurs before him-- Albert Einstein, Humphrey Bogart, Marcel Duchamp--the game has consumed his life and his mind. First captivated by it as a member of

his high school chess club, his passion was rekindled during an accidental encounter with chess hustlers on the streets of Kathmandu. In its aftermath, he forgot how to care about anything else. He played at all hours, for weeks at a time. Like a spurned lover, he tried to move on, but he found the game more seductive the more he resisted it. And so, he thought, if he can't defeat his obsession, he had to succumb to it. All the Wrong Moves traces Chapin's rollicking two-year journey around the globe in search of glory. Along the way, he chronicles the highs and lows of his fixation, driven on this quest by lust, terror, and the elusive possibility of victory. Stylish, inventive, and laugh-out-loud funny, All the Wrong Moves is a celebration of the purity, violence, and beauty of the game.

A follow-up to Neil McDonald's incredibly successful 'Chess: The Art of Logical Thinking', this insightful book takes a close look at some of the most outstanding games from the last 6 years, commenting on every single move as the game unfolds. This time, however, the emphasis is on planning, and how players plan their strategy many moves ahead. The author's detailed approach gives you a rare opportunity to really get to the nitty-gritty of what goes through grandmasters' minds as they play. To avoid unnecessary repetition, the opening moves of each game are discussed more lightly - real discussion begins around the 10th move, which is where the planning stage really kicks in.

How to Open a Chess Game - Larry Evans 2009-07-01

This is one of the most interesting, most unusual

and most instructive chess books ever written. It is the combined work of seven of the world's strongest grandmasters: Larry Evans, Paul Keres, Svetozar Gligoric, Vlastimil Hort, Bent Larsen, Tigran Petrosian and Lajos Portisch. What makes this book especially great and useful is that each of these seven grandmasters had vastly different styles. For example, Bent Larsen used wild, unorthodox attacking lines, whereas Petrosian, who was capable of attacking when he wanted to, preferred to sniff out his opponent's chances and wait for the opponent to attack unsoundly and fall upon his own sword.

FCO - Fundamental Chess Openings - Paul van der Sterren 2009

* The perfect survival guide to the chess openings * All openings covered * Detailed verbal explanations of plans for both sides * Up-to-date and featuring many tips and recommendations * Insights into the 'character' of each opening * Written by one of the world's foremost opening experts The first moves of a

chess game define the nature of the whole struggle, as both players stake their claim to the critical squares and start to develop their plans. It is essential to play purposefully and to avoid falling into traps or reaching a position that you don't understand. This is not a book that provides masses of variations to memorize. Paul van der Sterren instead offers a wealth of ideas and explanation, together with the basic variations of each and every opening. This knowledge will equip players to succeed in the opening up to good club level, and provide a superb grounding in opening play on which to build a more sophisticated repertoire. The strategies he explains will, unlike ever-changing chess opening theory, remain valid as long as chess is played, and so the time spent studying this book will be rewarded many times over.

How to Choose a Chess Move - Andrew Soltis

The Amateur's Mind - Jeremy Silman 1999

This book takes the student on a journey through his own mind and returns him to the chess board with a wealth of new-found knowledge and the promise of a significant gain in strength. Most amateurs possess erroneous thinking processes that remain with them throughout their chess lives. These flaws in their mental armour result

in stinging defeats and painful reversals. Books can be bought and studied, lessons can be taken -- but in the end, these elusive problems always prove to be extremely difficult to eradicate. Seeking a solution to this dilemma, the author wrote down the thoughts of his students while they played actual games, analysed them, and catalogued the most common misconceptions that arose. This second edition greatly expands on the information contained in the popular first edition.

The Grünfeld - Valentin Bogdanov 2009-02-19
Chess Explained books provide an understanding of an opening and the middlegames to which it leads, enabling you to find the right moves and plans in your own

games. It is as if you were sitting at the board with a chess coach answering your questions about the plans for both sides, the ideas behind particular moves, and what specific knowledge you need to have. The Grünfeld Defence is one of the most aggressive openings at Black's disposal. He creates immediate imbalance and plans to strike at White's centre with all available resources. An insipid response from White may not even retain equality, so in the main lines he takes up the gauntlet: he creates a large pawn-centre and puts this to use to launch an attack. While the theory of these lines has been extensively developed, there is a coherent logical thread running through them: the Grünfeld is essentially an opening of grand ideas, which need to be understood well in order to get to grips with the theory and handle the resulting positions. This book provides a discussion of all major lines, and a special contribution from Viacheslav Eingorn on the key ideas of the Rb1 Exchange main line, which he

was instrumental in developing in the 1970s and 1980s.

Invisible Chess Moves - Emmanuel Neiman

2014-02-01

Every chess player knows that some moves are harder to see than others. Why is it that, frequently, uncomplicated wins simply do not enter your mind? Even strong grandmasters suffer from blind spots that obscure some of the best ideas during a game. What is more: often both players fail to see the opportunity that is right in front of their eyes. Neiman and Afek have researched this problem and discovered that there are actually reasons why your brain discards certain ideas. In this book they demonstrate different categories of hard-to-see

chess moves and clearly explain the psychological, positional and geometric factors which cloud your brain. *Invisible Chess Moves* with its many unique examples, instructive explanations and illuminative tests, will teach how to discover your blind spots and see the moves which remain invisible for others. Your results at the board will improve dramatically because your brain will stop blocking winning ideas.
