*Language and Communication* - Jack C. Richards 2014-06-06

Presents eight specially written chapters which provide a coherent survey of major issues in the study of language and communication, and which show how these are related to questions of practical concern in the learning and teaching of second and foreign languages. The issues discussed have been selected primarily for their relevance to applied linguistics, and there is a unifying interest in how language reflects the communicative functions it performs as well as in the process involved in using language for communication. Each chapter presents a self-contained survey of a central issue, is prefaced by an introduction linking the different perspectives, and is followed by discussion questions to aid effective use of the text in applied linguistics courses.

*Navigating the Field* - Mildred Oiza Ajebon 2021-05-31

This volume is a collation of postgraduate fieldwork experiences in social research that provides a platform for early career researchers (ECRs) to be open about the hidden labour of doing postgraduate fieldwork. This book documents diverse fieldwork experiences, gathering critical reflections on 'the field' from a wide range of ECRs. The issues presented here go from the process of identifying the field to navigating life in (and after) it, including things that happen in-between. This text shows a different set of methodological considerations in relation to access, ethics, identity, positionality, power and practices, highlighting how ECRs' fieldwork experiences may help broaden traditional frameworks of research. Exploring how postgraduate researchers make sense of these issues and what kind of decisions they make in specific circumstances helps to reveal broader concerns, institutional practices and constraints. Through these reflections, this book makes an important point that there is a need for researchers to document the 'real story' behind fieldwork. The honesty and openness of contributors in this volume are positive steps towards fostering a research culture where reflections upon weaknesses and failures are as welcome as presentations of successful fieldwork techniques and methods. The fact that this book is written and edited by ECRs, the topics it presents — both emerging and long-debated but still relevant — and the broad range of approaches make this text unique. We hope these points will make this work useful for researchers of all levels and across disciplines, and that this text will allow the reader to rethink some essential aspects of social research that are often taken for granted. We expect the diverse reflections offered in this book to appeal to researchers across disciplines at different stages of their career and that this will be a useful resource for researchers to map and navigate their own research pathways.

Contents of the book The first section of the book looks in detail at essay writing, the most common genre for academic study. It begins by looking at the content and structure of a typical essay, then looks at different essay types, namely comparison and contrast, cause and effect, problem-solution, classification, argument, discussion, definition, process, exemplification, and description. The second section of the book looks at report writing, the next most common genre for academic study, beginning with an overview of report writing, followed by a detailed look at the two most common report types, namely laboratory reports and business reports. Other report types are also covered. The third section covers other genres which do not fit into the essay or report category. They are posters, reflective writing, book reviews, research proposals, and theses/dissertations. The fourth and final section considers genre elements. *Critical CALL – Proceedings of the 2015 EUROCALL Conference, Padova, Italy* - Francesca Helm 2015-12-02

The theme of the conference this year was Critical CALL, drawing inspiration from the work carried out in the broader field of Critical Applied Linguistics. The term ‘critical’ has many possible interpretations, and as Pennycook (2001) outlines, has many concerns. It was from these that we decided on the conference theme, in particular the notion that we should question the assumptions that lie at the basis of our praxis, ideas that have become ‘naturalized’ and are not called into question. Over 200 presentations were delivered in 68 different sessions, both in English and Italian, on topics related specifically to the theme and also more general CALL topics. 94 of these were submitted as extended papers and appear in this volume of proceedings.

**Stolen Language?** - Shelley Angelil-Carter 2014-06-11

Real Language Series General Editors- Jennifer Coates, Jenny Cheshire and Euan Reid This is a sociolinguistic series about the relationships between language, society and social change. Books in the series draw on natural language data from a wide range of social contexts. The series takes a critical approach to the subject, challenging current orthodoxies, and dealing with familiar topics in new ways. The topic of plagiarism is a highly contentious issue and one that is of growing interest and importance in higher education across the world. *Stolen Language? Plagiarism in Writing* uncovers the reasons why students plagiarize, and explains what can be done about it. It challenges the concepts of original authorship of language, tracing the notion of plagiarism to the introduction of copyright laws in the eighteenth century. The analysis presented in this book explores plagiarism as complex and contested, and suggests that in student academic writing it may be the surface manifestation of learning difficulties related to the educational environment, the nature of academic discourse and the nature of language. Underlying the concept of plagiarism is the premise that meaning is made by the individual, using the system of language at his or her disposal. The words and ideas then belong to the individual who first thought of them, or who first used these words in a particular way. New understandings, that language and cognition are fundamentally social and cultural, contest the idea of ‘original thought’ or ‘original language’. In addition, what constitutes plagiarism differs depending on the genre and context of writing. *Stolen Language* shows that there is in any good writing an authorial presence, an authorial voice which is particularly difficult for the novice writer to control when constructing an essay based on multiple texts. Written in a unique and accessible way, the book also looks at the particular difficulties experienced by writers of English as an additional language and provides a practical framework for academics and teachers of writing on how to develop authorial voice and critical thinking in the student writer.

Ipsative Assessment and Personal Learning Gain - Gwyneth Hughes 2017-02-28

This innovative book offers a new approach to assessment in which learners can follow their own learning journey using cumulative feedback or measurements of distance travelled from different starting points. Education currently mirrors the values and practices of a highly competitive world with testing, grading and monitoring of standards becoming its driving forces. Competition may stimulate high achievers, but may also demotivate or even damage the rest. Ipsative feedback (on

progress) and personal learning gain measurements are often hidden. A range of global case studies from school and higher education illustrate four themes: the benefits of ipsative feedback, making good use of learning gain measurement, the challenges of implementing these novel practices and how to combine new approaches with traditional assessment methods. Exploring the difficulties of turning the tables on hierarchies based on achievement and whether it is fair to elevate progress, this book will be the start of conversations about a future that is not obsessed with testing and grades.

This up-to-date, accessible textbook will satisfy the needs of students, practitioners and educators in the sphere of healthcare, and contribute to improving the quality of evidence-based practice. The authors will advise some freely available or inexpensive open source/access resources (such as PubMed, R and Zotero) to help students how to perform a systemic review, in particular those with limited resources.

Teaching Academic Writing - Caroline Coffin 2005-07-26

Student academic writing is at the heart of teaching and learning in higher education. Students are assessed largely by what they write, and need to learn both general academic conventions as well as disciplinary writing requirements in order to be successful in higher education. Teaching Academic Writing is a 'toolkit' designed to help higher education lecturers and tutors teach writing to their students. Containing a range of diverse teaching strategies, the book offers both practical activities to help students develop their writing abilities and guidelines to help lecturers and tutors think in more depth about the assessment tasks they set and the feedback they give to students. The authors explore a wide variety of text types, from essays and reflective diaries to research projects and laboratory reports. The book draws on recent research in the fields of academic literacy, second language learning, and linguistics. It is grounded in recent developments such as the increasing diversity of

the student body, the use of the Internet, electronic tuition, and issues related to distance learning in an era of increasing globalisation. Written by experienced teachers of writing, language, and linguistics, Teaching Academic Writing will be of interest to anyone involved in teaching academic writing in higher education.

*The Elements of Academic Style* - Eric Hayot 2014-08-26

Eric Hayot teaches graduate students and faculty in literary and cultural studies how to think and write like a professional scholar. From granular concerns, such as sentence structure and grammar, to big-picture issues, such as adhering to genre patterns for successful research and publishing and developing productive and rewarding writing habits, Hayot helps ambitious students, newly minted Ph.D.'s, and established professors shape their work and develop their voices. Hayot does more than explain the techniques of academic writing. He aims to adjust the writer's perspective, encouraging scholars to think of themselves as makers and doers of important work. Scholarly writing can be frustrating and exhausting, yet also satisfying and crucial, and Hayot weaves these experiences, including his own trials and tribulations, into an ethos for scholars to draw on as they write. Combining psychological support with practical suggestions for composing introductions and conclusions, developing a schedule for writing, using notes and citations, and structuring paragraphs and essays, this guide to the elements of academic style does its part to rejuvenate scholarship and writing in the humanities.

**Formulaic Sequences** - Norbert Schmitt 2004

Formulaic sequences (FS) are now recognized as an essential element of language use. However, research on FS has generally been limited to a focus on description, or on the place of FS in L1 acquisition. This volume opens new directions in FS research, concentrating on how FS are acquired and processed by the mind, both in the L1 and L2. The ten original studies in the volume illustrate the L2 acquisition of FS, the relationship between L1 and L2 FS, the relationship between corpus recurrence of FS and their psycholinguistic reality, the processes involved in reading FS, and pedagogical issues in teaching FS. The studies use a wide range of methodologies, many of them innovative, and thus the volume serves as a model for future research in the area. The volume begins with three survey chapters offering a background on the characteristics and measurement of FS.
