Sex Offenders - Fabian M. Saleh 2009-02-11

This comprehensive reference by nationally recognized experts provides an interdisciplinary overview of existing knowledge about sex offenders. It provides in-depth coverage of the problem of identification, risk assessment and management, treatment, and legal solutions. It seeks to ensure public safety while at the same time maintaining medical integrity and respect for due process. The book is intended for psychiatrists, clinical psychologists, and researchers who work with sex offenders, as well as attorneys, members of the judiciary, and policymakers.

How Offenders Transform Their Lives - Bonita Veysey 2013-01-11

At a time when the scale of imprisonment in the United States has reached a historic high, researchers estimate that more than 600,000 individuals a year are released from prison to return to their home communities. These individuals have serious needs, such as finding employment and housing, reuniting with family members, and obtaining healthcare and treatment for alcohol and substance abuse problems. While research in this area has stressed these aspects of the transition from prison, a less explored area of research considers the role of internal identity shifts from that of an offender to one of citizen, and how this creates the conditions for desistance from criminal behavior both within the confines of a correctional facility and in the reentry process. This book presents a series of studies (mostly qualitative) that investigate individual identity transformation from offender status to pro-social, non-offending roles. Moreover, the work in this volume highlights the perspectives of the men and women who are current or formerly incarcerated people. Each piece provides an empirical analysis of the interaction between current or former prisoners and innovative pro-social programs and networks, which are grounded in the most current theoretical work about individual transformation and change. This book will be of interest to undergraduates, postgraduates, researchers and lecturers in all fields within the social sciences, but especially criminology and criminal justice and sociology and social work/welfare.

National Criminal Justice Thesaurus -

Juvenile Crime, Juvenile Justice - Institute of Medicine 2001-06-05

Even though youth crime rates have fallen since the mid-1990s, public fear and political rhetoric over the issue have heightened. The Columbine shootings and other sensational incidents add to the furor. Often overlooked are the underlying problems of child poverty, social disadvantage, and the pitfalls inherent to adolescent decisionmaking that contribute to youth crime. From a policy standpoint, adolescent offenders are caught in the crossfire between nurturance of youth and punishment of criminals, between rehabilitation and "get tough" pronouncements. In the midst of this emotional debate, the National Research Council's Panel on Juvenile Crime steps forward with an authoritative review of the best available data and analysis. Juvenile Crime, Juvenile Justice presents recommendations for addressing the many aspects of America's youth crime problem. This timely release discusses patterns and trends in crimes by children and adolescents--trends revealed by arrest data, victim reports, and other sources; youth crime within general crime; and race and sex disparities. The book explores desistance--the probability that delinquency or criminal activities decrease with age--and evaluates different approaches to predicting

future crime rates. Why do young people turn to delinquency? Juvenile Crime, Juvenile Justice presents what we know and what we urgently need to find out about contributing factors, ranging from prenatal care, differences in temperament, and family influences to the role of peer relationships, the impact of the school policies toward delinquency, and the broader influences of the neighborhood and community. Equally important, this book examines a range of solutions: Prevention and intervention efforts directed to individuals, peer groups, and families, as well as day care-, school- and community-based initiatives. Intervention within the juvenile justice system. Role of the police. Processing and detention of youth offenders. Transferring youths to the adult judicial system. Residential placement of juveniles. The book includes background on the American juvenile court system, useful comparisons with the juvenile justice systems of other nations, and other important information for assessing this problem.

Communications Class 101 Correctional Communications and Survival Skills - William F. Gaines 2009-03

Reformatory Schools - Mary Carpenter 2013-10-31

An influential 1851 work on the education, care and support of young offenders by the leading female advocate of the time.

Inside Art - Mary Brown 2002

An explanation of the way in which the study of art can act as a trigger for change in prisoners. This stimulating work is based on conversations with artists - including people in prison or who were once imprisoned. It charts the importance of creative activity as an instrument of personal change. As the author is compelled to say: "Individuals can, and do, change. If there is a message in these stories, this is it: we need to listen, understand and act upon it. The physical walls around prisons must not become mental walls keeping us from understanding the worlds of those within. We are all members of the society that builds the prison walls."

Guide for Preventing and Responding to School Violence - Alissa J. Kramen 1999

Presents different strategies and approaches for members of school communities to consider when creating safer learning environments. Violence prevention programs work best when they incorporate multiple strategies and address the full range of possible acts of violence within schools. The roles of school administrators, teachers and staff, students, school counselors, psychologists, and social workers, parents/guardians, community, and law enforcement are all discussed. Chapters: prevention; threat assessment; crisis planning and preparation; during a major crisis; after a crisis; legal considerations; recommendations for the media; legislative issues; and web links with additional info.

Transforming Criminal Policy - Andrew Rutherford 1996

How Offenders Transform Their Lives - Johnna Christian 2009

This book presents a series of studies that investigate individual identity transformation from offender status to pro-social, non-offending roles highlighting the perspectives of the men and women who are current or were formerly incarcerated.

Young Criminal Lives - Barry S. Godfrey 2017

Young Criminal Lives is the first cradle-to-grave study of the experiences of some of the thousands of delinquent, difficult and destitute children passing through the early English juvenile reformatory system. The book breaks new ground in crime research, speaking to pressing present-day concerns around child poverty and youth justice, and resonating with a powerful public fascination for family history. Using innovative digital methods to unlock the Victorian life course, the authors have reconstructed the lives, families and neighbourhoods of 500 children living within, or at the margins of, the early English juvenile reformatory system. Four hundred of them were sent to reformatory and industrial schools in the north west of England from courts around the UK over a fifty-year period from the 1860s onwards. Young Criminal Lives is based on one of the most comprehensive sets of official and personal data ever assembled for a historical study of this kind. For the first time, these children can be followed on their journey in and out of reform and then through their adulthood and old age. The book centres on institutions celebrated in this period for their pioneering new approaches to child welfare and others that were investigated for cruelty and scandal. Both were typical of the new kind of state-certified provision offered, from the 1850s on, to children who had committed criminal acts, or who were considered 'vulnerable' to predation, poverty and the 'inheritance' of criminal dispositions. The notion that interventions can and must be evaluated in order to determine 'what works' now dominates public policy. But how did Victorian and Edwardian policy-makers and practitioners deal with this question? By what criteria, and on the basis of what kinds of evidence, did they judge their own successes and failures? Young Criminal Lives ends with a critical review of the historical rise of evidence-based policy-making within criminal justice. It will appeal to scholars and students of crime and penal policy, criminologists, sociologists, and social policy researchers and practitioners in youth justice and child protection.

Education in Prison - Emma Hughes 2016-04-29

The role of education in prisons, prisoners' decisions regarding education, the impact of prison culture on either encouraging or discouraging such activities, and the potential consequences of education for prisoners' reentry into society all have important implications. This extended analysis of prisoner education represents a unique contribution to an under-researched field, whilst also making important and original connections between research on education in prison and the literature on adult learning in the community. Through offering crucial insights into the varied motivations and disincentives that inform prisoners' decisions to study in prison (whether it be through distance learning or prison-based classes), the reader is also able to consider factors that inform decisions to engage in a broader range of positive and constructive activities whilst in prison. These research findings provide insight into how prison culture and prison policies may impact upon rehabilitative endeavour and suggest ways in which prisons may seek to encourage constructive and/ or rehabilitative activities amongst their inhabitants if desired. Based on interviews and questionnaires completed by British adult prisoners studying through distance learning, this qualitative study offers a valuable complement and counterpart to prison education studies that focus on measuring recidivism rates. The learner-centred approach used yields a nuanced and complex understanding of the varied ways in which education in prison actually operates and is experienced, and considers the consequences of this for the students' lives. As such, the findings offer further insight into important evidence resulting from recidivism studies reviewed within the book, whilst contributing to the reemerging interest in studies of prison life and prison culture that are based on prisoner interviews.

Counseling Criminal Justice Offenders - Ruth E. Masters 2003-09-19

"Excellent book, the best I have read." —John McCullogh, South Hills Business School Counseling Criminal Justice Offenders, Second Edition takes a practical view of offenders, their problems, and the difficulties counselors face working with them in criminal justice settings. Author Ruth E. Masters examines criminal

justice counseling on an individual and group basis and in a variety of settings such as prisons, probation and parole agencies, diversion programs, group homes, halfway houses, prerelease facilities, and U.S. jails. The book also explores the many faces of offenders — young, old, male, female, and across many cultures. The Second Edition of Counseling Criminal Justice Offenders recognizes that individuals who counsel offenders in the criminal justice system often have not had the extensive training of a licensed psychologist and this text is designed to provide readers with an understanding of the counseling process. The book explores practical knowledge of legal principles, appropriate and effective counselor attitudes, and the past and present protocols of American corrections. Features and Benefits: Each chapter begins with Chapter Highlights and Key Terms and ends with corresponding exercises and discussion questions. A section at the end of each chapter lists relevant Internet sites and suggested readings. The book includes Counselor/Offender role-play scenarios that prepare students for situations such as how to restore order over a group counseling session, handle their own personal feelings about an offender, and much more. An Instructor's Manual including test items and skill-building exercises is available. New to the Second Edition: Chapters have been reorganized to emphasize the importance of counselors creating an alliance with offenders. Discussions have been updated on topics such as multicultural counseling, counseling victims, counseling paraprofessionals, cognitive-behavioral counseling, multimodal counseling, brief counseling, and counseling outcome effectiveness. New chapters have been added on counseling criminal psychopaths, the role of emotions in the counseling process, counseling male and female offenders, and the relationship between trauma, addiction, and human behavior. Primarily designed for criminal justice students taking correctional counseling courses, Counseling Criminal Justice Offenders, Second Edition is also a vital resource for any Criminal Justice, Social Work, Psychology, or Counseling practitioner interfacing with offenders.

Invisible Women - Angela Devlin 1998-03-31

In a book that is accessible to general readers and professionals alike, Angela Devlin has vividly recreated the realities of prison life for women at the end of the twentieth century. She describes the cavalier way in which women can be treated; the lack of provision for many basic needs; the over crowding; the liberal use of medication as a means of control; the violence which stems from drug misuse; the plight of black and ethnic minority women and foreign nationals; and the self-mutilation and suicide attempts of women in desperate need of help. Invisible Women 'lifts the lid' on women's prisons. It is a book that will shock as well as inform.

Report - Great Britain. Royal Commission on the Care and Control of the Feeble-Minded 1908

Prison Patter - Angela Devlin 1996

Rita Hayworth dancing by candlelight in a small Mexican village; Elizabeth Taylor devouring homemade pasta and tenderly wrapping him in her pashmina scarf; streaking for Sir Laurence Olivier in a drafty English castle; terrifying a dozing Jackie Onassis; carrying an unconscious Montgomery Clift to safety on a dark New York City street. Captured forever in a unique memoir, Frank Langella's myriad encounters with some of the past century's most famous human beings are profoundly affecting, funny, wicked, sometimes shocking, and utterly irresistible. With sharp wit and a perceptive eye, Mr. Langella takes us with him into the private worlds and privileged lives of movie stars, presidents, royalty, literary lions, the social elite, and the greats of the Broadway stage. What, for instance, was Jack Kennedy doing on that coffee table? Why did the Queen Mother need Mr. Langella's help? When was Paul Mellon going to pay him money owed? How did Brooke Astor lose her virginity? Why was Robert Mitchum singing Gilbert & Sullivan patter songs at top volume, and what did Marilyn Monroe say to him that helped change the course of his life? Through these shared experiences, we learn something, too, of Mr. Langella's personal journey from the age of fifteen to the present day. Dropped Names is, like its subjects, riveting and unforgettable.

Crime, Violence, Discipline, and Safety in U.S. Public Schools - Samantha Neiman 2009

This report presents findings on crime and violence in U.S. public schools, using data from the 2007-08 School Survey on Crime and Safety (SSOCS:2008). SSOCS provides information about school crime-related topics from the perspective of schools by asking school principals about the frequency of incidents, such as physical attacks, robberies, and thefts, in their schools. Tables in the report contain totals and percentages generated from bivariate cross-tabulation procedures. Many of the variables examined are related to one another, and complex interactions and relationships have not been explored. Reported findings include: (1) During the 2007-08 school year, the rate of violent incidents per 1,000 students was higher in middle schools than in primary schools or high schools; (2) Nine percent of schools reported at least one incident of threat with a weapon; (3) Rate of the distribution, possession, or use of illegal drugs was higher in schools with 1,000 or more students than in schools with lower enrollments; (4) About 13 percent of city schools reported at least one gang crime; (5) About 18 percent of city schools reported that student acts of disrespect for teachers (other than verbal abuse) happen daily or at least once a week; (6) For students involved in the use or possession of a weapon other than a firearm or explosive device at school, the most frequently used disciplinary action was an out-of-school suspension; (7) A lower percentage of schools with 1,000 or more students reported that more than 75 percent of students had a parent or guardian who attended regularly scheduled parent-teacher conferences than did schools with lower enrollments; (8) A higher percentage of schools with minority enrollments of 50 percent or more involved students in resolving student conduct problems as a component of violence prevention programs than did schools with lower minority enrollments; (9) Compared to schools in towns or rural areas, larger percentages of city and suburban schools reported having a written plan for procedures to be followed if the Department of Homeland Security issues a warning for a severe risk of terrorist attack; (10) A higher percentage of middle schools reported drilling students on a written plan describing the procedures to be performed during a shooting than high schools or primary schools; and (11) Among factors that were reported to limit schools' efforts to reduce or prevent crime, lack of or inadequate alternative placements or programs for disruptive students, inadequate funds, and federal/state/district policies on disciplining special education students are most frequently reported. Four appendixes are included: (1) Standard Error Tables; (2) Methodology and Technical Notes; (3) Description of Variables; and (4) 2007-08 School Survey on Crime and Safety Questionnaire. (Contains 18 footnotes and 23 tables.) [For "Crime, Violence, Discipline, and Safety in U.S. Public Schools. Findings from the School Survey on Crime and Safety: 2005-06. Education Code - Texas 1972

Nineteenth-Century Crime and Punishment - Victor Bailey 2021-07-26

This four volume collection looks at the essential issues concerning crime and punishment in the long nineteenth-century. Through the presentation of primary source documents, it explores the development of a modern pattern of crime and a modern system of penal policy and practice, illustrating the shift from eighteenth century patterns of crime (including the clash between rural custom and law) and punishment (unsystematic, selective, public, and body-centred) to nineteenth century patterns of crime (urban, increasing, and a metaphor for social instability and moral decay, before a remarkable late-century crime decline) and punishment (reform-minded, soul-centred, penetrative, uniform and private in application). The first two volumes focus on crime itself and illustrate the role of the criminal courts, the rise and fall of crime, the causes of crime as understood by contemporary investigators, the police ways of 'knowing the criminal,' the role of 'moral panics,' and the definition of the 'criminal classes' and 'habitual offenders'. The final two volumes explore means of punishment and look at the shift from public and bodily punishments to transportation, the rise of the penitentiary, the convict prison system, and the late-century decline in the

prison population and loss of faith in the prison.
