**Contemporary Intervention Research in Learning Disabilities** - Bernice Y.L. Wong 2012-12-06

Recently, in the area of learning disabilities, a subarea of special education, an interesting development has become discernible. This development centers on the increasing focus of learning disabilities professionals on theory building and empirical research, and it is reflected in the spate of books currently being published. With their clear emphasis on conceptual and methodological issues along with directions for future research, these newly published books differ essentially from the bulk of learning disabilities textbooks. They include S. Vaughn and C. Bos (Eds.), *Research in Learning Disabilities: Issues and Future Directions*, published in 1987 by College-Hill; T. E. Scruggs and B. Y. L. Wong (Eds.), *Intervention Research in Learning Disabilities*, published in 1990 by Springer-Verlag; and L. Swanson (Ed.), *Learning Disabilities: Theoretical and Research Issues*, published in 1991 by Lawrence Erlbaum Associates. As reflected in these three books, the discipline began with a service orientation and has evolved beyond that to come of age with aspirations of becoming a scientific discipline. These books can be taken to voice the concerted efforts of learning disabilities professionals to promote theory building and empirical research. Undeniably these books provide valuable information on conceptual issues and research in learning disabilities. Nevertheless, they appear to have one drawback, namely, they focus exclusively on learning disabilities research in North America.
