How the French Think - Sudhir Hazareesingh
2015-09-22

In France, perhaps more so than anywhere else, intellectual activity is a way of life embraced by the majority of society, not just a small group of élite thinkers. And because French thought has also shaped the Western world, Sudhir Hazareesingh argues in *How the French Think*, we cannot hope to understand modern history without first making sense of the French mind-set. Hazareesingh traces the evolution of French thought from Descartes and Rousseau to Sartre and Derrida. In the French intellectual tradition, he shows, recurring themes have pervaded nearly every aspect of French life, from the rhetorical flair once embodied by the philosophes to the country's modern embrace of secularism. Sweeping aside generalizations and easy stereotypes, Hazareesingh offers an erudite portrait of the venerated tradition of French thought and the people who embody it.

The Autonomy of Labour Law - Alan Bogg
2015-03-26

To what extent is labour law an autonomous field of study? This book is based upon the papers written by a group of leading international scholars on this theme, delivered at a conference to mark Professor Mark Freedland's retirement from his teaching fellowship in Oxford. The chapters explore the boundaries and connections between labour law and other legal disciplines such as company law,

competition law, contract law and public law; labour law and legal methodologies such as reflexive governance and comparative law; and labour law and other disciplines such as ethics, economics and political philosophy. In so doing, it represents a cross-section of the most sophisticated current work at the cutting edge of labour law theory.

The Frontman - Harry Browne 2013-06-04
Celebrity philanthropy comes in many guises, but no single figure better encapsulates its delusions, pretensions and wrongheadedness

than U2's iconic frontman, Bono—a fact neither sunglasses nor leather pants can hide. More than a mere philanthropist—indeed, he lags behind many of his peers when it comes to parting with his own money—Bono is better described as an advocate, one who has become an unwitting symbol of a complacent wealthy Western elite. The Frontman reveals how Bono moved his investments to Amsterdam to evade Irish taxes; his paternalistic and often bullying advocacy of neoliberal solutions in Africa; his multinational business interests; and his hobnobbing with Paul Wolfowitz and shock-doctrine economist Jeffrey Sachs. Carefully dissecting the rhetoric and actions of Bono the political operator, *The Frontman* shows him to be an ambassador for imperial exploitation, a man who has turned his attention to a world of savage injustice, inequality and exploitation—and helped make it worse.

Orwell on Truth - George Orwell 2017-11-23

A selection of George Orwell's prescient, clear-eyed and stimulating writing on the subjects of truth and lies. With an introduction by Alan Johnson. 'Freedom is the freedom to say that two plus two equals four. If that is granted, all else follows.' This selection of George Orwell's writing, from both his novels and non-fiction, gathers together his thoughts on the subject of truth. It ranges from discussion of personal honesty and morality, to freedom of speech and political propaganda. Orwell's unique clarity of thought and illuminating scepticism provide the perfect defence against our post-truth world of fake news and confusion. 'The further a society drifts from the truth, the more it will hate those that speak it.' Includes an introduction by Alan Johnson and passages from *Burmese Days*, *The Road to Wigan Pier*, *Coming Up for Air*, *The Lion and the Unicorn*, *Animal Farm*, *Nineteen Eighty-Four*, Orwell's letters, war-time diary, criticism and essays including 'Fascism and Democracy', 'Culture and Democracy', 'Looking Back on the Spanish War', 'As I Please', 'Notes on Nationalism', 'The Prevention of Literature', 'Politics and the English Language' and 'Why I Write'.

Inside the Gas Chambers - Shlomo Venezia 2013-12-06

This is a unique, eye-witness account of everyday life right at the heart of the Nazi

extermination machine. Shlomo Venezia was born into a poor Jewish-Italian community living in Thessaloniki, Greece. At first, the occupying Italians protected his family; but when the Germans invaded, the Venezias were deported to Auschwitz. His mother and sisters disappeared on arrival, and he learned, at first with disbelief, that they had almost certainly been gassed. Given the chance to earn a little extra bread, he agreed to become a 'Sonderkommando', without realising what this entailed. He soon found himself a member of the 'special unit' responsible for removing the corpses from the gas chambers and burning their bodies. Dispassionately, he details the grim round of daily tasks, evokes the terror inspired by the man in charge of the crematoria, 'Angel of Death' Otto Moll, and recounts the attempts made by some of the prisoners to escape, including the revolt of October 1944. It is usual to imagine that none of those who went into the gas chambers at Auschwitz ever emerged to tell their tale - but, as a member of a 'Sonderkommando', Shlomo Venezia was given this horrific privilege. He knew that, having witnessed the unspeakable, he in turn would probably be eliminated by the SS in case he ever told his tale. He survived: this is his story. Published in association with the United States Holocaust Memorial Museum.

LA LIGURIA - Antonio Giangrande

E' comodo definirsi scrittori da parte di chi non ha arte né parte. I letterati, che non siano poeti, cioè scrittori stringati, si dividono in narratori e saggisti. E' facile scrivere "C'era una volta..." e parlare di cazzate con nomi di fantasia. In questo modo il successo è assicurato e non hai rompiballe che si sentono diffamati e che ti querelano e che, spesso, sono gli stessi che ti condannano. Meno facile è essere saggisti e scrivere "C'è adesso..." e parlare di cose reali con nomi e cognomi. Impossibile poi è essere saggisti e scrivere delle malefatte dei magistrati e del Potere in generale, che per logica ti perseguitano per farti cessare di scrivere. Devastante è farlo senza essere di sinistra. Quando si parla di veri scrittori ci si ricordi di Dante Alighieri e della fine che fece il primo saggista mondiale. Le vittime, vere o presunte, di soprusi, parlano solo di loro, inascoltati, pretendendo aiuto. Io da vittima non racconto di

me e delle mie traversie. Ascoltato e seguito, parlo degli altri, vittime o carnefici, che l'aiuto cercato non lo concederanno mai. "Chi non conosce la verità è uno sciocco, ma chi, conoscendola, la chiama bugia, è un delinquente". Aforisma di Bertolt Brecht. Bene. Tante verità soggettive e tante omertà son tasselli che la mente corrompono. Io le cerco, le filtro e nei miei libri compongo il puzzle, svelando l'immagine che dimostra la verità oggettiva censurata da interessi economici ed ideologie vetuste e criminali. Rappresentare con verità storica, anche scomoda ai potenti di turno, la realtà contemporanea, rapportandola al passato e proiettandola al futuro. Per non reiterare vecchi errori. Perché la massa dimentica o non conosce. Denuncio i difetti e caldeggio i pregi italiani. Perché non abbiamo orgoglio e dignità per migliorarci e perché non sappiamo apprezzare, tutelare e promuovere quello che abbiamo ereditato dai nostri avi. Insomma, siamo bravi a farci del male e qualcuno deve pur essere diverso!

Experiences in Translation - Umberto Eco
2008-01-01

In this book Umberto Eco argues that translation is not about comparing two languages, but about the interpretation of a text in two different languages, thus involving a shift between cultures. An author whose works have appeared in many languages, Eco is also the translator of Gérard de Nerval's *Sylvie* and Raymond Queneau's *Exercices de style* from French into Italian. In *Experiences in Translation* he draws on his substantial practical experience to identify and discuss some central problems of translation. As he convincingly demonstrates, a translation can express an evident deep sense of a text even when violating both lexical and referential faithfulness. Depicting translation as a semiotic task, he uses a wide range of source materials as illustration: the translations of his own and other novels, translations of the dialogue of American films into Italian, and various versions of the Bible. In the second part of his study he deals with translation theories proposed by Jakobson, Steiner, Peirce, and

others. Overall, Eco identifies the different types of interpretive acts that count as translation. An enticing new typology emerges, based on his insistence on a common-sense approach and the necessity of taking a critical stance.

Death Dealer - Rudolf Hoss 2012-08-31

By his own admission, SS Kommandant Rudolf Höss was history's greatest mass murderer, having personally supervised the extermination of approximately two million people, mostly Jews, at the death camp in Auschwitz, Poland. *Death Dealer* is the first complete translation of Höss's memoirs into English. These bone-chilling memoirs were written between October 1946 and April 1947. At the suggestion of Professor Sanislaw Batawia, a psychologist, and Professor Jan Shen, the prosecuting attorney for the Polish War Crimes Commission in Warsaw, Höss wrote a lengthy and detailed description of how the camp developed, his impressions of the various personalities with whom he dealt, and even the extermination of millions in the gas chambers. This written testimony is perhaps the most important document attesting to the Holocaust, because it is the only candid, detailed, and (for the most part) honest description of the Final Solution from a high-ranking SS officer intimately involved in carrying out the plans of Hitler and Himmler. With the cold objectivity of a common hit-man, Höss chronicles the discovery of the most effective poison gas, and the technical obstacles that often thwarted his aim to kill as efficiently as possible. Staring at the horror without reacting, Höss allowed conditions at Auschwitz to reduce human beings to walking skeletons - then he labelled them as subhumans fit only to die. Readers will witness Höss's shallow rationalizations as he tries to balance his deeds with his increasingly disturbed, yet always ineffectual, conscience.

ANNO 2022 L'ACCOGLIENZA UNDICESIMA PARTE - ANTONIO GIANGRANDE
Antonio Giangrande, orgoglioso di essere

diverso. ODIO OSTENTAZIONE ED IMPOSIZIONE. Si nasce senza volerlo. Si muore senza volerlo. Si vive una vita di prese per il culo. Tu esisti se la tv ti considera. La Tv esiste se tu la guardi. I Fatti son fatti oggettivi naturali e rimangono tali. Le Opinioni sono atti soggettivi cangianti. Le opinioni se sono oggetto di discussione ed approfondimento, diventano testimonianze. Ergo: Fatti. Con me le Opinioni cangianti e contrapposte diventano fatti. Con me la Cronaca diventa Storia. Noi siamo quello che altri hanno voluto che diventassimo. Seven Experiments That Could Change the World - Rupert Sheldrake 2002-07-01

Examines the realities of unexplained natural phenomenon and provides explanations that push the boundaries of science. • Looks at animal telepathy and the ability of pigeons to home. • Proves the point that "big questions don't need big science". • Noted scientist Rupert Sheldrake is a former research fellow of the Royal Society. • New Edition with an Update on Results. How does your pet "know" when you are coming home? How do pigeons "home"? Can people really feel a "phantom" amputated arm? These questions and more form the basis of Sheldrake's look at the world of contemporary science as he puts some of the most cherished assumptions of established science to the test. What Sheldrake discovers is that certain

scientific beliefs are so widely taken for granted that they are no longer regarded as theories but are seen as scientific common sense. In the true spirit of science, Sheldrake examines seven of these beliefs. Refusing to let intellectual dogmatism influence his search for the truth, Sheldrake presents simple experiments that allow the curious and the skeptical to join in his journey of discovery. His experiments look at how scientific research is often biased against unexpected patterns that emerge and how a researcher's expectations can influence the results. He also examines the taboo of taking pets seriously and explores the question of human extrasensory perception. Perhaps most important, he questions the notion that science must be expensive in order to achieve important results, showing that inexpensive methods can indeed shake the very foundations of science as we know it. In this compelling and intelligent book, Sheldrake offers no preconceived wisdom or easy answers—just an open invitation to explore the unknown, create new science, and perhaps, even change the world.

Chi salverà la finanza - Emilio Barucci

2018-08-01T00:00:00+02:00

Il 15 settembre 2008 la banca d'investimento statunitense Lehman Brothers dichiarava fallimento: l'evento simbolo della crisi finanziaria, le cui scosse di assestamento hanno caratterizzato l'ultima decade sia negli Stati Uniti sia in Europa. A dieci anni di distanza, questo volume fa il punto sull'eredità di quegli eventi - inclusa l'inefficacia dimostrata dalle istituzioni europee nel garantire la stabilità delle banche italiane nei casi di MPS, delle banche popolari e delle sofferenze bancarie - interrogandosi su chi, e come, potrà «salvare la finanza». Il richiamo all'etica, a quanto sia «giusto» che un amministratore delegato guadagni più di un cassiere di banca, non è il modo migliore di approcciare la questione, secondo l'Autore: quello che serve è una riflessione su come sia possibile architettare una buona finanza, andando oltre le classiche parole d'ordine quali privatizzazione, liberalizzazione e deregolamentazione. L'analisi della crisi diventa così l'occasione per individuare una serie di vere e proprie «lezioni» da tenere a mente per il futuro.

The Nuremberg Interviews - Leon Goldensohn
2007-12-18

During the Nuremberg trials, Leon Goldensohn—a U.S. Army psychiatrist—monitored the mental health of two dozen German leaders charged with carrying out genocide. These recorded conversations went largely unexamined for more than fifty years, until Robert Gellately—one of the premier historians of Nazi Germany—made them available to the public in this remarkable collection. Here are interviews with the likes of Hans Frank, Hermann Goering, Ernst Kaltenbrunner, and Joachim von Ribbentrop—the highest ranking Nazi officials in the Nuremberg jails. Here too are interviews with lesser-known officials essential to the inner workings of the Third Reich. Candid and often shockingly truthful, *The Nuremberg Interviews* is a profound addition to our understanding of the Nazi mind and mission.

Mediterranean Frontiers - Dimitar Bechev 2010

"Expert scholars in the field come together to look at the impact of political boundaries upon the region, along with pressures from European and economic integration, the resurgence of nationalism, and refugee and security concerns. The authors explore the politics of memory: the ways in which the past shapes conflicts in the present, but also how memories held by individuals and communities challenge master narratives of 'us versus them'. Turning to the present, the book investigates how political fragmentation and divisive identities manifest in territorial borders influence everyday lives. Rather than a clear-cut boundary between North and South, the vision that emerges is of a Mediterranean transformed by the forces of globalization into a set of hybrid frontiers: borderlands shaped by intertwined exchanges, identities and conflicts." --Book Jacket.

Cancer Wars - Robert N. Proctor 1995

Written by a highly regarded historian of science, this meticulously researched, eminently fair, and very provocative book attempts to answer the question: Why, given all the time and money spent on cancer research, can't we get consistent answers to the most fundamental questions about prevention and treatment?

Denial [Movie Tie-in] - Deborah E. Lipstadt 2016-09-06

Now a major motion picture starring Rachel Weisz, Timothy Spall and Tom Wilkinson. "A compelling book: memoir and courtroom drama, a work of historical and legal import." -- Jewish Week Deborah Lipstadt, author of the groundbreaking *Denying the Holocaust*, chronicles her six-year legal battle with controversial British World War II historian David Irving that culminated in a sensational 2000 trial in London. In her acclaimed 1993 book *Denying the Holocaust*, Deborah Lipstadt called putative World War II historian David Irving "one of the most dangerous spokespersons for Holocaust denial", a conclusion that she reached by examining his cunning manipulations of evidence, partisanship to Hitler, persistent exoneration of the Third Reich, and his confirmed celebrity among swelling ranks of anti-Semitic organizations internationally. In 1994, Irving filed a libel lawsuit, not in the U.S. courtroom—where the onus of proof lies on the plaintiff, but in the UK—where the onus of proof lies on the defendant. At stake were not only the reputations of two historians, but the record of history itself. The four-month trial took place in London in 2000 and drew international attention. With the help of a first-rate team of solicitors and historians and the support of her UK publisher, Penguin, Lipstadt won, her victory proclaimed on the front page of major newspapers around the world. Part history, part real life courtroom drama, *Denial* is Lipstadt's riveting, blow-by-blow account of the trial that tested the standards of historical and judicial truths and resulted in a formal denunciation of the infamous Holocaust denier. Originally published as *History on Trial*.

Judicial Protection of Fundamental Rights on the Internet - Oreste Pollicino 2021-04-22

This book explores how the Internet impacts on the protection of fundamental rights, particularly with regard to freedom of speech

and privacy. In doing so, it seeks to bridge the gap between Internet Law and European and Constitutional Law. The book aims to emancipate the debate on internet law and jurisprudence from the dominant position, with specific reference to European legal regimes. This approach aims to inject a European and constitutional "soul" into the topic. Moreover, the book addresses the relationship between new technologies and the protection of fundamental rights within the theoretical debate surrounding the process of European integration, with particular emphasis on judicial dialogue. This innovative book provides a thorough analysis of the forms, models and styles of judicial protection of fundamental rights in the digital era and compares the European vision to that of the United States. The book offers the first comparative analysis in which the notion of (judicial) frame, borrowed from linguistic and cognitive studies, is systematically applied to the theories of interpretation and argumentation. With a Foreword by Robert Spano, President of the European Court of Human Rights.

Furthermore, a number of interactive models have been built to help understand the science and systems behind the processes.

The Far Right and the Environment -

Bernhard Forchtner 2019-09-10

At the beginning of the twenty-first century, both the crisis of liberal democracy, as visible in, for example, the rise of far-right actors in Europe

and the United States, and environmental crises, from declining biodiversity to climate change, are increasingly in the public spotlight. Whilst both areas have been analysed extensively on their own, *The Far Right and the Environment: Politics, Discourse and Communication* provides much-needed insights into their intersection by illuminating the environmental communication of far-right party and non-party actors in Europe and the United States. Although commonly perceived as a 'left-wing' issue today, concerns over the natural environment by the far right have a long, ideology-driven history. Thus, it is not surprising that some members of the far right offer distinctive ecological visions of communal life, though, for example, climate-change scepticism is at times voiced too. Investigating this range of stances within their discourse about the natural environment provides a window into the wider politics of the far right and points to a close connection between the politics of identity and the imagination of nature. Connecting the fields of environmental communication and study of the far right, contributions to this edited volume therefore offer timely assessments of this often-overlooked dimension of far-right politics.

L'economia percepita - Roberto Basso
2019-05-03T00:00:00+02:00

L'affermazione di Trump negli Stati Uniti, l'avanzare di partiti ostili al progetto europeo, la vittoria della Brexit, la nascita del primo governo dichiaratamente populista in Italia: nel volgere di soli due anni, il consenso dei cittadini nelle democrazie liberali si è spostato verso chi promette risposte semplicistiche e soluzioni immediate alle sfide di un mondo diventato sempre più complesso. Quale ruolo hanno giocato le politiche economiche in questo cambiamento? Nonostante i dati macroeconomici segnalino l'uscita dalla crisi, aumenta l'insoddisfazione dei cittadini. Come si spiega questo paradosso? Ha a che fare con il sensazionalismo dell'informazione e con il fiume

di notizie false nei social media? Ma non dipenderà anche dal senso di ingiustizia determinato dall'aumento vertiginoso delle disuguaglianze? Un comunicatore istituzionale e un giornalista economico guidano il lettore attraverso una realtà articolata e in continuo cambiamento, con l'obiettivo di fissare alcuni punti fermi. Ripercorrono le trasformazioni della nostra epoca che hanno contribuito a disorientare i cittadini, indagano il fenomeno dell'insofferenza contro il sapere, il ruolo spesso ansiogeno dell'informazione, la difficoltà di affermare un modello di comunicazione basato su dati oggettivi, a fronte di una politica che accorcia sempre di più il proprio sguardo verso la prossima scadenza elettorale. Grazie a un'analisi dettagliata del cosiddetto ciclo della notizia, gli autori ricostruiscono l'impatto della disinformazione e delle fake news sull'opinione pubblica, ma anche quello delle false illusioni ingenerate da proposte economiche irrealizzabili, sebbene presentate in nome

dell'interesse degli elettori.

Anne Frank's Tales from the Secret Annex - Anne Frank 2008-12-10

Hiding from the Nazis in the "Secret Annexe" of an old office building in Amsterdam, a thirteen-year-old girl named Anne Frank became a writer. The now famous diary of her private life and thoughts reveals only part of Anne's story, however. This book completes the portrait of this remarkable and talented young author. *Tales from the Secret Annex* is a complete collection of Anne Frank's lesser-known writings: short stories, fables, personal reminiscences, and an unfinished novel. Here, too, are portions of the diary originally withheld from publication by her father. By turns fantastical, rebellious, touching, funny, and heartbreaking, these writings reveal the astonishing range of Anne Frank's wisdom and imagination--as well as her indomitable love of life. *Anne Frank's Tales from the Secret Annex* is a testament to this determined young woman's extraordinary genius and to the persistent strength of the creative spirit.
