Minority Serving Institutions - National Academies of Sciences, Engineering, and Medicine 2019-03-05

There are over 20 million young people of color in the United States whose representation in STEM education pathways and in the STEM workforce is still far below their numbers in the general population. Their participation could help re-establish the United States' preeminence in STEM innovation and productivity, while also increasing the number of well-educated STEM workers. There are nearly 700 minority-serving institutions (MSIs) that provide pathways to STEM educational success and workforce readiness for millions of students of color and do so in a mission-driven and intentional manner. They vary substantially in their origins, missions, student demographics, and levels of institutional selectivity. But in general, their service to the nation provides a gateway to higher education and the workforce, particularly for underrepresented students of color and those from low-income and first-generation to college backgrounds. The challenge for the nation is how to capitalize on the unique strengths and attributes of these institutions and to equip them with the resources, exceptional faculty talent, and vital infrastructure needed to educate and train an increasingly critical portion of current and future generations of scientists, engineers, and health professionals. *Minority Serving Institutions* examines the nation's MSIs and identifies promising programs and effective strategies that have the highest potential return on investment for the nation by increasing the quantity and quality of MSI STEM graduates. This study also provides critical information and perspective about the importance of MSIs to other stakeholders in the nation's system of higher education and the organizations that support them.

Medicare Laboratory Payment Policy - Institute of Medicine 2000-12-04

Clinical laboratory tests play an integral role in helping physicians diagnose and treat patients. New developments in laboratory technology offer the prospect of improvements in diagnosis and care, but will place an increased burden on the payment system. Medicare, the federal program providing coverage of health-care services for the elderly and disabled, is the largest payer of clinical laboratory services. Originally designed in the early 1980s, Medicare's payment policy methodology for outpatient laboratory services has not evolved to take into account technology, market, and regulatory changes, and is now outdated. This report examines the current Medicare payment methodology for outpatient clinical laboratory services in the context of environmental and technological trends, evaluates payment policy alternatives, and makes recommendations to improve the system.

Transfer of Business and Acquired Employee Rights - Jens Kirchner 2016-07-01

This book provides practical, business-orientated and accessible guidance on key employment and labour law aspects in national and international transfers of business in the European Union, its member states and selected important countries around the world. It contains a comprehensive overview of relevant topics such as safeguarding of employees' rights, impacts on employees' representatives and on collective agreements, company pension entitlements, insolvency, M&A transactions and cross-border transfers of business for each country covered. This overview is accompanied by summaries of leading case law and excerpts of important national regulations. Transfers of business play an important role in today's globalised business world. In particular, employment and labour impacts of transfers of businesses are often a driving legal and business factor in national and international restructurings and M&A transactions. The successful implementation of transfers of business requires to recognise and comply with the relevant legal frameworks of the countries involved. This publication is written by specialised employment lawyers from around the globe and addresses in-house counsels, human resources managers and legal advisors in charge of or accompanying national or international transactions.
