Integration of the Armed Forces, 1940-1965 - Morris J. MacGregor 2020-06-18
"In the quarter century that followed American entry into World War II, the nation's armed forces moved from the reluctant inclusion of a few segregated Negroes to their routine acceptance in a racially integrated military establishment. Nor was this change confined to military installations. By the time it was over, the armed forces had redefined their traditional obligation for the welfare of their members to include a promise of equal treatment for black servicemen wherever they might be. In the name of equality of treatment and opportunity, the Department of Defense began to challenge racial injustices deeply rooted in American society. For all its sweeping implications, equality in the armed forces obviously had its pragmatic aspects. In one sense it was a practical answer to pressing political problems that had plagued several national administrations. In another, it was the services' expression of those liberalizing tendencies that were permeating American society during the era of civil rights activism. But to a considerable extent the policy of racial equality that evolved in this quarter century was also a response to the need for military efficiency. So easy did it become to demonstrate the connection between inefficiency and discrimination that, even when other reasons existed, military efficiency was the one most often evoked by defense officials to justify a change in racial policy."_x000D_ Morris J. MacGregor, Jr., received the A.B. and M.A. degrees in history from the Catholic University of America. He continued his graduate studies at the Johns Hopkins University and the University of Paris on a Fulbright grant. Before joining the

staff of the U.S. Army Center of Military History in 1968 he served for ten years in the Historical Division of the Joint Chiefs of Staff.

The Future of Air Power in the Aftermath of the Gulf War - Robert L. Pfaltzgraff 2002-07-01

Air University is proud to have joined the Air Staff and the International Security Studies Program of the Fletcher School of Law and Diplomacy at Tufts University in sponsoring the April 1991 conference on aerospace challenges and missions that produced this collection of essays. Written by a distinguished group of specialists from academia, the military, government, business, and the media, these essays examine American national security policy and Air Force issues from a variety of perspectives. Aside from their remarkable perceptiveness, the contributions of the authors are especially timely because they address the pivotal role of air power in the war with Iraq. The essays leave no doubt that the employment of both established and innovative methods of air combat in that crisis has important implications for the global-security environment of the future. In that sense, this book provides a foundation for evaluating the complex policy challenges that we face in the 1990s and into the next century."Charles G. A Review of the Literature on Sexual Assault Perpetrator Characteristics and Behaviors - Sarah Michal Greathouse 2015
"Sexual assault continues to be a pervasive problem, both for society in general and within the military community. To assist the Air Force in its continued efforts to combat sexual assault within its ranks, we reviewed the existing empirical literature on the characteristics and behaviors of adult perpetrators who commit sexual assault against other adults. Our search was not limited to studies of military populations. While a vast majority of the existing literature has focused on sole male perpetrators who assault female victims, we identified some research on other types of perpetrators, including female sexual assault perpetrators, men who perpetrate assault against other men, and perpetrators who participate in group sexual assault. This body of research indicates that adult perpetrators are diverse in terms of their demographics, background characteristics, and motivations. Moreover, research indicates that sexual assault perpetration is likely influenced by a combination of factors, including an individual's developmental and family history; his or her personality, including attitudes/cognitions; and environmental factors, including peer attitudes and alcohol consumption. The complexity of factors that influence sexual assault perpetration and the multiple pathways that lead to an attack make it difficult to predict whether an individual is prone to commit sexual assault. While predicting sexual assault perpetration is problematic, we identified a number of factors related to perpetration that may be relevant for intervention efforts and offer recommendations for the Air Force"--Publisher's web site.

His observation that it is the business of Southern Command to launch "ideas not missiles" into the command's area of responsibility gained strategic resonance throughout the Caribbean and Central and South America, and at the highest levels in Washington, DC.

The second part of the book concentrates on the objectives of Islamic religious practice – the maqa' sid – which include: Preservation of Faith, Preservation of Life, Preservation of Mind (intellect and reason), Preservation of Progeny (al-nasl) and Preservation of Property. Artificial Intelligence, China, Russia, and the Global Order - Shazeda Ahmed 2019

"Artificial intelligence (AI) and big data promise to help reshape the global order. For decades, most political observers believed that liberal democracy offered the only plausible future pathways for big, industrially sophisticated countries to make their citizens rich. Now, by allowing governments to monitor, understand, and control their citizens far more effectively than ever before, AI offers a plausible way for big, economically advanced countries to make their citizens rich while maintaining control over them--the first since the end of the Cold War. That may help fuel and shape renewed international competition between types of political regimes that are all becoming more "digital." Just as competition between liberal democratic, fascist, and communist social systems defined much of the twentieth century, how may the struggle between digital liberal democracy and digital authoritarianism define and shape the twenty-first? This work highlights several key areas where AI-related technologies have clear implications for globally integrated strategic planning and requirements development"--
