Auditing - Jack C. Robertson
2001

Auditing: An International Approach (formerly titled *Auditing and Other Assurance Engagements*) presents a comprehensive, balanced, and current introduction to the auditing field. This text bridges the gap between students' knowledge of accounting principles and the professional practice of accounting and auditing in the working world. Emphasizing a 'cycles' approach, the book covers the financial auditor's decision-making process: 1) problem recognition and developing audit objectives, 2) evidence collection with audit procedures, and 3) making judgements about control risk and the fair presentation of financial statement assertions. Building on the strengths of the first Canadian

and former U.S. editions, the authors reflect exciting challenges inherent to current auditing practice and other assurance services. As the revised title suggests, the second edition of this best-selling text has kept pace with the growing importance of International Accounting Standards in the context of Canadian business world.

International Competitiveness in Financial Services - Marvin H. Kosters 2012-12-06
financial markets suggests that factors such as differences in

capital requirements, limitations on size or on the range of financial activities in which firms can engage, government guarantee arrangements for deposits or payments, and reporting or disclosure requirements can have important effects on the efficiency of industrial and commercial firms and thus on the international competitive positions of major sectors of the U.S. economy. Regulatory and tax policies must therefore take into account effects on international competitive positions in addition to domestic concerns. The articles in this issue analyze differences in market organization and regulation across countries and examine how efficiency in producing financial services is influenced by these differences. These articles were presented and discussed at a conference sponsored by the American Enterprise Institute in Washington, D.C., on May 31 and June 1, 1990. This conference on International Competitiveness in Financial

Services brought to the attention of Washington policy officials these analyses by leading scholars in finance. Publication of these studies and critiques in the *Journal of Financial Services Research* is intended to stimulate further interest in research on these important issues.
