Patient-Provider  
Communication: Roles for  
Speech-Language Pathologists

and Other Health Care  
Professionals presents timely  
information regarding effective  
patient-centered  
communication across a variety  
of health care settings. Speech-

language pathologists, who serve the communication needs of children and adults, as well as professionals from medical and allied health fields will benefit from this valuable resource. This text is particularly relevant because of changes in health care law and policy. It focuses on value-based care, patient engagement, and positive patient experiences that produce better outcomes. Authors describe evidence-based strategies that support communication vulnerable patients, including individuals who have difficulty speaking, hearing, understanding, seeing, reading, and writing, as well as patients whose challenges reflect limited health literacy, and/or differences in language, culture, religion, sexual orientation, and so on. Topics addressed include patient-provider communication in medical education, emergency and disaster scenarios, doctor's offices and clinics, adult and pediatric acute care settings, rehabilitation, long-term

residential care, and hospice/palliative care situations. The editors are recognized internationally for their work in the field of communication disorders and have been active in the area of patient-provider communication for many years. Patient-Provider Communication is a must-have resource for speech-language pathologists and other health care providers at the forefront of quality patient-centered care.

Disorders - Audrey L. Holland  
2018-06-29

Now in its third edition, *Counseling in Communication Disorders: A Wellness Perspective* continues to be an essential and admired text for counseling related courses in graduate speech-language pathology and audiology programs. The counseling skills introduced in this book are based on the model of positive psychology, a rapidly growing branch of psychology that focuses on mental health and well-being and how to achieve and maintain these states. By incorporating the key elements of positive psychology into clinical practice, clinicians can more effectively help patients live productively and successfully with their communication disorders. The authors offer examples, exercises, and specific techniques for working with individuals and their families across the spectrum of communication disorders, from infancy through end-of-life needs. In addition, they also feature one-on-one activities

and model workshop examples for use in teaching counseling strategies to groups or classes. New to the Third Edition: Expanded information on issues concerning cultural diversity, especially in regard to children and their families Expanded strategies for recognizing and growing strengths in family dynamics including early intervention. Extended considerations for counseling individuals and families when deterioration of abilities is expected. More in-depth information on the unique problems of persons with mild cognitive impairment, primary progressive aphasia, and chronic traumatic encephalopathy. Updates on findings and issues in Positive Psychology Information introducing clinicians and students to Posttraumatic Growth and its relevance to the field Updated counseling literature throughout With its updates and additions, *Counseling in Communication Disorders: A Wellness Perspective*, Third Edition, is

destined to remain a popular resource and teaching tool for developing speech-language pathologists and audiologists.

**Counseling the Communicatively Disabled and Their Families** - George H. Shames 2006-01-01

Counseling the Communicatively Disabled and Their Families: A Manual for Clinicians, Second Edition, written by George H. Shames, emphasizes the development of specific interviewing and counseling skills for speech-language pathologists and audiologists, which is now a requirement of ASHA's clinical certification standards. The book offers a clear, basic definition of counseling then builds a picture of the multidimensional role of counseling in speech-language pathology and audiology using anecdotal references to clinical cases. Among the changes in the Second Edition, Dr. Shames, a licensed speech-language pathologist as well as a licensed clinical psychologist, has expanded the theoretical overviews that ground the

"learning by doing" skill development feature of this updated edition. Practicing clinicians and students in communication disorders programs, in addition to social workers and clinical psychologists, will find this book invaluable to their training as focused, helpful evaluators and counselors of the communicatively disabled. It will also apply to training in other contexts and circumstances wherein counseling is appropriate.

**Medical Speech-Language Pathology** - Alex F. Johnson 2011-01-01

The second edition of Medical Speech--Language Pathology: A Practitioner's Guide presents the latest information on neurological communication disorders and swallowing and voice disorders in adults. The book features complete coverage of the pathophysiology of communication disorders, describing the underlying degenerative, neurogenic, and psychogenic causes of speech-language impairments. A

thorough review of the theoretical issues involved provides practitioners with the conceptual framework needed to develop effective treatments that address both functionality and the quality of life of the patient. Features: Practical approaches to the diagnosis and management of common disorders such as aphasia, dysphagia, and more Strategies for rehabilitating patients with conditions such as head and neck cancer and dementia Comprehensive discussion of service delivery issues, such as the interface between speech--language pathology and psychiatry, and approaches to patient management in acute care and intensive care settings Study questions at the end of each chapter--ideal for reviewing key concepts Extensive lists of references to aid pursuit of topics in more depth Medical Speech--Language Pathology serves the needs of all speech--language pathologists, otolaryngologists, neurologists, psychiatrists, researchers, and students in these specialties for a single-

volume reference on all aspects of care for patients with communication disorders.

**Foundations of Communication Sciences & Disorders** - Paul T. Fogle 2008

Full-color textbook introducing concepts in communication sciences and disorders. Written in accessible, engaging and caring language, it is rooted in the American Speech-Language-Hearing Association's "Big Nine" knowledge and skill areas. Units provide cohesive "big picture" introductions and conclusions, while individual chapters focus on key information in smaller, more detailed packages. Going beyond expectations for an introductory text, it explores the emotional and social effects of disorders to help readers truly understand the profession.

**Counseling in Audiologic Practice** - John Greer Clark 2004

"Counseling in Audiologic Practice" is designed to guide students and practicing audiologists in the mastery of

counseling skills to meet the needs of patients and families suffering from hearing loss. This text examines the range of emotions experienced by parents following the diagnosis of pediatric hearing loss as well as the less recognized emotional impact accompanying adult hearing loss. Discussion based upon counseling theory reveals the variety of dynamics within audiologists' interactions with patients to help clinicians more completely address the personal adjustment/support counseling needs of individuals, families, and groups as well as those approaching audiologic services from within the context of a culturally divergent background. Features: Clearly identified learning objectives at the beginning of each chapter emphasize key elements to be learned from the chapter. Chapter opening vignettes set the tone for the information to follow within a given chapter. Tables and illustrations throughout text summarize and

highlight discussion. Vignettes throughout each chapter illustrate key points with real life examples. Summary questions at the end of each chapter provide means for review and test of material covered. Exercises at the end of each chapter help to develop key counselor attributes and skills. Appendices at the end of text provide readily available information and handouts for clinical use. Counseling Growth Checklist final appendix allows students and clinical supervisors to monitor the development of audiologic counseling skills within a clinical environment. Working with Families in Speech-language Pathology - Nicole Watts Pappas  
2008-11-01

This book links research to clinical practice with studies of parents' perceptions of their involvement in their child's intervention, and their relationship with the Speech-Language Pathologist (SLP) being used to inform clinicians of the most effective ways of interacting with and involving

parents in SLP intervention. A series of chapters covering the evidence base of effectiveness of parent and family involvement in different areas of SLP clinical practice also inform readers of what methods of parental involvement have been proven to increase child and family outcomes. Sections on practical tips for involving families and individual case studies facilitate the readers' knowledge of how to use family-friendly principles in practice.

Speech-language pathologists and audiologists receive little formal training in dealing with the emotional issues that will confront clients who have communication disorders. The families of those clients also need support in addressing emotions concomitant with communication disorders. Often, the humanistic elements of treatment are superficially addressed, if at all. How therapists deal with these issues, however, has an enormous impact on the effectiveness of their clinical efforts. Luterman addresses

this lack of attention to emotions. In addition to the expertise of trained, experienced counselors, the new edition of this popular book also discusses some of today's hot topics. These topics include how to work with the chronically ill and their families and the consequences of the advent of universal screening of newborns. Both issues are having an increasing impact on the dynamics of the therapist-client relationship and require greater sensitivity to the particular needs of the clients and their families.

## **Audiology Services in Diverse Communities -**

Alejandra Ullauri 2021-08-23  
As the population in the U.S. becomes more diverse, health care professionals have a responsibility to adapt their services to meet the needs of the diverse populations they serve. However, many providers lack access to the appropriate resources to provide high quality care to their Spanish-speaking patients. Audiology Services in Diverse Communities is a professional resource designed to decrease language barriers, improve patient-clinician interactions, and create more culturally competent hearing services. Written by a clinician for clinicians working on a daily basis with minority communities experiencing existing systemic barriers, this unique text begins with an overview of cultural competence and the barriers that exist in audiology services. The text continues an evidence-based, cross-cultural approach to addressing some of those barriers and generating a discussion of what professionals can do in their

own clinical settings. The final, and largest, section of the text is a language tool presented in both English and Spanish to aid clinicians as they communicate and work with Spanish-speaking patients. Key Features: \* The only book that provides clinicians with a compilation of resources, in English and Spanish, ready to use in clinic \* More than 25 resources such as clinical history forms, test instructions, standardized questionnaires, self-assessment tools available in English and Spanish to help clinicians provide with language concordance during clinical encounters. \* Evidence-based ideas that can help clinicians assess, develop, implement, and monitor cultural-competent services \* A unique format that allows clinicians to visualize English resources on the left-side and Spanish resources on the right-side, facilitating communication between patient and clinician

Therapeutic Processes for Communication Disorders - Robert J. Fourie 2010-11-25

Why do many people with disorders of communication experience a sense of demoralization? Do these subjective experiences have any bearing on how such problems should be treated? How can professionals dealing with speech, language, hearing and other communication disorders analyse and respond to the subjective and relational needs of clients with such problems? In this book, authors in the fields of communication disorders analyse the psychological, social and linguistic processes and interactions that underpin clinical practice, from both client and clinician perspectives. The chapters demonstrate how it is possible to analyze and understand client-clinician discourse using qualitative research, and describe various challenges to establishing relationships such as cultural, gender and age differences. The authors go on to describe self-care processes, the therapeutic use of the self, and various psychological factors that could be important

for developing therapeutic relationships. Also covered are the rarely considered topics of spirituality and transpersonal issues, which may at times be relevant to clinicians working with clients who have debilitating, degenerative and terminal illnesses associated with certain communication disorders. While this book is geared toward the needs of practicing and training speech, language and hearing clinicians, other professional such as teachers of the deaf, psychotherapists, nurses, and occupational therapists will find the ideas relevant, interesting and easily translatable for use in their own clinical practice.

**Speech and Voice Science, Fourth Edition** - Alison Behrman 2021-06-25  
Speech and Voice Science, Fourth Edition is the only textbook to provide comprehensive and detailed information on both voice source and vocal tract contributions to speech production. In addition, it is the only textbook to address

dialectical and nonnative language differences in vowel and consonant production, bias in perception of speaker identity, and prosody (suprasegmental features) in detail. With the new edition, clinical application is integrated throughout the text. Due to its highly readable writing style being user-friendly for all levels of students, instructors report using this book for a wide variety of courses, including undergraduate and graduate courses in acoustic phonetics, speech science, instrumentation, and voice disorders. Heavily revised and updated, this fourth edition offers multiple new resources for instructors and students to enhance classroom learning and active student participation. At the same time, this text provides flexibility to allow instructors to construct a classroom learning experience that best suits their course objectives. Speech and Voice Science now has an accompanying workbook for students by Alison Behrman

and Donald Finan! New to the Fourth Edition: \* Sixteen new illustrations and nineteen revised illustrations, many now in color \* New coverage of topics related to diversity, including: \* Dialectical and nonnative language differences in vowel and consonant production and what makes all of us have an “accent” (Chapter 7—Vowels and Chapter 8—Consonants) \* How suprasegmental features are shaped by dialect and accent (Chapter 9—Prosody) \* Perception of speaker identity, including race/ethnicity, gender, and accent (Chapter 11- Speech Perception) \* Increased focus on clinical application throughout each chapter, including three new sections \* Updated Chapter 4 (Breathing) includes enhanced discussion of speech breathing and new accompanying illustrations. \* Updated Chapter 10 (Theories of Speech Production) now includes the DIVA Model, motor learning theory, and clinical applications \* Updated Chapter 11 (Speech Perception) now

includes revised Motor Learning theory, Mirror Neurons, and clinical applications \* Expanded guide for students on best practices for studying in Chapter 1 (Introduction) Key Features: \* A two-color interior to provide increased readability \* Heavily illustrated, including color figures, to enhance information provided in the text \* Forty-nine spectrogram figures provide increased clarity of key acoustic features of vowels and consonants \* Fourteen clinical cases throughout the book to help students apply speech science principles to clinical practice Disclaimer: Please note that ancillary content (such as documents, audio, and video, etc.) may not be included as published in the original print version of this book.

## Counseling in Speech-Language Pathology and Audiology - Anthony DiLollo 2020-11-03

Counseling in the field of communication disorders is an essential dimension of professional practice, but just what it entails is often a bit of a mystery. Counseling in Speech-Language Pathology and Audiology: Reconstructing Personal Narratives, Second Edition addresses this common concern of students and practitioners by illustrating how to integrate the concept of counseling into clinical practice. Replete with a variety

of case studies, clinical guidelines, and actual transcripts of counseling interventions with clients and their families, as well as a practical "toolbox" of specific counseling techniques, this graduate-level textbook offers a comprehensive, novel, and empirically informed approach to counseling, applicable to a broad range of speech, language, swallowing, and hearing disorders. New to the Second Edition: \* 10 new chapters on the nature of change, critical thinking, culturally informed care, and preparing for the counseling relationship. \* A new case illustration and three new "tools". \* A new Foreword by Sue Hale, MCD. \* Reorganized for improved flow of information with earlier introduction of the central framework, followed by chapters to build foundational knowledge and skills. The central framework for counseling has been simplified and reconfigured for easier integration into clinical practice. \* Based on user

feedback, the "theory" chapters from the first edition have been dropped to make room for the added "knowledge and skill" chapters, giving the book a more practical feel. \* Discussion topics have been added at the end of all chapters in Parts I, II, and III. New images and illustrations throughout. Updated to reflect current research, with many new references added. \* Brief video commentaries by the authors introducing and discussing the main points for each chapter.

Tinnitus Retraining Therapy -

James A. Henry 2007

Tinnitus and oversensitivity to sound are common and hitherto incurable, distressing conditions that affect a substantial number of the population. Pawel Jastreboff's discovery of the mechanisms by which tinnitus and decreased sound tolerance occur has led to a new and effective treatment called Tinnitus Retraining Therapy (TRT). Audiologists, ENT specialists, psychologists and counsellors around the world currently practise this technique, with very high success rates. TRT, the treatment developed by the authors from the model, has

already proved to be the most effective and most widely practised worldwide. This book presents a definitive description and justification for the Jastreboff neurophysiological model of tinnitus, outlining the essentials of TRT, reviewing the research literature justifying their claims, and providing an expert critique of other therapeutic practices.

*Counseling-Infused Audiologic Care* - Kristina M English  
2018-09-17

The first edition of *Counseling-Infused Audiologic Care* was selected by the American Academy of Audiology as one of the top 25 audiology texts published in the past 25 years. Considered the seminal work on the subject of audiologic counseling, this text is presented as a straight forward, practical guide to audiological counseling and rehabilitation, founded on evidence-based practice. Clark and English have written the most applicable text on the market specific to the unique challenges presented when counseling persons with hearing loss. The authors  
**Counseling in  
Communication Disorders -**

Cyndi Stein-Rubin 2016-09-08  
Incorporating a counseling paradigm has been shown to increase motivation, deepen learning, and sustain progress for clients and families. *Counseling in Communication Disorders: Facilitating the Therapeutic Relationship* by Cyndi Stein-Rubin and Beryl T. Adler, is an engaging textbook, written in a genuine and lively tone, so that the reader may easily relate to the material. The text provides a practical vehicle for speech-language pathology students, clinicians, clinical supervisors, and instructors to get to know themselves better and to integrate basic counseling attitudes and tools into their diagnostic and therapeutic programs. Inside *Counseling in Communication Disorders*, Stein-Rubin and Adler describe the importance of addressing a client's communication challenges by working with the whole person, as a human being, not as a communication disorder. By approaching clients with a counseling attitude that encourages the

client's full participation in the treatment process, we then work together in partnership and as a powerful team. The content, techniques, and exercises within Counseling in Communication Disorders are rooted in evidence-based practice from a variety of psychological, counseling, and coaching approaches, such as Humanistic Counseling, Listening and Language, Narrative Therapy, The Cognitive Behavioral Model (CBT), Solution-Focused Brief Therapy (SFBT), Positive Psychology, Neurolinguistic Programming (NLP), and Mindfulness training. Counseling in Communication Disorders also includes reflective questions, exercises, and suggestions to reinforce important concepts. To bring the content to life, real-life and clinical scenarios are interspersed throughout the text. It is well understood that speech-language pathology and audiology clinicians must understand deep listening and how to choose words that will have a positive impact on their

client and families, but often overlooked is the personal development of the clinicians themselves. Counseling in Communication Disorders is a comprehensive guide on how to provide the necessary support and encouragement to clients and build self-esteem, while a major focus is the need for the clinicians to work on self before working on other. Counseling in Communication Disorders: Facilitating the Therapeutic Relationship is the first textbook of its kind to comprehensively cover both sides of the therapeutic relationship. Students and clinicians alike will appreciate this unique approach that addresses not only the counseling attitude that is vital to the growth and progress of clients, but also the self-awareness that guides the personal development of the clinician.
