South Africa and who went on to become the president of the country.

No Kids - Corinne Maier
2009-08-04

The shocking treatise that was a bestselling international media sensation upon its 2007 publication in France now makes its eagerly anticipated English-language debut. A mother of two herself, Maier makes her deadly serious, if at times laugh-out-loud-funny, argument with all the unbridled force of her famously wicked intellect. In forty to-the-point, impressively erudite chapters drawing on the realms of history, child psychology, politics, and the environment, Maier effortlessly skewers the idealized notion of parenthood as a natural and beautiful endeavour. Enough with this "baby-mania" that is plaguing modern society, says Maier, it's nothing but brainwashing. Are you prepared to give up your free time, dinners with friends, spontaneous romantic getaways, and even the luxury of uninterrupted thought for

the “vicious little dwarves” that will treat you like their servant, cost you hundreds of thousands of dollars, and end up resenting you? Speaking to the still “child-free”, to fellow suffering parents, and to adamant procreationists alike, No Kids is a controversial, thought-provoking, and undeniably entertaining read. Reasons to avoid having kids:

- You will lose touch with your friends
- Your sex life will be over
- Children cost a fortune
- Child-rearing is endless drudgery
- Vacations will be nightmares
- You’ll lose your identity and become just “mom” or “dad”
- Your children will become mindless drones of capitalism
- The planet’s already overcrowded
- Your children will inevitably disappoint you

Manufacturing Facilities Design and Material Handling - Fred E. Meyers 2005

This project-oriented facilities design and material handling reference explores the

techniques and procedures for developing an efficient facility layout, and introduces some of the state-of-the-art tools involved, such as computer simulation. A “how-to,” systematic, and methodical approach leads readers through the collection, analysis and development of information to produce a quality functional plant layout. Lean manufacturing; work cells and group technology; time standards; the concepts behind calculating machine and personnel requirements, balancing assembly lines, and leveling workloads in manufacturing cells; automatic identification and data collection; and ergonomics. For facilities planners, plant layout, and industrial engineer professionals who are involved in facilities planning and design.

The Great Depression in Latin America - Paulo Drinot 2014-08-25

global economic collapse of the 1930s had a deep and lasting impact on the region. The contributors to this book examine the consequences of the Depression in terms of the role of the state, party-political competition, and the formation of working-class and other social and political movements. Going beyond economic history, they chart the repercussions and policy responses in different countries while noting common cross-regional trends--in particular, a mounting critique of economic orthodoxy and greater state intervention in the economic, social, and cultural spheres, both trends crucial to the region's subsequent development. The book also examines how regional transformations interacted with and differed from global processes. Taken together, these essays deepen our understanding of the Great Depression as a formative experience in Latin America and provide a timely comparative perspective on the recent global economic crisis.

Operation Phoenix - Marco Bonafede 2016-07-07

November 2016: could Adolf Hitler's son become the President of the United States of America? From the fall of Berlin in 1945 to this day, a Nazi plot could change our future. Why have seventy-year-old documents come to light from the archives of the Russian secret services? From the NKVD to the KGB to the current SVR, a common thread unites the investigations on Hitler's biological son.

"Operation Phoenix is the Nazi attempt to seize power in the world's most powerful nation and take revenge on history."

The European Realist Tradition - Gabriel P. Weisberg 1982

The exhibition of 250 paintings and drawings by 70 artists recreates a panorama of 19th-century French society--a faithful rendition of daily events, of human lives and environment. Dr. Gabriel P. Weisberg, Curator of Art History and Education at The Cleveland Museum of Art and Curator of the Exhibition, based his study and comparison of the distinctive qualities of Realism on the categories used by 19th-century art critics and the Salon juries: genre, still life, portrait, and landscape. The organization of this encyclopedic exhibition was an awesome task. Much of the material was passed down through the painters' families

and subsequently hidden or lost. The work that had been collected by museums and private collectors was among the least studied of all the artistic traditions of 19th-century France. The work of numerous neglected painters is compared to the work of well-known masters as a means of assessing the range and depth of the Realist tradition during this period. Artists represented include Edgar Degas, Jean Francois Millet, and Gustave Courbet together with such rediscovered figures as Victor Gabriel Gilbert, François Bonvin, and Norbert Goeneutte.

Communication: A Study of Interactional Patterns,

Pathologies and Paradoxes -

Paul Watzlawick 2011-04-25

The properties and function of human communication. Called "one of the best books ever about human communication," and a perennial bestseller, Pragmatics of Human Communication has formed the foundation of much contemporary research into interpersonal communication, in addition to laying the groundwork for context-based approaches to psychotherapy. The authors present the simple but radical idea that problems in life often arise from issues of communication, rather than from deep psychological disorders, reinforcing their conceptual explorations with case studies and well-known literary examples. Written with humor and for a variety of readers, this book identifies simple properties and axioms of human communication and demonstrates how all communications are actually a function of their contexts. Topics covered in this wide-

ranging book include: the origins of communication; the idea that all behavior is communication; meta-communication; the properties of an open system; the family as a system of communication; the nature of paradox in psychotherapy; existentialism and human communication.

Living Autobiographically - Paul John Eakin 2011-03-15
Autobiography is naturally

regarded as an art of retrospect, but making autobiography is equally part of the fabric of our ongoing experience. We tell the stories of our lives piecemeal, and these stories are not merely about our selves but also an integral part of them. In this way we "live autobiographically"; we have narrative identities. In this book, noted life-writing scholar Paul John Eakin explores the intimate, dynamic connection between our selves and our stories, between narrative and identity in everyday life. He draws on a wide range of autobiographical writings from work by Jonathan Franzen, Mary Karr, and André Aciman to the New York Times series "Portraits of Grief" memorializing the victims of 9/11, as well as the latest insights into identity formation from the fields of developmental psychology, cultural anthropology, and neurobiology. In his account, the self-fashioning in which we routinely, even automatically, engage is largely conditioned

by social norms and biological necessities. We are taught by others how to say who we are, while at the same time our sense of self is shaped decisively by our lives in and as bodies. For Eakin, autobiography is always an act of self-determination, no matter what the circumstances, and he stresses its adaptive value as an art that helps to anchor our shifting selves in time.

Komodo Dragons - James B. Murphy 2015-03-31

More than twenty years have passed since Walter Auffenberg's monumental *The Behavioral Ecology of the Komodo Monitor*. In the intervening years the populations of Komodo dragons—native only to a handful of islands in southeast Indonesia—have dwindled, sparking intensive conservation efforts. During the last two decades new information about these formidable predators has emerged, and the most important findings are clearly presented here. A memoir from Walter Auffenberg and his son

Kurt is followed by the latest information on Komodo dragon biology, ecology, population distribution, and behavior. The second part of the book is dedicated to step-by-step management and conservation techniques, both for wild and captive dragons. This successful model is a useful template for the conservation of other endangered species as well, for, as Kurt and Walter Auffenberg note, “The species may well indeed survive in the wild for generations to come while countless other organisms are lost.”

of life in southern Italy at the beginning of the 20th century. As they re-create that vanished world, the pair also finds greater understanding of the tumultuous relationships that sometimes exist between immigrant mothers and their children.

The Phenomenology Reader - Dermot Moran 2002

Includes a full introduction to one of the most influential movements in 20th century philosophy, this is a comprehensive anthology of classic writings from phenomenology's major seminal thinkers.

Tales from the White Hart -

Arthur C. Clarke 1998-10-01

"(Clarke) remains a master at describing the wonders of the material universe in sentences that combine a respect for scientific accuracy with an often startling lyricism".--"The New York Times Book Review". Here is one of his out-of-print classics now available in a new trade paperback edition.

No Tomorrow - Catherine Cusset 1999

"In this ambitious book, Cusset

reframes the often misunderstood genre that celebrates what Casanova calls "the present enjoyment of the senses." She contends libertine works are not, as is commonly thought, characterized by the preaching of sexual pleasure but are instead linked by an "ethics of pleasure" that teaches readers that vanity and sensual enjoyment are part of their moral being. Developing Roland Barthes's concept of "the pleasure of the text," the author argues that the novel is a powerful vehicle for moral lessons, more so than philosophical or moral treatises, because it conveys such lessons through pleasure." (Midwest).

Looking for the King - David C. Downing 2020-05-05

It is 1940, and American Tom McCord, a 23-year-old graduate student, is in England researching the historical evidence for the legendary King Arthur. There he meets perky and intuitive Laura Hartman, a fellow American staying with her aunt in Oxford, and the two of them team up for an even more ambitious and dangerous quest. Aided by the Inklings — that illustrious circle of scholars and writers made famous by its two most prolific members, C.S. Lewis and J.R.R. Tolkien — Tom and Laura begin to suspect that the fabled Spear of Destiny, the lance that pierced the side of Christ on the Cross, is hidden somewhere in England.

Queen of Ruin - Tracy Banghart 2019-07-02

A fierce fantasy sequel full of sisterhood, heart-pounding action, betrayal, and royal intrigue, perfect for fans of *The Belles* and *Caraval*. When the new, brutal Superior banishes Nomi from Bellaqua, she finds herself powerless and headed towards her all-but-certain death. Her only hope is to find her sister, Serina, on the prison island of Mount Ruin. But when Nomi arrives, it is not the island of conquered, broken women that they expected. It is an island in the grip of revolution, and Serina—polite, submissive Serina—is its leader. Betrayal, grief, and violence have changed both sisters, and the women of Mount Ruin have their sights set on revenge beyond the confines of their island prison. They plan to sweep across the entire kingdom, issuing in a new age of freedom for all. But first they'll have to get rid of the new Superior, and only Nomi knows how. Separated once again, this time by choice, Nomi and Serina must forge their own paths as they aim to tear down the world they know,
