Seventy Years of the South Western - Colin Boocock 2022-07-31

The South Western main line is one of the most important railways in the south of England. Colin Boocock spent a significant part of his life living on and researching the history of this centre of railway operations in the South and South West of England. This book looks at the network over the last seventy years, from Nationalisation through to the present day. The system provides a vital link between the South and South West of Britain and London, operating a mixture of commuter services and important main line passenger trains. Throughout the seventy years covered in this book, the South Western network also had significant flows of heavy freight between the capital and Southampton Docks and the West Country. Today there are still frequent, well-loaded container trains from Southampton to the Midlands and the North via Basingstoke and Reading. This volume also covers the transitions from steam traction to diesel and electric in stages from the 1950s through to the late 1980s

Britain's Preserved Trams - Peter Waller 2021-10-30

It is almost 100 years since the first tram was preserved in Britain, in the century since then a great variety of trams have been saved from tramway systems small and large. Some trams were purchased directly out of service and others were acquired after many years alternative usage, some being summer houses or homes, while others were used on farms or allotments where they served as sheds and out buildings, before being lovingly restored over many years. The story of tram preservation is not wholly positive, in the early days many trams suffered from being stored in the open at unsafe sites, where the historic vehicles were often subjected to acts of vandalism and suffered badly from the weather. This changed to a large extent in 1959, with the acquisition of the site of the future National Tramway Museum at Crich in Derbyshire,, where a comprehensive collection of trams from all over Britain and also foreign tram networks has been assembled, to secure a collection of tramcars for future generations. There is also today fine collections of trams in other museums in Britain and Ireland, which cover much of the rich history of this once common form of public transport. This book looks at almost 200 of these trams when they were in service, through historic photographs, prior to their withdrawal and eventual preservation.

Utopia - Thomas More 2017-01-27

The first half (Book I) of Utopia is a dialogue, which presents a perceptive analysis of contemporary social, economic, penal, and moral ills in England; the second (Book II) is a narrative describing Utopia, a country run according to the ideals of the English humanists, where poverty, crime, injustice, and other ills do not exist. This new 2017 edition of Thomas More's complete and unabridged Utopia features the modern translation from the Latin of Gilbert Burnet.

Rising Sun, Falling Skies - Jeffrey Cox 2014-03-20

Following the attack on Pearl Harbor, the Japanese offensive in the Far East seemed unstoppable. Allied forces engaged in a futile attempt to halt their rapid advance, culminating in the massed fleet of American, British, Dutch, and Australian forces (ABDA) clashing with the Japanese at the battle of the Java Sea - the first major sea battle of World War II in the Pacific. But, in a campaign crippled by poor leadership and disastrous decisions, the Allied response was catastrophic, losing their largest warships and their tenuous toe-hold in the south Pacific within the first 72 hours of the battle. This defeat left ground troops cut off from reinforcement and supply, with obsolete equipment, no defense against endless Japanese air attacks, and with no chance of retreat. However, although command decisions were to condemn the Allies to defeat, the Allied goal was never an outright victory, simply a delaying action. Facing a relentless and thoroughly vicious enemy, the combined forces responded not by running or surrendering, but by defiantly holding on

in a struggle that was as much a test of character, bravery, and determination as it was a test of arms, ultimately costing the Allies ten vessels and the lives of 2,100 brave sailors. In *Rising Sun, Falling Skies*, Jeffrey Cox examines the events and evidence surrounding the Java Sea Campaign, reconstructing battles that in hindsight were all but hopeless and revealing where fatal mistakes and missed opportunities condemned the Allied forces in an insightful and compelling study of the largely overlooked clash in the Java Sea.
