The Four Hills of Life - Jeffrey D. Anderson 2008-01-01

For more than a century, the Northern Arapaho people have lived on the Wind River Reservation in Wyoming—the fourth largest reservation in the country. In *The Four Hills of Life*, Jeffrey D. Anderson masterfully draws together aspects of the Northern Arapahos' world—myth, language, art, ritual, identity, and history—to offer a vivid picture of a culture that has endured and changed over time. Anderson shows that Northern Arapaho unity and identity from the nineteenth century on derive primarily from a shared system of ritual practices that transmit vital cultural knowledge. He also provides an in-depth study of the problems that Euro-American society continues to impose on reservation life and of the responses of the Northern Arapahos.

Native American Flags - Donald T. Healy 2016-01-12

Flags of the Native peoples of the United States proudly display symbols of tribal traditions, art, and culture. In *Native American Flags*, Donald T. Healy and Peter J. Orenski present an encyclopedic look at the flags and histories of 183 Native American tribes throughout the United States. Listing Indian nations alphabetically, this fully indexed reference includes both federally recognized tribes and other groups, and offers an image of each tribe's flag and a map of their location within the United States. Each entry includes a brief summary of the tribe's history, presents information on contemporary Indian peoples, and describes and illustrates in detail the symbolism and imagery of each Native American flag. A gallery of color plates includes full-color representations of 192 historic and contemporary Native flags. The authors visited more than two dozen reservations and surveyed more than 250 tribal governments, working closely with them to produce this authoritative volume. A portion of their original research on Native American flags was published in *Raven*, the journal of the North American Vexillological Association, an organization devoted to the scientific study of flags. This thoroughly

revised and updated edition includes more than fifty new flags and accompanying tribal listings and full-color representations of each flag. Carl Waldman's foreword places the flags within the context of Indian history, mythology, and art, and shows how Native American flags have become powerful symbols of Native unity and tribal sovereignty.

Design Roots - Stuart Walker 2018-02-08

Design Roots provides a comprehensive review of culturally significant designs, products and practices which are rooted to particular communities through making tradition and a sense of place. Many rich traditional practices associated with community, tacit knowledge and culture are being rapidly lost due to globalisation and urbanisation. Yet they have much to offer for the future in terms of sustainability, identity, wellbeing and new opportunities in design. This book considers the creative roots, the place-based ecologies, and deep understandings of cultural significance, not only in terms of history and tradition but also in

terms of locale, social interactions, innovation, and change for the sustainment of culturally significant material productions. Importantly, these are not locked in time by sentimentality and nostalgia but are evolving, innovative, and adaptive to new technologies and changing circumstances. Contributing authors explore the historical roots of culturally significant designs, products and practices, emerging directions, amateur endeavours, enterprise models, business opportunities and the changing role and contribution of design in the creation of material cultures of significance, meaning and value. An international perspective is provided through case studies and research from North and South America, Africa, Europe, Asia and Australasia, with examples including Aran jumper production in Northern Ireland, weaving in Thailand, Iranian housing design, Brazilian street design and digital crafting in the United Kingdom.
